The receipts and payments during the past year are as follows:--

#### MAINTENANCE ACCOUNT.

In accordance with the Report adopted at the last Hilary Sessions, the rate of payment for the maintenance of patients was increased after the first quarter from 8s. 2d., to 8s. 9d. per week, being an increase of one penny a head per diem; but after the experience of half-a-year it was found that this small addition did not meet the increased expenditure; and during the last quarter, the weekly rate has been raised by another penny a head, to 9s. 4d. The result of the year's working at these various rates has been to provide for the payment of the expenses of maintenance, and to increase the balance in hand from £18 13s. 1d. to £132 Os. 8d., a sum which nevertheless is insufficient to prevent calls upon the Treasurer from time to time for advances to meet the current expenditure. Your Committee therefore recommend the continuance of the higher rate of payment.

#### PRINCIPAL AND INTEREST ACCOUNT.

The rates levied during the year have been three farthings in the pound, and produced £3,555 3s. 3d.; and the following payments have been made:—

	£	S.	d.
Principal paid off	1500	0	0
Interest on debt	1428	3	11
	2928	3	11

The £2,000 borrowed in accordance with the authority of the Quarter Sessions increases the debt by £500, and leaves the unliquidated amount at £32,000.

There is in the Treasurer's hands on this account £1413 7s. 3d., out of which the interest due previous to the Easter Sessions, amounting to £360, has been paid; leaving the balance available for reducing the principal money due.

#### SPECIAL RATE AND REPAIR ACCOUNT.

The expenditure on this head has amounted to £157 6s. 1d., leaving a balance of £575 16s. 5d. applicable for future purposes.

#### FIRST COST ACCOUNT.

The receipts during the year have been £235 10s. in respect of patients, which, added to the £2,000 borrowed, and £115 13s. 3d. the balance of the last year's account, make a total of £2,351 3s. 3d. Out of this sum £1,723 15s. 4d. has been expended in the new buildings, £488 1s. 2d. in the cost of additional furniture, and £124 8s. 3d. in incidental payments on the same account, including £80 which your Committee felt it right to award to the County Surveyor in respect of his great increase of labour in the erection of the new wing to the Asylum and the other additional buildings mentioned in the last Report of your Committee. The balance on this account in the Treasurer's hands is £14 18s. 6d.

#### NEW BUILDINGS.

The additional building for male patients was opened at the end of last March, and the Commissioners in Lunacy have expressed their full approbation of the accommodation thus provided.

In consequence of the extension of the Asylum it has been necessary to enlarge the laundry and to supply additional drying closets, which involved the construction of a new dead-house and post-mortem room.

A second large gas-holder has also been added; and the erection of buildings—with a suitable yard for the accommodation of the dairy cows—has been completed during the year.

The cost of the whole of these works amounted to £3,024 14s. 6d.

They were all designed by Mr. Weaver (the County Surveyor), and executed under his immediate inspection.

#### THE SEWAGE.

It was confidently anticipated, in a former Report, that the water-wheel lately erected for the distribution of the sewage over the Asylum grounds would effect the same object over the land newly added, and your Committee are glad to say that this expectation has been fully realized, and that the sewage may now be driven over the highest parts of the land comprised in the Asylum farm.

### CHAPLAIN'S REPORT.

Morning prayer has been daily said in the Asylum Chapel, and other appointed services duly performed; of which the Chaplain will speak more particularly in his own Report.

In consequence of the increased demand upon his time, from the larger number of patients, your

Committee have added £20 a year to his stipend, making it £120 per annum. The number of deaths during the last year has been 62.

#### CONDITION AND MANAGEMENT OF THE HOUSE.

The Commissioners in Lunacy, in their Report, speak in commendatory terms of the management of the establishment, and the condition of the wards. They offer some suggestions for the consideration of the Committee of Visitors, to which attention has been given.

They also express their fears that Dr. Thurnam's health was suffering; and that a change of air and of scene and occupation was essentially necessary for his restoration to health, and this opinion was confirmed by other eminent London physicians.

Your Committee therefore readily sanctioned the absence of Dr. Thurnam for a few weeks, and they were glad to find that it was productive of very beneficial results, and that he was enabled to resume his duties with health much improved.

During the absence of Dr. Thurnam, the management of the Asylum was placed under the care of Mr. Symes, the Medical Assistant, and your Committee desire to say that this great responsibility was discharged to their entire satisfaction.

The medical statistics, and the details of the management of the Asylum, will appear in the Medical Superintendent's Report.

The Clerk and Steward's report of the expenditure will be given in minute details.

