The receipts and payments during the past year are as follows:---

MAINTENANCE ACCOUNT.

The payments made by the different unions for the maintenance of patients have been 8s. 2d. per week; but this has proved to be insufficient to meet the actual expenditure; and the maintenance fund has been decreased by the excess of payments over receipts in every quarter, amounting in the whole to £439 17s. 4d., leaving a working balance of only £18 13s. 1d. in hand.

Your Committee therefore recommend that another penny be added to the daily charge for each patient, making the weekly rate 8s. 9d. or 1s. 3d. daily.

PRINCIPAL AND INTEREST ACCOUNT.

The usual rates of three-farthings in the pound have been levied during the year, and have produced £3,555 3s. 3d. The interest paid has amounted to £1491 1s. 2d., and £2000 of the principal has been discharged, leaving the amount of debt £31,500. On this account there is a balance in the hands of the Treasurer of £786 7s. 11d. Of this balance, however, £359 10s. will be absorbed in the payment of interest falling due before anything for this will be receivable from the rates.

SPECIAL RATE AND REPAIR ACCOUNT.

A rate of one farthing in the pound, amounting to $\pounds 1185$ 1s. 1d., has been received during the year, out of which the balance of $\pounds 258$ 19s. 5d. due to the Treasurer has been paid, and also $\pounds 192$ 19s. 2d. on account of the

current expenses under this head, leaving £733 2s. 6d. in the Treasurer's hands.

FIRST COST ACCOUNT.

The receipts from Unions and Parishes for patients belonging to the county, in excess of the ordinary charges for county patients, and which have been carried to this account, amount to £240 19s. 8d.; and £1000 has been received under the authority of the Sessions, on loan, making with the balance in the Treasurer's hands at the commencement of the year of £1265 2s. 10d., a total of £2506 2s. 6d.

For the additional land purchased of Mr. Sotheron Estcourt £1332 15s. 11d. has been paid; and £987 10s. 8d. has been expended on account of the new buildings; these sums, with other payments amounting to £70 2s. 8d., have nearly exhausted the funds in hand, the present balance in the Treasurer's hands being only £115 13s. 3d.

The Committee have reason to believe that all the works now in progress, including the new building for the reception of patients, the addition to the laundry, the dead house and *post mortem* room, the drying closet, and the gasholder (all of which have been made necessary by the increased number of patients), also the farm buildings, will be completed at a cost of about £1800. The furniture requisite for the patients, before they can occupy the ward, is not included in this aggregate. Of this sum £800 will be required before the next Sessions.

Your Committee therefore recommend that a further loan of $\pounds 2000$ be raised, to enable them to meet these necessary expences.

THE SEWAGE.

The operation of the works for distributing the sewage over the lands of the Asylum continues to be very satisfactory. The experiment referred to in last year's Report of conveying the liquid over a portion of the land lately acquired has been entirely successful, and no doubt remains of its being carried over the whole of them.

CHAPLAIN'S REPORT.

The usual religious offices have been duly performed during the past year. The Chaplain will deliver his own report.

CONDITION AND MANAGEMENT OF THE HOUSE.

The quarterly and monthly reports of the Committee of Visitors, and of the House Committee, record the satisfaction of the inspectors as to the condition and management of the House.

The Commissioners in Lunacy give a favourable report of the superintendence of the whole establishment; and the experience of your Committee is in accordance with these sentiments.

Dr. Thurnam, the Medical Superintendent, will present his own report of the statistics of the Asylum.

The Clerk and Steward will append a minutely detailed account of the whole expenditure of the year.

This report, with these additions, will be in the hands of the magistrates previous to the Lent Sessions.

Signed, G. P. LOWTHER, Chairman.

SIXTEENTH

ANNUAL REPORT

OF THE

MEDICAL SUPERINTENDENT.

The Medical Superintendent now presents his Sixteenth Annual Report as follows :--

During the year there have been admitted 120

Sixteenth Annual Report. Numbers

cases; of which 88 were first admissions, and 32 and Admissions re-admissions. The total numbers under treatment have been 224 cases in men and 308 in women ; total 532. The average number under treatment has been 415.7; as against 402.6 in the preceding year 1865. Numbers. The number in the Asylum at the beginning of the year was 412; there are now under care 426, of whom five however are absent on trial. These figures continue to shew a slow but steady increase in the numbers.

