PREFACE.

The Buxton mineral water is discharged from several openings in very large quantities, at a temperature of 82 degrees, Fahrenheit. It is charged with nitrogen gas, in, probably, a larger degree than any other mineral water. This gas is presented in water which has, otherwise, alkaline, earthy, and saline properties; and is remarkably detergent and softening to the skin when used as a bath; while it is free from odour or disagreeable taste, is clear and bright in its appearance, and of a singularly beautiful faintly-blue colour.

The medicinal action of the water, whether used as baths, or drunk, has been from time immemorial known to be great, in relieving or curing all conditions of a rheumatic or gouty character. It is stated by Dr. Jones, so long ago as the year 1572, that it was then used for the relief of the same ailments as it is at the present time.

Dr. Jones says, that in his time Buxton was much resorted to by poor afflicted persons; and towards the end of the 16th century, this was considered to be so serious an injury by the inhabitants of the adjoining chapelry of Fairfield, as to render them unable to provide funds for the maintenance of their chaplain, by reason of the urgent and continued claims of the many poor sufferers resorting to the Buxton Baths, as set forth in a petition on this matter addressed by them to Queen Elizabeth. These poor persons had been from time immemorial so far aided, as to have had gratuitous baths of the mineral water provided for them; and there seems to have been a fund called the "Treasury of the Bath," by which their pecuniary necessities were more or less ministered to. Dr. Jones writes, in reference to this fund, what may be quoted in this place:—"If any think this magisterial imposing on people's pockets, let them consider their abilities and the sick poor's necessities, and think whether they do not in idle pastimes throw away in vain, twice

as much yearly; it may entail the blessings of them who are ready to perish upon you, and will afford a pleasant after-reflection. God has given you physic for nothing; let the poor and afflicted (it may be members of Christ) have a little of your money,—it may be the better for your own health; Heaven might have put them in your room and you in theirs; then a supply would have been acceptable to you.”

Beyond this somewhat vague earlier history, there is no record of the Buxton Bath Charity until the year 1785, of which date there is extant at the Hospital, a document (*vide* pages 40-41), apparently an annual report of the Institution, from which time the use of the baths and waters and pecuniary aid had been regularly given to the poor Patients, until the year 1859, when the Devonshire Hospital was provided for the reception of the Patients.

The air of Buxton, resting on the large area of the mountain limestone and millstone grit formations, at an elevation of 1000 feet and upwards above the sea level, must be an important factor in enhancing the health advantages of the situation of the Hospital; and the sanitary position that has been secured by the efficient drainage and sewerage of Buxton, and its conveyance to a distance from the town; and complete chemical defœcation, and the destruction of all remaining refuse in a powerful furnace, must have completed the sanitary advantages, and lessened beyond calculation the risks of zymotic or epidemic disease. The reduction of the yearly death-rate to one or one-and-a-half per cent., as recorded by Mr. Frederick Turner, the Medical Officer of Health, is the well-earned result of the well-devised action of the Buxton Local Board.

It has been gathered from the annual reports that, in the eighteen years, from 1820, 14,906 Patients were admitted to the benefits of the Charity; of which number, 12,608 were discharged as cured or much relieved.

In the twenty following years, from 1838 to 1858, 23,319 Patients were admitted; and of these, 16,575 were cured or much relieved; 5859 were relieved in some degree; and 885 were no better at the time of discharge.

The Devonshire Hospital was opened for the reception of the Patients of the Charity, in the year 1859. It is the successful result of the conversion of a very extensive range of buildings, erected and used as stables since the commencement of the present century. The structure, which is of an important and substantial character, surrounds a parterre of considerable extent, and contains a colonnade of handsome proportions, is situated on a commanding eminence, presenting views of the town and valley of Buxton, and is near to the baths, the railway stations, and the principal buildings. It is curious and interesting, that in what purports to be the first volume of a work, entitled "Les Delices de L'Espagne et du Portugal," dated 1707, plate 495, is an exact representation of the interior area of the Devonshire Hospital. (*See frontispiece.*) The plate is inscribed "Palais des Rois Chrétiens à Granade, vu par dedans, de la Cour." It does appear to be an extreme turn of what we may surely think to be Providential fortune, that such a building should have been used as the design for stables, and the stables have become, little more than half a century after erection, a Hospital for the reception and care of the poor afflicted sufferers, resorting to Buxton for the use of its mineral waters.