These documents, in conjunction with this Report, will be in course of distribution, and in every Magistrates' hands before the Lent Sessions.

Signed, G. P. LOWTHER, Chairman.

# SEVENTEENTH ANNUAL REPORT

OF THE

### MEDICAL SUPERINTENDENT.

The Medical Superintendent has herewith the pleasure of submitting to the Committee of Visitors his Seventeenth Annual Report, being that for the year 1867.

Seventeenth Annual Report.

In the course of the year there have been admitted into the Asylum 113 cases; of which 23 (being in the usual proportion of about 20 per cent.). were re-admissions. The total number under treatment has been 539, of whom 232 were men and 307 women; being an increase of seven on the numbers for the preceding year. The average number under treatment has been 421.2. compared with 415.7 during the year 1866. number under care at the beginning of the year was 426; there are now only 416 in the house, of whom four are absent on trial. This is the only year since the opening of the Asylum, with the exception of 1859, for which any reduction in the numbers has had to be reported. It is to be observed, however, that the diminution refers chiefly to the male patients, amongst whom the deaths have very much exceeded the average. The

year 1859, it may be noted, was likewise a year of

exceptional mortality for the men; being, indeed,

the highest as yet observed.

Numbers and Admissions.

Average Numbers. Discharges and Recoveries. The recoveries during the year have been 56 in number; in addition to which three cases have been discharged as relieved. One of these last was discharged at the request of the husband, under the provision of the Act, 16 and 17 Vic., c. 97, s. 81. A larger proportion than usual, being as many as 50 per cent., calculated on the admissions, have left the Asylum recovered. The average per centage under this head, for the entire period since the opening of the Asylum, has been 42.4. One patient, being a woman chargeable to a Union in Devonshire, was removed, not improved, to the Asylum at Exminster, in March last.

" Criminal Lunatics." The "Criminal Lunatics" in the Asylum at the beginning of the year, five in number—viz., four men and one woman—were added to by the admission (on the 1st of April), of a female patient. This woman, transferred from the private asylum at Briton Ferry, had been convicted of arson at the Summer Assizes, held at Salisbury in 1865, and sentenced to eighteen months' imprisonment. She was found insane whilst undergoing imprisonment. One of the male patients of this class who had been an inmate for about fifteen years, died from the effects of chronic disease (tubercular peritonitis), in August last.

Act 30 Vict. c. 12. During the year, namely, on the 12th of April, 1867, there passed the Legislature "an Act to amend the Law relating to Criminal Lunatics," (30 Vict., c. 12). By the sixth section, it is enacted that "where the term of punishment awarded to any Criminal Lunatic confined in a County Asylum, or in

any other place of confinement to which patients may be sent, in pursuance of the "Lunatic Asylum Act, 1853," expires before such evidence of his sanity has been given as justifies his being discharged," "he shall thenceforth be deemed to be a pauper lunatic, and shall be in the same position as if he were a Lunatic who immediately previous to the expiration of his term of punishment, had been found wandering at large within the parish or place where the offence was committed, in respect of which he became a Criminal Lunatic." Of the five criminal lunatics (3 men and 2 women) in the Asylum at the date of this Act coming into operation, there was only one who did not in virtue of its provisions become an ordinary pauper patient. The exception is a man "found insane" in 1863, whilst in prison, on the charge of "stealing an ass." This patient remains under the orders of the "Secretary of State," and can only be discharged with his sanction and approval. Under another provision of the Act, those criminal lunatics in the State Asylum at Broadmoor, whose term of punishment has expired, may, by order of the Secretary of State, be remitted to the County Asylum for the place in which the offence was committed. Under this provision one female patient, sent to Broadmoor in 1863, has recently been returned to this Asylum.

Though, happily, no epidemic has prevailed, the general health of the inmates has suffered more than usual. This has been apparently due to the same causes as during the year 1865; when the severe weather and sudden changes of temperature

General Health. Deaths and rate of Mortality.

during many months, exerted an unfavourable influence on the sanitary condition of many of the inmates, enfeebled by age and by exhausting disorders bodily and mental. The deaths of 62 patients (36 men and 26 women), have been more numerous than in any preceding year; both absolutely, and when calculated in reference to the population. The mean annual mortality for the year has reached 14.7 per cent., which is considerably above the average; though on comparing the mortality for the sexes separately, it appears, from an examination of Table 3, that the increase in the death-rate is nearly confined to the male population.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1867	. 21.	10.4	14.7
For 16.35 years—1851-186	7 15.3	9.3	11.8