The recoveries during the year have been 46 in Discharges number : which, as against 120 admissions, is at the and Recoveries. rate of 38.3 per cent. The average per centage of recoveries since the opening of the Asylum has been at the rate of 42.1 per cent. The somewhat less favorable result for the present year is fully explained by the very unsatisfactory character of many of the cases admitted. Several were those of aged persons in the last stage of decrepitude ;* a much larger

Average

^{*} In illustration of this, it may be named that on the 19th of June, an old woman, 86 years of age, was sent from the Union House

proportion than usual have been epileptic or paralytic, or otherwise the subject of hopeless disease of the nervous system.

Removals Asylums.

Four cases have been discharged relieved, one to other of the number, a woman, being transferred to the Asylum for her own county of Hants, near Fareham. Seven men have been discharged or removed not improved. Three of the number were idiots or imbeciles, who in the then crowded state of the male wards. were transferred on trial for three months to their friends or to the Union House ; all of whom it has been found practicable to continue under such care. Two others were transferred, by orders of Visitors, to the Asylums for the counties to Unions in which they were respectively chargeable, viz., Lincoln and Somerset. A sixth was the case of a man who had been inadvertently admitted on an insufficient order and medical certificate, and who was directed to be

In connection with the former part of this note, it may be worth referring to the Quarterly Report in which the remark above quoted occurs. After stating that the insane, idiotic and epileptic inmates of the Union House at Chippenham, fifteen in number, in July last, were "all harmless and manageable with a little care and supervision," Dr. Colborne adds, "But I must mention that from the large number of idiots in this House, and from the circumstance of the small number of useful inmates, there is often a difficulty of arranging for the care of those who are temporarily excited or troublesome." Surely it would be an economical as well as expedient arrangement, if Boards of Guardians would, under such circumstances, appoint one or two paid nurses for the Houses under their care, and so prevent the necessity, at least in some cases, for removal to the far more costly treatment of the Asylum.

at Chippenham. The medical officer of that establishment has reported as to this case—"Had we any sufficient nursing staff, this person might have remained here, at least on trial." The poor old crone went on very well in the Asylum for several months, being a source of interest and amusement to the other inmates by her garrulity, until the second week in December, when she slipped down in the dormitory, and fractured the neck of the thigh bone. The result of such an accident at her advanced age is of course were doubtful , but up to the dote of this her advanced age is of course very doubtful; but up to the date of this Report she has gone on well.

discharged by the Commissioners in Lunacy under the provisions of 25 and 26 Vict., c. 111, s. 27. The seventh case was that of a violent and dangerous patient, to all intents and purposes a "Criminal Lunatic," but who, not being under the Secretary of State's order, could not be so regarded and treated. This man was for many reasons a most undesirable inmate; particularly from the Asylum being in part under the visitation of the same magistrates as the neighbouring County Prison, where he had several times been confined. He was, under a special contract, removed to the Asylum at Fisherton, near Salisbury, where he still remains.

There is no change to report in the number of "Criminal the so-called " Criminal Lunatics ;" and there are Lunatics." still four men and one woman in the Asylum under orders of successive Secretaries of State for the Home Department.

There has been a somewhat greater amount of General bodily illness among the patients than usual, partly Health. owing to the enfeebled state of many when brought to the Asylum, and partly to the wet and changeable state of the atmosphere during nearly the whole year. It ought thankfully to be recorded that no attack of epidemic disease has been experienced. The county at large has, indeed, been exempt from cholera during its recent prevalence in this country. The deaths of 24 men and 25 women (total 49), have Deaths and somewhat exceeded those for last year; and the rate of annual mortality, which amounts to 11.7 per cent., is by a slight fraction more than that for the fifteen years since the opening of the Asylum, and which is 11.6 per cent.

Mortality.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.

For 15.35 years-1851-66*	14.9	9.2	11.6

Causes of

Ten of the 49 deaths, viz., 4 men and 6 Death. women, were of persons of 70 years of age and upwards; and of these three were above 80 years of age. The table of causes of death (Table 18) shows the large proportion from cerebral or spinal disease, and the very considerable one from thoracic disease.

Inquests.

