## ADDRESS OF THE COMMITTEE.

---

THE Committee of Management in making their Annual Report to the Governors and Subscribers, desire to express their sincere thanks to the many kind friends who have so liberally responded to the appeals that have been made on behalf of this Charity during the past year. The constantly increasing demands on the Hospital compel a continuation of appeals for assistance, and the Committee encouraged by the success which has attended their past efforts, trust that these renewed calls for aid will not be made in vain. Forty-four years have now elapsed since the foundation of the Institution. From the year 1816, to the 1st January, 1860, 135,376 persons have availed themselves of the benefits of the Charity; of these 2,811 have been restored to sight by the operation for Cataract, and that for the formation of an Artificial Pupil, the sight as well as the personal appearance of 10,825 persons has been improved by the operation for Squinting. During the past year 6,307 persons have been received as Patients, of whom 162 were admitted as In-Patients. The Committee hope that the advantage these poor afflicted persons have derived from the treatment of the Medical Officers has been satisfactory to the supporters of the Hospital; the number of Patients now attending exceeds 700 weekly.

The Institution has been supported at an expense of £1061 6s. 1d., for the year 1859, the receipts during that period being £966 15s. 9d. leaving a deficit of £94 10s. 4d. to be provided for. The Committee of Management earnestly entreat assistance for this useful Hospital, *the first in London to set the great example of receiving the*

afflicted poor on their own application without *letters of recommendation*. The Hospital is situate in the West Centre of this great Metropolis, and surrounded by a densely populated neighbourhood inhabited chiefly by a class of poor mechanics, artisans, Needlewomen, &c., whose occupations are extremely trying to the eyesight. The large number who attend when necessity compels them to seek medical aid, clearly establishes the importance of the Institution. On these grounds the Committee anxiously urge its strong claims for support, and appeal to the public to assist them in making the benefits of the Charity of still greater use, not only to the Metropolis but to the United Kingdom.

The Committee, upon the report of the Surgeons as to its necessity, have commenced extensive alterations on the ground floor of the present building, for the purpose of giving better accommodation to the Out-Patients, who were so inconveniently crowded together, both in the Waiting Room and Consulting Room, as seriously to impede the Surgeons in the discharge of their duties. Apartments lately occupied by the House-Surgeon have been taken for this purpose, and others assigned for his use in another part of the Hospital. One room has been fitted up as a Dispensary for medicines, and the other as a darkened room, for the use of the Ophthalmoscope; an instrument which has now become a most important adjunct in the study and treatment of diseases of the eye. The Committee have not, from want of funds, been able fully to complete the contemplated improvements. They solicit contributions to enable them to carry out these indispensable works.

The Committee have with sorrow to record the severe loss the Institution has sustained during the past year, by the death of two of the Vice-Presidents, the late Earl de Grey, K.G. and the late Colonel Thomas Wood, old benefactors and warm supporters of the Charity. They have also to deplore the loss of Mr. Charles Gardiner

Guthrie, Surgeon of the Hospital, and son of its late eminent founder. The Committee desire to testify their sincere respect for his memory, and their deep sense of the loss the Hospital has sustained in his death.

An Inalienable Fund, and also a fund called the "Guthrie Fund," has been formed in the names of Major General Wood, Sir John Swinburne, Bart., and Lewis Powell, Esq., Trustees. The money from time to time contributed to the Inalienable Fund, has been invested in the Three per Cent. Consols, and the *interest only* is permitted to be *appropriated* for the general purposes of the Hospital.

The "Guthrie Fund" is a new Fund, formed at an annual meeting of the Governors, held on the 3rd June, 1856, in order to perpetuate their regard for the memory of the late Mr. Guthrie; a subscription was entered into (by the Noblemen and Gentlemen then present), to be applied in aid of the Inalienable Fund, the principal of these two funds forming a permanent capital. The amount at present invested of the Inalienable Fund is £5,000 stock, and that of the "Guthrie Fund," £450 stock, making a total of £5,450 stock.

Donations of Fifty Pounds and upwards must, by the Rules of the Institution, be applied to the Inalienable Fund, unless it is otherwise desired; so that the benevolent object of the Donors will endure as long as the institutions of the country. A Subscription of One and Two Guineas a year constitutes an Annual, and a Donation of Twenty Guineas, a Life Governor.