Causes of Death. Of the 62 deaths, nine were of persons of 70 years of age and upwards; and, inclusive of the preceding 24, of more than 60 years. When the rate of mortality in the Asylum is considered, it must not be forgotten how much larger a proportion of the inmates consists of persons advanced in life; more than one-fifth of the whole (or 20.5 per cent.), having passed their sixtieth year. As to the causes of death, there must be noted the large proportion from cerebral disease—apoplexy, paralysis, \* epilepsy, and other diseases of the brain,—of which altogether there

<sup>\*</sup> The Table shows that during the year there were four deaths from General Paralysis, being about the proportion usually observed in this Asylum. It may be worth while to record here a passage in a letter written by a patient about ten years ago, which is curious, as giving a picture of one variety of this fatal disease as viewed by a shrewd and observing mechanic:—"And you tell Mrs. N——it would have done her heart good to see her husband, how he danced on Christmas night; he was as happy as happy could be, and he longs for New Year's night to have

were 19 cases; and the still larger proportion of thoracic affections—inflammation of the lungs, pulmonary consumption (of which there were as many as nine cases), and old disease of the heart and lungs;—altogether 24 deaths out of the 62. The remaining 19 embrace a variety of cases, the character of which is shown in Table 18.

Five of the deaths were the subject of inquiry the Coroner's jury. Two of these were from Inquests.

by the Coroner's jury. Two of these were from fracture of the neck of the thigh-bone, both in women; the one, 57 years of age, a cripple from spinal disease; the other, aged 87, referred to in the last Report. \* The verdict in both cases was "Accidental Death." In the case of an epileptic, found dead in bed by the Night Attendant, with his face turned on the pillow, and who had previously been twice visited during the night, the verdict of the jury was "Accidental Suffocation during an Epileptic Fit." There was one unfortunate case of the suicide of a man admitted nine months previously, suffering from melancholia with hallucinations and suicidal propensity. He had been very much better for several weeks, and had for some time been engaged in out-door pursuits. On the day of his death he accompanied a party of the patients and

another dance: and he tells me to tell his wife 'how he can dance.' His disease is one that consist in being happy; he is very nervous, but in his right mind; he paddles in the kitchen, and he gets plenty of everything; he is like a child and never out of temper. He tells me to tell his wife he goes to chapel, and has good clothes, good bed, and plenty of everything, and so he have, or I would not say so. He may live years, but he will never be well any more; but he is as well as I have ever seen him; he is very fat, and so are all in the same complaint; and all that I have seen die in the same complaint, die like children in the cradle."—Wilts County Asylum, Dec. 27, 1857,

<sup>\* 16</sup>th Report, p. 9-10; note. The poor old woman, whose case is here referred to, lived on until the 26th of January, when she gradually sank. Some disease of the heart was disclosed by the autopsy.

attendants to the cricket ground, where he watched the game without joining in it; here, as the patients were about to return to their wards, he eluded the eyes of the attendants, and making his way to a bank in the plantation, overhung by trees, there hung himself with his own braces. Though very speedily detected, life was quite extinct. The verdict of the Coroner's jury was "Suicide by hanging while in a state of Insanity." No blame was imputed to any one, either by the jury or the Committee of Visitors, by whom the case was carefully investigated. One result, however, was the adoption of a judicious regulation, the effect of which will be to direct the undivided attention of one or more attendants to those patients who may be lookers-on during cricket or other similar amusements. A fifth inquest was held on the body of a man admitted on the 9th of November, and who died on the 3rd of December following. He was an epileptic and was blind; and when admitted had several scars and sores on his person, which were reported to have resulted from his own violence whilst in the Union House at Malmesbury. In particular, during the week prior to his admission, he was reported to have "knocked himself about a great deal in his excitement." The evening before his death, which was somewhat sudden, he appeared to suffer from difficulty of breathing, and on laying the hand on the chest crepitus and emphysema were both distinguished. He had never made any complaint, or manifested any symptoms leading to a manual examination of the chest. The autopsy disclosed "fractures of all the ribs, from the fourth to the tenth, the fifth alone being firmly united. The sternum was also fractured, and there was considerable

sanious suppuration of the muscles in the neighbourhood of the fractured ribs, with a fistulous communication between the abscess and the middle lobe of the right. lung, which was in an advanced stage of consolidation." The verdict of the jury, in accordance with the medical evidence, was, "Accidental Death, and we are of opinion that the injuries which caused death occurred before the deceased entered the Wilts County Asylum."