Four of the deaths were the subject of inquiry by the Coroner. Two of these were the cases of epileptics found dead in bed, having been suffocated by turning on the pillow, during paroxysms of their Both had been visited by the night disease. attendant within two or three hours of being found dead. In each case a verdict of "Accidental Death by Suffocation" was returned by the jury. A third was the case of a young man, a melancholic, who persisted in refusing to take his food voluntarily, and for this cause was fed by his attendant. This had gone on for some weeks without difficulty, when, in consequence of his resistance, some of the food passed into the trachea, and the poor man died almost instantly from asphyxia, before efficient aid could be rendered. The Coroner's verdict was "Accidental Suffocation from Food in the Windpipe;" the jury expressing an opinion that no blame was attributable to the The fourth, and still more painful case, attendant. was that of an agricultural labourer admitted on the 16th of April, who, on the 19th of May, destroyed himself almost within sight of his attendant, by

* Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1866.

cutting his throat with a reaping hook, which he had cunningly secreted among the bushes near the spot where he was at work with a party of other patients. The poor man had for some days appeared more cheerful, but was still the subject of constant watchfulness on the part of the servants. At the time of the accident he moved behind the shrubs, and the attendant seeing him stoop down, went to him immediately, but found that his throat had been cut from ear to ear, the weapon having just dropped from his hand. The jury returned a verdict of "Suicide by Wound of the Throat under a state of Insanity." The Committee, after making a strict investigation of the circumstances, recorded that they " saw no ground for imputing blame in this melancholy business to any person connected with the Asylum."

There have been nine escapes; two being those Escapes. of the same patient, who on one occasion was recaptured in a few hours in the neighbourhood of Devizes, but on a subsequent attempt made his way as far as Staines in Middlesex, where he was taken to the Union House, and was brought back to the Asylum eleven days after his escape therefrom. Two patients escaped from the gang employed in clearing and levelling the new land, on two successive days. Both reached Melksham or its neighbourhood, and were thence brought back to the Asylum, in each case after an absence of two days. On examination, the House Committee decided that there was sufficient evidence of want of vigilance to justify the infliction of a fine of half a week's wages on each of the outdoor-attendants. In a fourth case, the patient walked to his home in the adjoining village of

Potterne, and was brought back in a few hours. Another succeeded in reaching his home at Purton, twenty-five miles distant, but was recaptured and brought back on the third day, without injury; as were also two others, one of whom had wandered into the woods skirting the Asylum grounds, and the other had strayed without object as far as Tilshead on the Downs, about ten miles off. The rare event of the escape of a female patient must also be noticed. This occurred on the occasion of an open-air tea party held on the cricket ground, on the evening of the 30th May. She had a strong desire to see her child in the Union House at Amesbury, and succeeded in eluding the vigilance of the attendants, and reaching that place, about twenty miles distant. At the end of three days, she was brought back by the police.

Birth of

A female patient, admitted in September, 1865, Child. gave birth to a male child, on the 31st of January, 1866. The mother having recovered satisfactorily, was discharged with her infant on the 6th March.

Additional

Description of the Building.

There has been great and unexpected delay in Male Ward. the completion of the wing for male patients; the shell of which was finished and roofed in at the date of the last Report, a year since. At length the works approach completion ; and the wards being ready for the reception of furniture, they will probably, in part at least, be occupied in the course of a month or two from this time. The general arrangements of this ward correspond with those of the ward for women, erected about eight years since, and described in the Eighth Annual Report of the Medical Superintendent (for 1858, p. 13.) It is however more spacious, and

will afford accommodation for at least 40 patients. The day-room on the ground floor has moreover the advantage of not being a passage-room, as is the case in the corresponding female wing. A complete bathroom and lavatories have been provided; and two convenient verandahs, with seats, are placed against the walls of the building in the two airing-courts on which it opens. The whole will probably be completed for the sum of £2,000, or at an average cost of about £50 per head; which, considering the very advanced prices of labour and material for some years past, cannot be regarded as excessive.

The new cattle shed and yard, in progress when the last Report was presented, have been completed and Yard. and found satisfactory. A strained wire-fence, 210 yards in length, has been erected on the north-west side of the principal pasture and meadow land; being part of that which is under irrigation, and which at certain seasons is grazed on by the cows.

A second large gas-holder, rendered necessary by the extension of the Asylum, has been erected. Works and The laundry has, for the same reason, been enlarged; ments. and one large bay, which nearly doubles the area of the ironing-room, has been added. The drying closets are likewise in course of considerable extension. In order to effect this last object, it has been found necessary to appropriate and convert the deadhouse and post-mortem room, and to erect additional buildings for these purposes on ground immediately adjoining. Most of these works have been satisfactorily accomplished. The last probably will be brought to completion within a few weeks from the present time.