From the year 1820, then, to the beginning of September, 1858, when the Hospital was opened, or in 38 years, the Institution had received 38,225 Patients; of which number 35,042 were beneficially treated, and 2183 were very partially if at all relieved. During those 38 years, the Buxton Bath Charity received, on an average, upwards of 1000 Patients every year, and afforded cure or marked relief to 922 of that number. To a very large proportion of this important number of poor sufferers, chiefly from chronic rheumatism, the Charity gave a weekly allowance of 6s. during their stay in Buxton, in addition to all other benefits; until the funds became so seriously impaired, that the weekly money allowance was necessarily reduced to 5s., at which sum it remained until the opening of the Hospital. From the time of reducing the weekly money allowance, the pecuniary prosperity of the Buxton Bath Charity may be dated. The funds accumulated year by year, until the time of rebuilding the Buxton Baths, on the part of the late Duke of Devonshire, when a capital of nearly £3000 had been gathered together by the scrupulous management of the Trustees. The names may be mentioned,

first and particularly, of the late Bishop Spencer, at one time a trustee, and incumbent of Buxton, and more recently one of the Vice-presidents of the Hospital; of Mr. Heacock and Mr. Smithers, its successive Treasurers; and of Sir Charles Scudamore, Mr. Page, Mr. Cumming, Dr. Carstairs, the Rev. R. P. Hull-Brown, and the Rev. the Honourable F. R. Grey, as being no longer alive to witness and take part in the present development of the Charity. Of these £3000, £500 was judiciously expended on the rebuilding of the Charity Natural Baths; the large remaining sum which those Baths cost, and the whole cost of the Hot Baths of the Charity, having been paid by the munificence of the 6th Duke of Devonshire. Again, in 1853-4, when the proposal of a Hospital to receive the Patients of the Institution was brought before the public by Mr. Smithers and the other Trustees, the sum of £1000 from the accumulated fund was given towards the Hospital; leaving a residue of £1500 Consols, which sum remains thus invested. (See Estate Account.)

The history and doings of the Buxton Bath Charity have thus been summarily brought down to the time of forming the Hospital, the expenses of which were defrayed by the individual and collective liberality of the Trustees; by special subscriptions from the public; by the proceeds of a bazaar, that was bountifully supplied and supported, &c.—a total sum of £6000 having been thus got together, and expended on the conversion of this valuable building to hospital purposes. This conversion, with its anxious details and successful results, was mainly due to the untiring exertions of the late Mr. E. W. Wilmot, aided by the architectural skill of Mr. H. Currey, and the liberal consideration of the 6th Duke of Devonshire.

During the years 1851 to 1858-9 the office of Secretary to the Buxton Bath Charity was held by the late Mr. James Wardley; and the Secretarial duty, in connection with the large and liberally-supported Bazaar, was willingly and sedulously performed by Mr. Wardley, until the Hospital was instituted.

It forms an interesting episode in this history, that, in the Winter of 1862-3, during what will be long remembered as the Cotton Famine, a special fund was obtained, chiefly by the exertions of the late Mr. Wilmot; and 100 young women, under 30 years of age, selected by the Relief Committees of their

respective towns, as being most likely to be benefited by the change of air and the comforts of the Hospital, were received and taken care of, as to food and as to medicines, and restored to their homes in the subsequent Spring, with renovated health and strength, and full of gratitude for what they had received. The balance of the subscriptions, amounting, with interest, to £256, was invested as a separate fund for ever, to enable poor female operatives from factory towns to be received into the Hospital.

A very important circumstance in the history of the Hospital is, that the grounds in front of it were, with much kind consideration, made over to the Institution on the part of the late Duke of Devonshire; maintaining the detached position of the building, enhancing its appearance, and adding to the outdoor advantages of the Patients.