There have been eight escapes; of these, four Escapes. men were absent merely for periods varying from halfan-hour to four hours, and reached the adjacent town, or neighbouring villages, without sustaining any injury whilst absent. The individual who was brought back in the course of half-an-hour, managed to denude himself of his clothing; and on being seen in this condition was taken for one of the performers in a Circus then exhibiting on "the Green," and supposed to be clothed in the "fleshings" proper to that profession. One man wandered over the downs as far as Amesbury, but was brought back at the end of four days. Two female patients likewise escaped, and were each absent about twenty-four hours; the one having reached Chippenham, the other Steeple Ashton. In both instances, there was some neglect on the part of servants calling for reprimand. The eighth case was that of a man who escaped on the 17th December, and at the end of ten days was found to have reached the house of a brother-in-law, in London. Owing to the indiscretion of his relatives, his recapture during the time allowed by the Act was not practicable.

In February last, a child was born to a female Birth of Child.

patient, three days only after her admission, on the 18th of that month. The infant went on well, and at the end of six weeks was removed to the Union House at Marlborough. The mother still remains in the Asylum, of which she had previously been an inmate, having been discharged recovered on the 4th January, 1866.

Addition to Asylum. The new ward for male patients, described in the last Report, was completed early in the year, and after a thorough airing during the very inclement weather of the early spring, was opened for the reception of patients on the 28th of March. It was soon in full work, and has proved a great relief to the then crowded male wards.

Additional Works and Improvements. The drying apparatus in the laundry proving quite inadequate to the increasing wants of the establishment, has been extended by the erection of an additional furnace. The clothes-horses, which were of wood, having fallen out of repair, have been replaced by others of galvanized iron. These additions and modifications work well, and have considerably increased the efficiency of the laundry department, during the winter months. Two open tanks in the orchard connected with the liquid sewage have, as a precaution against accidents, been covered in with iron gratings. A strained wire fence is in course of erection on the bank separating the oak-plantation from the cemetery below; which spot was the scene of a melancholic incident already alluded to in this Report.

Officers, Attendants, and Servants. There are no changes to record in the officers of the Establishment; whose duties continue to be very

efficiently discharged. There have however been many changes amongst the attendants, especially in the male department. One man and one woman have been discharged for misconduct; the former, who had proved very unsatisfactory, being discharged summarily, was sufficiently ill-advised to bring an action against the Medical Superintendent in the County Court for a month's wages, in which, it is almost needless to say, he was nonsuited.

As a consequence of the increase in the cost of Weekly provisions, the weekly charge has again been raised from 8s. 9d. to 9s. 4d. The experience of the past half-year shows a profit on this charge; so that, if not susceptible of immediate reduction, it may at least be hoped that the charge may require no further increase for a considerable time to come.

Charge.

The Medical Superintendent must not conclude Conclusion. his Report without reiterating the expression of his thanks for the continued support and encouragement of the Committee of Visitors in the discharge of his duties; and which he trusts his improved health may enable him to continue to their and his own satisfaction.

(Signed),

JOHN THURNAM, M.D., Medical Superintendent.

### REPORT

OF THE

#### CHAPLAIN.

To the Chairman and Visitors of the Wills County Lunatic Asylum.

GENTLEMEN,

As I have before had occasion to notice, the low standard of intelligence prevailing amongst pauper inmates of an Asylum in an agricultural county, will seldom furnish much variety of feature for a Chaplain's Report.

Such simple instances, however, of the blessings of the means of grace as we find amongst poor of the same class not afflicted, are in no wise wanting amongst the insane.

Thus in our own case. The Chapel Services are attended by manywith every symptom of devotion; whilst the conduct of the rest is at least most quiet and orderly.

The singing in particular is much enjoyed by our patients; and, as contributing to the same, I feel bound to mention the praise-worthy efforts of the young man—an attendant in the wards—who plays the Harmonium.

Our number of communicants has slightly increased; and I may mention a touching instance of humility in an aged man during the past year, who interrupted me in the moment of giving him the sacred elements, with the earnest enquiry, "Oh, Sir, if you think me worthy."

I have only further to add that the Chapel Services have been duly performed throughout the past year.

I have the honor to be, Gentlemen, Your obedient servant,

B. C. DOWDING, Chaplain.

#### REPORT

OF THE

## COMMISSIONERS IN LUNACY.

"WILTS COUNTY ASYLUM, 16th May, 1867.

