The sign — indicates that between the volume numbers given the series is complete. The same symbol is used notwithstanding a change of series, e.g. Vol. 1-New Series Vol. 20-indicates that the whole of the original series and Vols. 1–20 of the second series are in the Library.

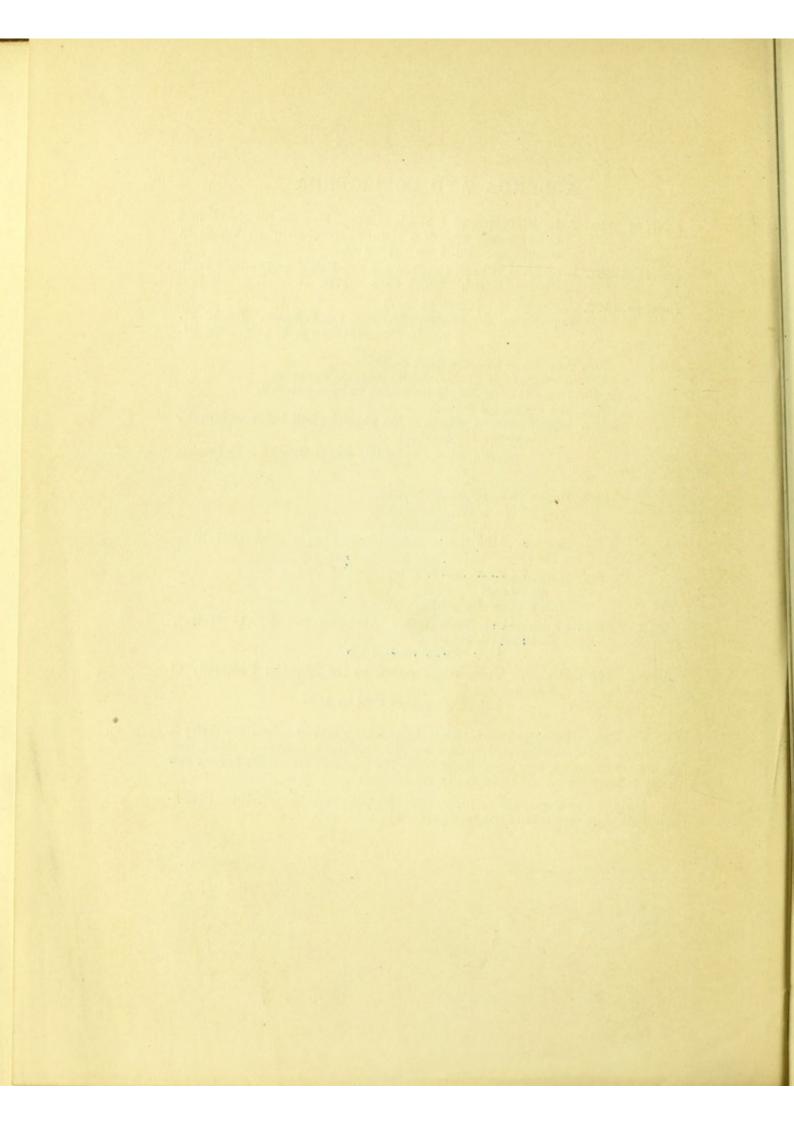

Many of the imperfections in series catalogued are to be attributed to nonscientific parts which have not been preserved.

# PREFACE

CATALOGUE of Periodical Publications in the Royal Society's Library was last printed in 1881 and the large number of accessions to this section of the Library in the succeeding thirty years has rendered it imperative to compile a new Catalogue. The Library Committee, after full consideration of the question, decided that a mere revision of the existing Catalogue would not be sufficient, and that the compilation of a new Catalogue from the works on the shelves was the only satisfactory way of meeting the requirements of the Library. They were also of opinion that the old Catalogue, classified under eight separate alphabets, was inconvenient for reference, and decided that the new Catalogue should be arranged under one alphabet and restricted as closely as possible to works which might properly be termed periodical, leaving many of the publications entered in the old Catalogue of Serials to be transferred to the Catalogue of Books, which has always been maintained as a separate list.

The new Catalogue contains the titles of all the works issued in a serial form which were in the Society's Library on December 31st, 1911. Some publications are included which are not, strictly speaking, issued as periodicals (e.g. the Publications of the Ray Society), and there are a few others as to which it is doubtful whether they are rightly classed as periodicals : but in both these cases it has been thought better to include something which may not be a serial rather than to exclude a work which might possibly be looked for in a catalogue of periodicals.

Every periodical is entered under the first word (the definite and indefinite articles only excepted) in the title. The entries are numbered consecutively to facilitate cross-references and are arranged in alphabetical order. Where the title of a periodical changes, the second and any following titles are entered immediately after the original one; the later titles are also entered in their own places and cross-references

#### PREFACE

are given to the number under which the periodical is catalogued. Cross-references from the names of the more important editors have been made in a similar manner. When the change in the title of a periodical is of only minor importance, it is indicated by the use of round or brace brackets.

Three kinds of BRACKETS are used in the Catalogue: (a) round brackets ( ), indicating that the words enclosed appear on the titlepages of the later volumes, but not on the earlier ones: (b) brace brackets  $\{ \}$ , indicating that the words enclosed appeared on the title-pages of the early volumes, but not on the later ones; and (c) square brackets [], indicating that the information contained between them is supplied by the cataloguers. An arrow  $\rightarrow$  after a volume number or a date indicates that the Library set of the periodical is 'In progress'.

The SOCIETY INDEX shows what publications of a particular Society are in the Library. The number after each entry refers to the corresponding number in the main part of the Catalogue. An arrow after the number signifies that the Library set of the periodical is 'In progress'. This index includes various Government Departments, Universities, Colleges, and similar public bodies. In order to facilitate reference a duplicate entry has been made under the name of the town in which the head-quarters of each Society are situated.

In the compilation of this catalogue much valuable information has been obtained from the 'British Museum Catalogue of Printed Books', sections 'Academies' and 'Periodical Publications'. The 'Catalogue of Scientific and Technical Periodicals' by H. C. Bolton, published by the Smithsonian Institution, has also been of very great assistance.

The Catalogue has been compiled by Mr. Luxmoore Newcombe, Sub-Librarian of University College, London, and Mr. L. Ellston, M.A. The thanks of the Committee are due to these two gentlemen for the care and ability which they have devoted to the task. The Committee also wish to express high appreciation of the manner in which the staff of the Oxford University Press have carried out their share of the work.

#### WEEKLY

owing to a quarrel between the 'Author' and the publishers the publication was continued from March 6th 1682 to January 15th 1683 by Faithorne and Kersey only, as numbers 8 to 50. On March 20th 1682 the original 'Author' issued number 1 of a rival publication, bearing exactly the same title as the one published by Faithorne and Kersey, which he continued till Sept. 25th 1682 (i. e. No. 29). In 1683 he issued a title-page and index to these 29 parts. No number 10 of Faithorne and Kersey's 'Memorials' was issued, the pagination of numbers 9 and 11 being continuous. In the later 'Memorials' the 'Author' states that he 'has printed Numb. 8 and Numb. 9 though very few of them have been delivered out of his own hands'. This set wants both these numbers.
