Dear Sir

I expect to be out tomorrow
it may be a few days yet - I
suppose you had not you had
not finished them when
that old scoundrel Gramshaw
Kidnaped me & put me in
the Retrial That fool Leonard
helped the old pig I will see
a few of them when I get out
of those suits and that fancy
waist-coat were sent to my
house you had better get them
& send them at once I can refer
you to Dr Law & he will tell you

It is all right - I have an
invention that will get me
all the traffic of the world
I have known it for over 3
months but not been able
to put it into going order
through my legal detention
It will me about about 10 millions
a day so I can prove 10 millions
a days damages against the
city of York & Greenwich for
the Police doctor to sign my
liberty away the Retreat
this place & the Commissioners
of Lunacy Edinburgh. I will sue
them for 10 millions for every
day they have kept me in
It will be the biggest case the
world has ever experienced
It is worked with by wheels

Diameter wheel 9 ft tire 2 Groove
 $4\frac{1}{2}$ inches deep & 9 inch wire
cable Revolutions to be got by
a 9 ft - screw on a 3 ft - screw
we could get 10000 revolutions
with this be I only want 880
to go 50 miles a minute
I will have them on a much
larger scale on long journeys
There are two overhead cables
stationary to steady the cars
all worked on Ball bearings
Anyhow I have shown you
that this is a certainty
So send those clothes at once
I woke up about - after I
had been about - the 2nd night -
at - retreat - and found I had
the loudest voice in the

world I can sing now from
the highest- treble to the
lowest- bass It will be worth
a few thousands a night-

Yours sincerely

Frank Bill

P.S. I will give you a big order
as I am going to take a lot-

Dear Eastbrook

Mr Fitzroy's aural
condition is probably
a mixed one. In

both middle ear
there are evidences of
chronic catarrhal
changes, involving of the
membranes with adhesion

thickening. These changes
are more marked in the
right which is the better
ear. In addition to these
there are however, if one
can be guided by the
hearing fork tests,

regenerative changes in
the labyrinth & in the
auditory nerves & these
are more advanced on the
left side so that as a
result the hearing is
better on the more
defective.

A massage of the membranes
would probably result in
some improvement as far
as the middle ear
condition is concerned
and cannot look for
any improvement in the
~~the~~ internal ear, so
that even if it were
possible to carry out
his treatment one could
not look for more than

a slight increase in the
hearing distance.
When I attempted to pass
the Eustachian catheter
today he was so evidently
distressed &averse to its
use that, considering his
mental condition, I do
not think it would be
wise to persevere. Indeed
any abrasion of the Eustachian
surface, which might easily
occur if he resisted the
treatment, would be more
likely to do harm.
I found his nose & throat
in a satisfactory condition.
In my I cannot write more

Mr Lyster said:- Mr FitzRoy came into my bedroom last night as I was getting into bed. He talked a lot of language about girls. I think he was ill. He petted me and tried to interfere with my private parts. He kissed me several times. He made some rude suggestions to me,. It is my opinion that he wanted to use me like a woman. I didn't say anything to him, but made every excuse to get away. I was disgusted.

Mr Middleton said:- FitzRoy came into my bedroom while I was dressing one morning, so I asked him to go away as I had not room to dress. He came in to talk I suppose. He has been in my bedroom once or twice before. He has tried to cuddle me as he would a girl, and I have had several rows with him about it. He has never tried to kiss me and he has never interfered with my private parts, but if I had allowed him to continue in his methods he probably would have done so. He has rather objectionable manners that way. When I asked him to go out of my room this morning he kicked me.

The Charge Attendant said:- I walked down the gallery last night and called "bedtime", turned out the lights in the smoke room, walked up the gallery to the sitting room and did the same there. I then walked down the gallery and got out the gentlemen's clothes. Mr FitzRoy was not in his room and he had not undressed so I looked for him in the smoke room, but he was not there. As I came out I caught a glimpse of him in Mr Lyster's doorway. Mr Lyster was sitting on the side of the bed and Mr FitzRoy was patting him on the shoulder. Mr Lyster was in bed when I went by 5 minutes before. Mr Lyster said Mr FitzRoy seemed to have mistaken him for a girl, he seemed so very affectionate and messed him about. When Mr FitzRoy was in his own room he said something about reporting, and seemed mesmerised. I fancy he was asking me not to report him.