"There are to-day in this Asylum 427 patients, 177 being males and 250 females. The additional wing or ward for male patients having been opened at the end of last March, none of the over-crowding remarked upon at the last visit is now observable; the new accommodation thus provided is of a good kind; and, with some exceptions, presently to be adverted to, we thought the condition of all the inmates very satisfactory. Their clothing generally was good, and in a state showing proper watchfulness on the part of the attendants; and in both divisions there was a marked absence of excitement. The female wards are better furnished than those of the men, and were amply supplied with matters of ornament and amusement as well as comfort; but in the latter particular there is no absolute deficiency in either; and we had pleasure in observing the perfect good order in both, the cleanliness and excellent ventilation.

"From a part of this praise it is still necessary to exempt the wards on both sides (Number 4), in which the worst patients are placed; where we found some in seclusion; and in which, for the most part, there is an absence of everything, furniture, amusements, occupation, whereby it may ordinarily be expected to extend hope of

amendment to the worst. We have the assurance, however, that in regard to reading, &c., things are not so bad at all times as they were at the time of our visit, books being borrowed on occasions from the adjoining wards; but Dr. Thurnam has promised that they shall hereafter be supplied independently, and we trust that it may be found practicable to find some other little in-door amusement for them, to allow them to be taken oftener for walks beyond the Asylum grounds, and ultimately to put some comfortable furniture into their wards. A suggestion made at the last visit has been so far acted upon that the female No. 4 has now practically the advantage of an additional nurse; and that on the male side generally, there are some new pictures and decorations and a little addition to the furniture. The chapel has also, in the same interval, been painted.

"It was satisfactory to us to find that, notwithstanding the pressure before the opening of the new wing, no patients belonging to the County had been refused admission; though since that date there has been an unusual number received. The entire numbers admitted since the 12th February, 1866, have been 160, or 82 males and 78 females; the discharges have been 66, or 33 of each sex, of whom 24 males and 30 females have recovered; and 33 males and 38 females, or 71 altogether, have died. The principal causes of death were disease of the lungs and heart, epilepsy, apoplexy, and general palsy; but in six cases inquests were held, of which the particulars were sent to Whitehall. One was a suicide of a labourer on the farm by means of his reaping-hook; two others were from accidental fractures of the thigh; a fourth was from accidental

suffocation while the patient was resisting being fed; and the remaining two were of epileptics found dead in their beds; no blame whatever, in any of the cases, having been passed upon attendants or nurses.

"Adverting to other points of statutory enquiry, we have to report that, during the last fifteen months, the seclusion has been less than usual, comprizing 42 instances distributed over 32 persons, and that there has been no restraint. The numbers entered as under medical treatment are 24 of each sex. The records of employment shew a total of only 93 among the men and 130 among the women; there being an unusual proportion of the feeble and helpless in both divisions. The attendance at chapel averages a little over 200 of both sexes on Sundays, and about that number on week days; and we hope before long to see the determination taken to build a detached chapel of a larger size, and appropriate the existing one to what is a great want in this Asylum—a recreation hall.

"Among the structural improvements since the last visit, should be mentioned the enlargement of the laundry, and additional drying closets, the construction of a new dead-house and post-mortem room, and the erection of a new cow-shed and cattle-yard; a second large gas-holder has also been erected. And as another consequence of the extension of the Asylum, and of the recommendation urged at the last visit, an additional attendant has been given to each side. We should be glad, if it were found practicable, at the same time to increase the opportunities of exercise beyond the Asylum grounds, as well as the numbers permitted to take part in

them. Not more than a third, and only 'occasionally,' have at present this advantage. We ought to have observed that besides the patients now in the Asylum there are five absent on leave.

"What our colleagues suggested as to the bathrooms has been attended to; and we repeat their
suggestions as to wash-stands and seats in the bedrooms.
Generally we have to say, in conclusion, that the
dormitories were in as excellent order as the day rooms;
and that we regard the present state of the Establishment
as very creditable to its management. Doctor Thurnam's
health has lately suffered from over-application to his
duties; and it is but expressing in another form a desire
for the continued welfare of the Asylum and its inmates,
to hope that such leave of absence as may be necessary
for perfect restoration of his strength, may be afforded
to this efficient officer.

"JOHN FORSTER, Commissioners "ROBERT NAIRNE, in Lunacy."

<sup>\*</sup> Extracted from the returns of the Clerks of the Unions, to the Clerk to the Visitors.

<sup>+</sup> The Unions marked thus + are only partly in the county of Wilts.

Criminal patients, under order of the Secretary of State, at the State Asylum, Broadmoor, or in Private Asylums.

If The City of Salisbury and Borough of Devizes, not having contributed to its erection, are not entitled to send their patients to the County Asylum, unless under special agreement and at a higher rate.

TABLE 21.—Shewing the numbers admitted from the several Unions and Boroughs during the year 1867, and from the opening of the Asylum in 1851.