Improve-

Painting of Chapel.

During the summer, the walls of the Chapel were painted, and the seats cleaned and re-varnished. This process involved a longer interruption in the usual services of the Chapel than had been anticipated; and on four successive Sundays two large parties of the patients attended the morning service in the two neighbouring Churches of St. James Southbroom, and Potterne; and their behaviour on all these occasions was most exemplary.

Directions for Bathing.

The directions in regard to bathing which had been originally drawn up by the Superintendent, and placed in writing in the bath-rooms, have been revised, extended, and put into print. Copies in large type, mounted on boards, are now suspended in every bath-room.

There have been no changes in the staff of Attendants, officers ; whose aid in the discharge of his duties has been most important to the Superintendent during his recent indisposition. Among the male attendants, the changes have continued to be rather frequent. The conduct of the attendants and servants has for the most part been satisfactory. One male attendant, who had become generally negligent, and on one occasion absented himself for a whole night without leave, was suspended from his duties by the Superintendent, and his discharge ordered by the Committee.

Weekly

In consequence of the high prices of nearly Charge. all provisions and necessaries, the weekly charge has again been raised, and is now placed by the Committee at 8s. 9d. per week. Even at this advanced rate, the charge at this Asylum is much

Officers. and Servants. lower than in the majority of the County and Borough Asylums.*

In his successive reports, the Medical Super-Moral intendent has of late years very generally refrained Treatment : from any notice of the system pursued in the Retrospect. moral treatment of the patients; in which it has not been found necessary to introduce any material changes. The results of experience have indeed justified a reliance on the methods, now for more than a quarter of a century carried out, here or elsewhere, under the Medical Superintendent's direction. In the application of these principles, as will at once be admitted, prudence, vigilance, and foresight are still as much as ever needed, though the fundamental principles themselves remain the same. To one who, like the Medical Superintendent, can recur to the obstacles and discouragements under which the efforts of his venerated friends Dr. Charlesworth and Dr. Conolly for the amelioration of the treatment of the insaneand on a smaller scale he may add his own-were prosecuted, it is no slight gratification to find that, in our own country at least all this has been entirely changed. In Great Britain and Ireland, and the Colonies, as well as in the United States of America, not a single voice has for long been raised in favour of the harsh and indiscriminating treatment of the insane which prevailed, even in the better managed Asylums, down to the fourth and fifth decenniums of the present

^{*} In the last Report of the Commissioners in Lunacy for 1865, and which was published in the summer of the past year (28th Report, pp. 68-71), the Wilts County Asylum stands sixth in the order of its weekly charge (at that time 7s. 10½d.), in a list of 44 Asylums; beginning with 7s. 6d., and ending with 12s. per week. This is simply stated for information. Different persons will draw different inferences. The question is a too complicated one to be argued in the space of a foot note.

A

century, when it was common to find as many as Retrospect. ten per cent. of the inmates, especially in the female wards,* under the habitual controul of the straitwaistcoat, or of the more disgusting restraintchair. Every one will now be found to concur in the assertion of the Harveian Orator for 1866, that " the best guide to the treatment of lunatics is to be found in the dictates of an enlightened and refined benevolence. And so," continues Dr. Paget, " the progress of science by way of experiment has led men to rules of practice nearer and nearer to the teachings of Christianity. To my eyes, a 'Pauper Lunatic Asylum,' such as may now be seen in our English counties, with its pleasant grounds, its airy and cleanly wards, its many comforts and wise and kindly superintendence, provided for those whose lot it is to bear the double burden of poverty and mental derangement, I say this sight is to me the most blessed manifestation of true civilization which the world can present. This result we owe to the courage and philanthropy of such men as Pinel and Conolly. * * The spirit which animated these two men is the spirit without which much of the progress of practical medicine would have been impossible. For however diverse may be the intellectual powers that find their several fit places in the study and practice of medicine, there is but one right temper for it, that of benevolence and courage. the same temper that has originated and sustained the highest Christian enterprises."

^{*} It is a curious psychological fact that not only was the routine use of restraint in those days more common in the women's wards, but that its abolition was also attended with greater difficulties than in the men's wards. Woman is on all hands allowed to be man's best nurse, but it may be questioned whether, except under the influence of a high sense of duty, she is always as gentle to her sisters in affliction.