The building is the property of His Grace the Duke of Devonshire; and the conversion of it to the use of the Hospital for ever, on the payment of the rent of £5 yearly, was benevolently granted by the 6th Duke of Devonshire, as testified on the stone on the south front of the building, on which is inscribed: "The last munificent Charity of William Spencer, the 6th Duke of Devonshire, K.G., who allowed these buildings to be converted to the use of the sick poor, January, A.D. 1858." This annual payment ceased when the premises were conveyed in legal form, as mentioned below. A considerable sum of money that had been collected for the construction of the Hospital was expended upon the work. The walls and roof of the structure were fortunately found to be in good preservation; the interior was entirely removed and re-arranged; the subsoil carefully taken away; and about two-thirds of the building occupied for the purposes of a Hospital, and by a chaplain's house, a dispensary, and a dispenser's apartments, a house for the master and matron, kitchen, day-rooms, dining-hall, and spacious dormitories; affording separate beds for 120 Patients, in addition to the beds provided for cases of accident, and in addition to the rooms required for the servants of the establishment.

During the year 1868, a legal Conveyance of the buildings and grounds of the Hospital was given to the Trustees by the

late Duke of Devonshire, at the nominal rent of five shillings yearly ; on the condition that they shall be used exclusively for the purposes of the Charity. (A copy of the Conveyance is appended at page 33.)

During the year 1872, the Chaplain's house was converted to the general purposes of the Hospital ; the number of beds for Patients was raised to 150, and better accommodation afforded to the Out-Patients, Dispensary, &c.

During the year 1878, a legal Conveyance of additional buildings and ground was made by the late Duke of Devonshire. This addition was acquired by the Trustees, to enable them to accept a proposed grant from the Cotton Districts Convalescent Fund for the extensions described below. (A copy of this Conveyance will be found at page 35.)

During the same year, 1878, the land and buildings of the Charity Hot Baths were legally conveyed by the late Duke of Devonshire to the Trustees, at the nominal rent of five shillings yearly. (A copy of this Conveyance will be found at page 37.) An undertaking was entered into during the same year, by which the Charity Natural Bath is held by the Trustees under a nominal rent of five shillings yearly.

During the thirty-six years since the Hospital was opened, there have been 64,637 Patients under treatment, of which number 57,570 have been treated beneficially ; and 7357, or about one-ninth of the whole, were not suffering from any of the forms of rheumatism, but were such cases as are ordinarily met with in hospitals. On the average of the thirty-six years, the Patients remained under treatment nearly 24 days ; and 57,280 cases of rheumatism, embracing every conceivable variety of this obstinate disease, were thus extensively relieved by the remedial agency of the Buxton mineral waters.

During the year 1881, the great extension works of the Hospital were practically completed, and the Hospital was formally opened by the Patron, His Grace the late Duke of Devonshire, and the Governors of the Cotton Districts Convalescent Fund, on the 11th of October. The accommodation for the additional number of Patients, under the grant of £24,000 from

the Cotton Districts Convalescent Fund, was obtained by the removal of the two walls which traversed the entire circuit of the main building, and formed the corridor communicating with the various wards ; the whole space from the outside to the inside of the building was thus thrown open, and inner and outer windows supplied to all the wards ; the internal area was thus increased very greatly, and ample space provided for wards and day-rooms to receive and accommodate the 300 Patients. But an independent means of access to all the rooms of the Hospital was rendered necessary in consequence of this arrangement ; and this was obtained by covering the large area of the interior, and giving access to the ground floor rooms from the floor of the inner basement, and to the rooms of the upper floor, from a gallery above this. This arrangement has, however, not only supplied the means of access to all parts of the Hospital, but has enabled all the wards to be practically detached from one another, almost giving the advantages of the deservedly praised pavilion principle of hospital construction ; while it has facilitated the ventilation of the whole building to an important degree, and increased the free and ready admission of light to every part of the interior. The gallery has with much ingenuity been constructed exclusively of bricks and iron, by which it has been rendered entirely fireproof, giving all possible security in the event of fire. The great, covered, dry, warmed area of half-an-acre, canopied by the largest dome that has ever been erected, supplies very obvious and valuable contingent advantages for the recreation of the Patients in all cold or doubtful weather ; advantages which must represent a value to the afflicted and often crippled inmates, beyond any calculation. As the whole of the main building is now devoted to the Patients of the Hospital, new buildings have been erected on the north side, for all purposes that might be desirably detached, such as kitchen and kitchen offices, laundries, engine rooms, cellars, storerooms, bedrooms for household servants, separate wards for accident cases, and rooms for the immediate isolation of any cases of infectious character that might become manifested. The extensions were carried out under the architectural superintendence of Mr. R. R. Duke. The £24,000 expended from the Cotton Districts Convalescent Fund give a prior claim on the 150 additional beds to the nominees of the Fund ; and these beds have been allotted to the