Jan 10. 1903. Much more cheerful and contented lately. Health good. W.M.

Apr 20, Continues cheerful and contented. Childish at moments.

July 3. Has had outbursts of restless ness, using abusive and filthy language. Bodily health good. W.M.Robson.

Oct 3 1903. Went to Wales but had to return because he was abusive.

Of late has been much upset by his father's death. W.M.R.

Jan 3, 1904. Is very variable, becomes angered and abusive on slight provocation. His conversation is childish and not of an intellectual order. W.M.Robson.

Feb 3, 1904. Last night patient broke his "parole on the grounds" and disappeared at 4.30. He tried to borrow money from the Manager of the Plough Hotel in order to get to London, without success. He, however, pawned his gold watch chain. He was found with a woman at the Pheasant Public House in an intoxicated condition at 8 o'clock. On his way home he was very violent and kicked the cab, damaging it a good deal. His language in his return was very foul. W.M.Robson.

Mar 9 1904. Patient was allowed in the town with his mother and an attendant yesterday. They were to dine at the Grand Hotel and then go on to the theatre. At the Grand Hotel the patient managed to slip out at the back door and was lost. This occurred about 7.45 pm. He was found on the Towcester Rd about 9pm, the worse for liquor, but not drunk. His language again was very filthy, but he was not violent as on the previous occasion. He declared that all he wanted was a woman.

Mar 10. 1904. Last night patient slipped from his own room while undressing into that of another patient and was very offensive in his behavior. The verbatim accounts of two patients & the attendant are appended. W.M.Robson.

he should be informed.

His brother Capt Ronald Tiffling
is practically the only near

3 years in German prisons
now interned in Holland - and the

war office will not allow him to come
over on parole. There is no doubt
that he will take upon himself the
maintenance of his brother - but
as he is abroad I am not sure whether
he can be appointed Committee of

before the Master in Lunacy.

EDINBURGH.

John Finlay was admitted to Craig House on 19th September 1900 having been under treatment at Barnwest House Gloucester since February of that year. His disposition is reserved + suspicious. For some time he was working in S. Africa + gives a history of malaria. He has a tuberculous family history. He is not suicidal but is at times dangerous to others.

When admitted he was very irritable suspicious + sullen + impatient of contradiction. Since then he has remained much in the same state + has had occasional outbursts of violence during which he will assault his

attendants or other patients. His physical health has been improving.

Any attempt to get him to wear new clothing always brings on an outbreak of violence. He has always taken his food & slept well.

Dr. O. J. Wilsey
"Long Island Home

New York - Long Island -
U.S.A.

Orichton Royal Institution
Dumfries - Scotland,

27th October 1908.

Dr. Otville Jay, Wilsey,

Medical Superintendent

Long Island Home

Auxiliary -

Long Island, N.Y.

Mr. John Gilmore, now known to all
who come in contact with him, as
the "Egomaniac", presents his compliments
to Dr. Otville Jay, Wilsey, & Dr. Stevens;
* Dr. Downing & Northridge through them,
and begs to inform Dr. O. J. Wilsey, that
he is still alive, altho' a nervous
and physical wreck. The effect of
Dr. Otville Jay, Wilsey's Mental and
Physical treatment for Delusions
of self accusation, Involutional
Psychosis, (see "Dieffenдорff" read to
him by Dr. Stevens), and Paranoia (2).