The Medical Officers of the Army, the Navy, and of the East India Board, are admitted as a privilege to the practice, &c., of the Hospital.

---

THIS Charity was formed at a meeting of Noblemen and Gentlemen, at the *Thatched House Tavern, St. James' Street*, on the 5th December, 1816, General LORD LYNEDOCHE in the chair. It was established first in *Marylebone Street*, but afterwards removed to *Warwick Street, Golden Square*; and upon a piece of ground being obtained, originally intended to be held on a lease for 99 years, from the Commissioners of Woods and Forests, the present Hospital was erected, and opened for the reception of patients on the 1st of *January*, 1832; but in the year 1852, the Fee Simple of the site of the Hospital was purchased of the Crown, for the sum of £3,060. The objects of this institution are to relieve the Poor of every description labouring under Diseases of the Eye on their own application; and it is greatly to the satisfaction of the subscribers to, and supporters of, this Hospital, that they have set the example, in the metropolis, of receiving these poor persons without letters of recommendation from each individual Governor, thus showing that their object has been pure and genuine charity.

On the opening of the Institution in *December*, 1816, and for several years afterwards, there were, in London and its vicinity, great numbers of soldiers and sailors, pensioners and otherwise, with their wives and children, who were labouring under inflammations of the eye. The greater part of these applied for assistance, and many who would have remained miserable and wretched objects wandering in poverty through the country, have been enabled, from the relief obtained at this Hospital, to support themselves and their families decently by their labour. There is no national institution in this country in which those who have suffered,

and are suffering, from diseases acquired in the public service, can apply for and obtain advice. They must depend on the charity of individuals for that assistance, through the medium of the different general hospitals supported by them in various parts of the kingdom. His late Royal Highness the Duke of York, in becoming the first patron of this Institution, and setting on foot the subscription for the erection of the present Hospital, was graciously pleased to take that special interest in it, on account of its being open at all times for the reception of those persons, their wives and children, not only as *Out-patients*, but as *In-patients*, without any letter of recommendation, whenever the wards of the Hospital would admit of their reception. It remains for those who survive His Royal Highness to continue and carry into effect his charitable intentions; all other *In-patients* being admitted only on the recommendation of a Subscriber, or on the application to the Committee, of the Mayor, Magistrates, or Clergyman of the place in which the poor person resides for whom they are desirous of obtaining admission.

If the funds of the Institution were equal to its support in full operation, great advantages would result to the poor; and many an unhappy person, who is now lingering out a miserable existence, in the possession of health and strength, but without sight to enable him to apply those advantages, would be relieved, and others prevented from falling into such a distressing state, from the timely and careful assistance which they would receive as *In-patients*, but which cannot be given to *Out-patients*—and many a wretched infant devoted to misery from the hour of its existence through loss of sight, would be rendered a useful member of society. The prevalence of a destructive inflammation among the infants of the poor, which deprives them of sight almost from the first hour of their birth, has been too fatally exemplified in the Reports of this Charity, and who, by timely assistance, would have been saved from blindness, and in many instances from death.

It is from the mothers of families that the means of relief are especially to be hoped for by these poor creatures—it is to their feelings this statement is addressed, in the full confidence that the blessings bestowed on their own offspring will not fail to suggest to them the propriety of contributing a small portion of their superfluous wealth in affording relief to the distressed poor, afflicted with maladies affecting the most gracious of all gifts—the sight.

The Hospital forms a school of instruction for students of every description, who are enabled to see the treatment of diseases of the eye on so large a scale, that they cannot fail, within a short time, to obtain a competent knowledge of them; and thus the advantages which originate in this Charity are disseminated over the whole face of the earth; and there is already no quarter of the globe in which surgeons educated at this Hospital have not rendered the most important services to mankind, in having restored sight, and with it, health, vigour, and happiness to thousands.

In order to ensure the continuance of this course of practical instruction, and for the general good management of the Hospital, the following Rules have been adopted:—

I.—1. That every Surgeon and Assistant Surgeon of the Surgeons.
