The use of the foregoing Tables for the Purchase of Leases, &c.

The first contains any number of years that are to be Purchased, from

I year to 100.

The 2. tells you how many years and lodd Months purchase, such a Lease is worth in ready Money, 51b. per cent. being allowed for the interest of the Money laid out.

The 3 Column shews, what the same is worth at 61b. per cent. The 4 at 81b. per cent. And the last at 10lb. per cent.

Example, What is a Leafe of 51 years to come, worth in ready Money,

at 51b. per Cent. Alfo,

Look in the first Column for 51 years, and right against it under 5 per Cent. you shall find 18. 3. which shews the Lease is worth 18 years purchase, & 3 months, which is a quarter of a year. So that if the Rent were 101. a year, then 18 times 101. is 1801. and the quarter of the year is 21.101. in all 1821.101, and so much is the Lease worth in ready Money, at 5 per cent.—— But if the Purchaser would have 61. 81. or 101. profit for his Money, then

At \\ \frac{6}{8} \rightarrow \text{Profit for his } \\ \text{Money the } \\ \text{Leafe is } \\ \text{Worth} \\ \end{arrow} Years Mon. - 9 Spurchase which S

And thus you may do for any other number of Years,

So, a Leafe for 21 years. 21 years. S S Per cent.
8 S is worth let the Rent be what it will.

Are spent in one whole years Circumference.

So that 7 Pence a day, is 7 Pound, 7 Angels, 7 Groats and 7 Pence in the year, which is 101. 125. 11d. in the year.

One Weeks Expence in Farthings, makes appear The Shillings and Pence expended in

a year.

And so 21. Farthings by the Week, is 221. 91. 39. in the year.

your hand, take a straw 4. inches long: Hold it upright with your thumb, then turn your body and hand to the Sun, till the shadow of the ball of the thumb reach to the line of life, and the shadow will point at that part of the hand which sheweth the hour of the day, Ge.