He begs to state that his
present chronic condition of nervous
debility and loss of volition, and
normal feeling, is the direct result
of erroneous drugging by Dr. Northridge

3. Dr. Orville Jay Wilsey has doubtless dis-
covered Erethis - if he is alive - that
the game of Murder he enacted
was on the husband of a good
woman, and the Son of respectable
Scotch parents, and neither a Jew,
Greek - (Savos) Russian, Turk, nor
brute - nor a man who was
in any way neglectful of his
duties either as a husband or
father - but the victim of some
lie or lies, on whom either Dr.
Northridge or Dr. Wilsey relied
on for information, warranting
in the latter's mind, the treatment
he administered. It would have
been more humane of Dr. O. J.
Wilsey to have killed Mr. Gilman
outright, than leave him in his
present condition, notwithstanding
the fact he was discharged
"Improved" so that the hands of
the men in Amityville could be cleared
of all suspicion of ill-treatment, or in

4
case a mistake had occurred.

It cannot be satisfactory to Dr Orville Day, Wiley, to know that Mr Gilmoors wife and children are anxiously waiting for him, and are only waiting on an asylum wreck.

Mr J Gilmoor has been informed that he has been attacking Dr O Durbey behind his back, ~~but~~ and as the victim cannot have a personal interview with him, he takes this means of telling him, that he is one of the most brutish men, that ever had the care of a person suffering from a mental malady - no matter the cause. and the only excuse Dr O J Wiley can have is that the victim of his cruelty was unfortunately ~~and~~ sufferer from blood poison, unknown to himself -

1/2 and unprofessional use of Electricity (not
intentional by Dr. Northridge) for Beels
facial paralysis - coupled with the
beatings received from Edward
McBracken (agent for the Society for
the prevention of cruelty to children)
whereat he was held down by other
attendants; by being strapped for
months in a filthy bed, made to
believe he was being fed on
poisonous or filthy food, confined
in a filthy dormitory with several
Paralytics, by being beaten on the
slightest provocation on his part -
(said provocation being the result
of illness) and by the inhuman and
treatment in general, perpetrated
on him, without the knowledge of
any of his personal friends or
relatives - all of which has rendered
him homeless, helpless and now

Dr Orville Jay Wilsey has also doubtless discovered that Dr Downing Northridge & himself "threw Mr & Mrs & Gilmore and Children to the lions", not "before" "Seeing they were tame" but before making sure of their ground - and now we are all a pained family - ^{at least he is.} altho' by the grace of God the victims' wife and Children are comfortably off in Trinidad - his parents & brothers well, and performing their usual daily duties, & able and willing to pay for his support - until cured - a condition Dr Orville's treatment, & subsequent treatment has made practically impossible -

In conclusion Mr J Gilmore begs to state that,

Dr^s Rutherford How.

Dear Sir,

I beg to inform you that
a system of cruelty exists in ~~this~~ institution
not by starvation, nor beatings - but by a
System of Mental Suggestion, and most
profound fractomine - Cruel jest - telepathy
or other art unknown to me - Nature
always asserts herself - a plant, or any
form of animal life under proper
conditions will, even when vitality seems
almost extinct resume its normal
functions and become either beautiful
or useful again - unless interfered with.
Such is my case - my brain is
seized - Physically, envenomed by Chlorotic
Constitution in the tropics and anemia,
Malaria, and Blood poisoning, leph
caused by Mew in whom I put my

²
absolute trust and whose opinions and
advice I honestly heeded - and whose
errors in diagnosis I believed. Now
why should the entire mind of this
institution (as well as Harbanc) which
was intended by the founder to be
conducted on the principles of
"What Christ would do" - continue to act
in an unchristian manner on my
intelligence - my weakened brain is
not able to cope with the combined &
concentrated efforts of patients and
attendants to place obstacles ^{in my way} and
my ^{own} errors means to act unfavorably to
my recovery - I am aware of the fact
that the more I protest, object and
complain, it is considered unmanly
weak and childish, and matters are
just made worse for me, but I
by respectfully to inform you that
my father & brother are honestly under
the impression and belief - (through
their confidence in you) that ~~no~~

abuses are permitted. Probably, in fact it cannot be otherwise—
 you do not know about these things, whereof I speak—
 For Example—