In conclusion, the Medical Superintendent repeats Conclusion. the expression of his obligations to the Committee of Visitors for their continued and kind support in the discharge of his duties.

(Signed)

JOHN THURNAM, M.D., Medical Superintendent.

REPORT

OF THE

CHAPLAIN,

To the Chairman and Visitors of the Wilts County Lunatic Asylum.

GENTLEMEN,

In presenting my usual Report, I have to state that the usual Services of the Chapel have been duly performed throughout the past year, with very few necessary interruptions.

My visits to the Wards have been more frequent than during any antecedent year; and the Patients have usually expressed themselves grateful for the attention shewn them.

The singing improves—the Harmonium being a great auxiliary. There are some excellent voices, especially among the female Patients; and although, from the caprice and flightiness necessarily more or less accompanying their unfortunate malady, some uncertainty always exists as to the performance of the choral parts of the Service, they are on the whole better executed, and as I trust more enjoyed by the Patients generally.

I am often spoken to about my Sermons, and the remarks made often evince a lively attention to, and interest in the instruction given.

I have the honor to be, Gentlemen,

Your obedient servant,

B. C. DOWDING, Chaplain.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

"WILTS COUNTY ASYLUM, 12th Feb., 1866.

"This Asylum now contains 164 male and 245 female patients.

"The male wards are full, indeed overcrowded; but in the female division there are vacancies for about 40 patients. The wards now in course of erection on the male side will afford accommodation for about 40 patients; and they are expected to be fit for occupation soon after next Midsummer.

"During our inspection this day, we saw every patient. With few exceptions they were tranquil and orderly; and only one, a woman, was in seclusion. The instances of seclusion reported since our last visit are not numerous; and only one case of restraint for surgical purposes has occurred.

"We have to report very favourably as to the clothing and personal condition of the patients generally; but six of the men and five women wore strong dresses, on account of their destructive propensities. "A very large proportion of the inmates are old, paralytic, and feeble, but only two or three were in bed; and the mortality, since our colleagues' visit in March, has been small. The deaths of 17 male and 12 female patients are recorded. Except in one case, the deaths were all from ordinary causes. The exception was the case of a woman who fractured her thigh bone, and who died from the consequent exhaustion. A coroner's inquest was held, and a verdict of accidental death returned. An inquest was also held on the body of a woman who died from apoplexy, on the day of our colleagues' visit.

"The total number of patients admitted is 96, viz., 43 of the male and 53 of the female sex; and 18 men and 29 women have been discharged, of whom 42 were recovered. Two patients were removed to other Asylums.

"We have made the usual statutory enquiries, and we learn that all the arrangements and the management are the same as before reported.

"The average attendance at Chapel bears about the usual proportion to the whole number of inmates; and from the daily returns it appears that more than half of the patients of each sex are employed.

"The dietary remains the same. The dinner to-day consisted of baked rice, with bread, and half a pint of beer : a meal given only once a week. Suet pudding is given on one day, and there is one soup dinner. On the remaining four days of the week meat is given. Beer is allowed both for dinner and supper. The present staff of attendants consists of eleven men and fifteen women, whose duties are exclusively confined to the wards. There are also two out-door attendants; and in the female division the laundry maids, &c., assist the nurses.

"We are glad to report that a system of night attendance was commenced on the 20th of last September; and in addition to the attendants above named, the services of one attendant and one nurse are now given exclusively to the patients during the night. We have no doubt as to the good results which will follow from this arrangement.

"We have again to recommend that an increase be made in the staff of attendants and nurses. Assistance is especially wanted in the reception and refractory wards in both divisions.

"The wards throughout were remarkably clean and well ventilated, and some of them very comfortably furnished. As respects the refractory wards, however, we have only to repeat the recommendations made in former reports; and the same remark applies to the supply of basons and washstands, and seats in the bed-rooms generally.

"The bedding was very clean ; but the proportion of straw beds is still somewhat large.

"We found that in some instances the shower baths were unlocked, and in most of the bath rooms there were no rules for the guidance of the attendants in bathing the patients. We think that the rules should be printed, and a copy be at all times hung up in each bath room. "We had no complaints from any of the patients, and we are glad again to report that the Asylum is in a very satisfactory state.

> "W. G. CAMPBELL, Commissioners "ROBERT NAIRNE, in Lunacy."
