PREFACE

THIS catalogue contains the titles of all the works in the College Library which are issued in a serial form. Some publications are included which are not, strictly speaking, issued as periodicals (e.g. the Publications of the Ray Society), and there are a few others the right of which to be classed as periodicals is doubtful: but in both these cases it has been thought better to include something which may not be a serial rather than to exclude a work which *may* be looked for in a catalogue of periodicals.

Every periodical is entered under the first word (articles only excepted) in the title, and the entries are arranged strictly in alphabetical order. The only exceptions to this rule are the entries commencing with the word 'Mitteilungen' or 'Mittheilungen', in which case the discrepancy in spelling has been ignored. Where the title of a periodical changes, the second and any following titles are entered immediately after the original one, cross-references being made from the later titles to the number under which the periodical is catalogued. Cross-references from the names of editors have been made in those cases where the journal is usually known by the editor's name.

Two kinds of brackets are used in the catalogue: (a) round brackets (), indicating that the information contained between them

is taken either from some later volume in the set or from some part of the earliest volume other than the title-page; and (b) square brackets [], indicating that the information contained between them is supplied by the cataloguer.

The following table explains the method adopted for giving the sizes of the volumes :

<i>Signatures.</i>	<i>Sizes.</i>	<i>Symbol.</i>
In twelves	Under $7\frac{1}{2}$ inches	12°
„	Above $7\frac{1}{2}$ inches	8° or la. 8°
In eights	Under 6 inches	16°
„	From 6 to $7\frac{1}{2}$ inches	sm. 8°
„	From $7\frac{1}{2}$ to 9 inches	8°
„	From 9 to $10\frac{1}{2}$ inches	la. 8°
„	Above $10\frac{1}{2}$ inches	sm. fol. or fol.
In fours	Under 6 inches	12° or 16°
„	From 6 to 9 inches	sm. 4°
„	From 9 to 12 inches	4°
„	Above 12 inches	la. 4°
In twos	Under $13\frac{1}{2}$ inches	sm. fol.
„	From $13\frac{1}{2}$ to 18 inches	fol.
„	Above 18 inches	la. fol.

Broad books with octavo signatures are treated as quartos. In many cases, owing to the volume having been cut down in the binding, it has been difficult to estimate the original size of the page, but wherever possible an allowance has been made for the amount lost in the binding.

The SOCIETY INDEX shows what publications of a particular Society are in the Library. The number after each entry refers to the corresponding number in the main part of the catalogue. An asterisk after the number signifies that the Library set of the periodical is 'In progress'.

This index includes various Government Departments, Universities, Colleges, and similar public bodies.

The SUBJECT INDEX does not contain some of the smaller or less important serials, and is merely intended as a rough guide to the chief periodicals in the various departments of the Library. The method of numerical reference is the same as that in the Society Index.

The periodicals catalogued include those which are received in exchange by the British Association for the Advancement of Science, by the Geologists' Association, and by the Philological Society, whose libraries form part of the College Library.

In compiling this catalogue much valuable information has been obtained from the 'British Museum Catalogue of Printed Books', sections 'Academies' and 'Periodical Publications'. The laborious 'Catalogue of Scientific and Technical Periodicals' by H. C. Bolton, published by the Smithsonian Institution, has also proved a most profitable hunting-ground.

The compilation of the catalogue has been carried out by Mr. L. Newcombe, the Sub-Librarian of the College Library. Mr. W. Bonser, Senior Assistant in the Library, has rendered considerable help during the progress of the catalogue through the press. Thanks are due to Mr. Horace Hart and his staff on the Oxford University Press for the admirable way in which they have performed their share of the work.

R. W. CHAMBERS.

Librarian.

The first section of the report discusses the general situation of the country and the progress of the war. It mentions the military operations and the political events that have taken place since the beginning of the conflict. The author provides a detailed account of the various fronts and the strategies employed by the different sides. The second section is devoted to the economic and social conditions of the country. It describes the impact of the war on the population, the state of the economy, and the measures taken by the government to address these issues. The author also discusses the role of the different social classes and the impact of the war on the daily lives of the people. The third section of the report is a summary of the main findings and conclusions. It highlights the key points of the report and provides a final assessment of the situation. The author concludes that the war has had a profound impact on the country and that the future will depend on the actions taken by the different sides. The report is a comprehensive and detailed study of the situation in the country and provides a valuable source of information for anyone interested in the conflict.

Very truly yours,