In Yarnhill. I was so acted upon mentally that I was under the
 impression that the police of Glasgow were after me for
 discovering the presence of blood poison in my system after
 having been married for these long years, and with my
 brain weak! was actually afraid of my own shadow—
 Here the same course is employed—not by you—but
 by patients—Mr. Frew never loses an opportunity to ask me
 "if the police are after me?" "If my father put me here
 to get me out of the way?" Mr. Dick says—"You shall
 be glad to put an end to the cruelty in this building
 when you see the bloodshed you have caused." This addressed
 to me—Now what bloodshed have I caused—when doctors
 have amused me time and time again, that my unfortunate
 accident when a boy has caused no trouble—my own
 brothers-in-law Dr. G. & A. Reid have themselves told me so—
 Can it be possible that everyone is trying to drive them
 and my parents, and brothers, into the same mental
 condition as I have been driven perforce to. If I have
 unconsciously broken the laws of man and merit punishment,
 the manner employed is not a correct one. I
 am entitled, may claim my rights as a British Subject
 to face my accusers in open Court before ~~my~~ ~~my~~ my
 Equals—and have my culpability passed on legally—I
admit my mind is weak—but that is no reason why
 a system of imprisonment be practised on me here or in

Similar Establishment—

I place this protest in Your hands with all respect—not flaming you for I do not believe, in fact I could not conceive, that you would permit anything but absolutely humane treatment to any one in your care. I also request that this statement be made a part of the records of my case— of my parents' relations, wife & her family, as well made cognizant of the manner in which my chances of recovery are hindered, they should be informed of the reasons, or deductions arrived at by those who have come into this place illegally to act upon me ~~contrary~~ to law. are permitted & they, of course, think I am mad—or rather out of my mind, and all things upside down— and have placed me here for rest and ultimate recovery.— I ask you honestly, is this belief of

5/ Their wellfounded, and so my Environment
treatment and "persecution conducive to
Such a "much to be desired result" as
my recovery—

I want to know what more
is Expected of me— I have Told You
my feelings & shortcomings of my
youth— What more is required— to
stop the cruelty and bloodshed in
these buildings spoken of by Mr
Dicks— I can quite save himself,
and can conduct myself like a
Gentleman,— There is no need for
padded rooms in my case— but it is
my impression that that is where it is in-
tended I shall land ultimately— I am
aware of the fact that I have ^{power over my} no normal
emotions— why ^{that power has} they have been lost is in-
explicable by me, I know that at present
they do not assert themselves— They are
in a latent condition— they exist, but
the constant worrying of me is not
conducive to bringing them again into
activity— I have always been a sympathetic

man - extremely so - possibly I have used up my finer feelings, but
exercising them to free - just as any other thing goes out
by not being selfish -

If you can suggest anything please let
me know - if you consider my communication worthy of
your attention - I am at least in earnest - If I am
incurable - tell me so - or tell those who are caring
for me - and who have assumed the responsibility of my
support for they are worthy of the utmost consideration
and respect -

Yours truthfully, & respectfully
John Gilman

P.S. This letter is not rubbish - Please do not take any offence at
this communication -

another example of intimidation comes regularly from Mr Smythe
viz - "I know all about your Cockey, when I get my hands
on you, you will know what the matter with you - I won't
spare you - Now what on earth has Mr Smythe to do with me?
Will you kindly find out for me -

Dear Dr Rutherford,

Messrs Anderson & Kerr showed me your letter with regard to Mr Forsyth, and I see that he wants to be released as otherwise there is nothing but ruin before him.

The delusion that he is ruined has been present in one form or another during the past three or four months.

Formerly Mr Forsyth was a man of determination, alert, and competent to protect himself and his interests, but at the beginning of the year he became morose, restless and hesitating, and the mismanagement of his business attracted attention. E.G. He would go to the market and hesitate as to the animal he would buy until he returned without making any purchase. Ultimately the shop was closed entirely because of this incapacity to act.

Since May he has wandered about his house, wringing his hands, bemoaning his fate and knocking his head against the door. He wants to "get on the rails" again, but he is quite incapable of making any exertion to do so. He has also frequently stated that he ought to do away with himself, and has confessed that he has had terrible thoughts in that direction. Every effort has been made by his friends to get him to go a holiday, but without success. His capacity for sensible action seems/-

2,

seems to be totally paralysed, and all he does is to keep harping on the delusion that he is ruined. This, with the fact that a brother committed suicide, has given considerable cause for anxiety in dealing with him.

Yours sincerely,

Alfred Butler.

Dear Dr Rutherford

I have advised a neurotic youth
to apply for admission to the Retreat
as a Voluntary Boarder & I am writing
on his behalf.

He has had imperative ideas for
some time past, has got notions into
his head that he does not see how
he can walk or talk but continues
to do both. Lately ideas have come
into his head that he must commit
suicide & he says he has taken
laudanum & turned on the gas in
his bedroom. No one has seen any
real effects from these things.

In his general behaviour he has shown
indecision and cannot settle to his
work -

He is well nourished,
is rather fat & flabby, has no voice
that I know of. Name Pollard.

Father a confirmed drunkard,
one Paternal uncle alcoholic.

He is not melancholic, as he is
not seriously depressed but I think
he wants to live under conditions
where he will have discipline & ^{no} ~~more~~
chances to injure himself - & it is
desirable that he goes right away from
home. He can pay 30/-

weekly -

If you can take him in I should
be glad if you would send a wire
to his doctor - address on the other side

In fact a wire in either case - whether or not would be a convenience -

The youth is willing to go as a Voluntary Boarder and the case does not seem to me to need certificates.

I think you will be able to gather what kind of case it is. I cannot but think that if he stays at home he will drift into a nervousness, irritable and that his chance turns upon discipline & plain speaking -

I was very glad to hear from Helen that you are better we were all much concerned at hearing

some little time ago that you were poorly.

With kind regards

Yours very truly

Bedford Pierce.

40 years of age. Occupation, Farmer.

Admitted to Craig House, 28th June 1905.

He had one previous attack.

Medical certificates - He is unable to carry on any rational conversation. He has an aversion to cleanliness and is unable to look after himself. He is violent in conduct. Recently this has become more pronounced. He falls on the floor and makes movements as if attempting to swim.

He has been ill for a month.

On admission, it was difficult to get him to speak. He was very restless and refused all food. Very restless and noisy through the night.

On July 8th, Mr. McGregor showed signs of improvement. He took some interest in what was going on in the ward and slept well at night. He was now talking cheerfully to those round him.

On July 20th, he had a relapse. He was noisy, sleepless, restless and boisterous in his manner.

This condition lasted until the middle of September when he began to show considerable improvement.

Towards the end of January 1906, he had another relapse. He now showed great impulsiveness and frequently attacked his attendants. On one occasion he threw a knife at one of the doctors.

He was quieter about the end of February but in the following month he again became very impulsive and excited.

He is now in very much the same condition.

Dear Dr. Jeffrey,

I have most carefully examined Mr. R. Balfour, and have heard all about his attack from his brother-in-law. My conclusions are -

1. He suffers from melancholia of the delusional and suicidal type.
2. It is not likely that he will recover at once. It will probably take some months.
3. For his present safety and to give him the best chance of ultimate recovery, I advise that he should be placed in the Crichton Institution, and the sooner the better.
4. There are certain motor symptoms in his tongue, his eyes, his face, and his walking, and hand grip which show that his motor centres are involved - probably through some degree of arterio Sclerosis. It mentally he is not incurable.

Yours v. truly,

T. J. Clouston.

Dear Mr. Gifford,

I have most carefully examined Mr. R. Balfour, and

have heard all about his attack from his brother-in-law. My conclusion is

1. He suffers from melancholia of the delirious and suicidal type.

2. It is not likely that he will recover at once. It will

probably take some months.

3. For his present safety and to give him the best chance of

future recovery, I advise that he should be placed in the Orkney

Asylum, and the sooner the better.

4. There are certain local symptoms in his mind, his eyes,

face, and his limbs, and I think it probable that his motor centres

are involved - probably through some degree of arterio-sclerosis.

5. Mentally he is not incurable.

Yours v. truly,

T. L. Clouston.