principal Hospitals within the area of the manufacturing districts. It cannot but be a subject of much regret that the extension has cost a larger sum than the grant by not less than £8978 12s. 2d., besides the £5000 paid for the land and premises for the Hospital Extension. It is of evident importance that this outlay should not be left as a charge on the means and resources of the Hospital.

This Prefatory account has seemed to be needful, for the information of those not already acquainted with the nature and merits of this Institution.

W. H. R.

A Clock Tower was erected in 1882, over the principal entrance of the Hospital, by subscriptions specially given for this purpose; the late Duke of Devonshire contributing the sum of £200 thereto, and also presenting a clock, with Cambridge chiming apparatus, and four illuminated dials, at a cost to His Grace of £500. The expense of lighting this clock, during the hours of night, has been kindly undertaken by the Buxton Local Board. It was intended that a portico of architectural character should have been erected as an ornament and protection to the principal entrance; but funds were not forthcoming. Such a completion is evidently desirable, and is commended to the kind consideration of munificent benefactors. It is needful to the architectural completion of the exterior of the Hospital.

A general wish was expressed that the members of the Committee of Management of the Hospital, including the members of the Honorary Medical Staff, as far as possible, past as well as present, should give their photographic portraits, of suitable size, and plainly framed, to be hung on the walls of the Board Room, as an interesting record of the History of the Hospital. This has been successfully obtained, with few exceptions; and it is hoped may be continued in the future, and be of probably increasing interest hereafter.

R E P O R T
OF THE
COMMITTEE OF MANAGEMENT
OF THE
DEVONSHIRE HOSPITAL
AND
BUXTON BATH CHARITY,
FOR THE YEAR 1894.

The losses sustained by the Hospital from the decease of Mr. Philip Le Gros, the Dowager Lady Waterpark, Mr. George Wainwright, J.P., and Mr. George Sharples, have already been notified, with much regret, in the several reports of the Hospital that have been issued, since the last Annual Report. These are now mentioned in this Report, as the most important of the various publications in regard to the work and position of the Hospital.

The Report of the Committee of Management will be thankfully found to confirm, as usual, the continual usefulness, and it may be the probability of increasing usefulness, of this great Hospital, adding, as these buildings have added, during the last thirty-six years, to the value of the ancient Bath Charity, by affording lodgement, and board, and every desirable care and attendance, medical and otherwise, to the Patients of the Charity, which appears to have been in active usefulness to sufferers from rheumatism, and its allied or consequent infirmities, during several previous centuries. Rather more than half of these extensive buildings had been occupied as the Devonshire Hospital, since the month of September, 1858, under the benevolent kindness of the sixth and seventh Dukes of Devonshire; and the whole of the great structure was obtained, in the years 1879-80; and, aided by a munificent grant of £24,000 from the Cotton Districts Convalescent Fund, at the special instance of the late Mr. Edmund Ashworth, was converted into this large, and important Hospital, under the architectural plans and supervision of Mr. R. R. Duke, for which a deep sense of gratitude must be felt, to the successive Dukes of Devonshire, to the representatives of the Cotton Districts Fund, and to the architect; supplying, as it does, separate beds for 300 Patients, with a central covered area, half an acre in extent; giving the large space of warmed and ventilated interior, for recreation, occupation, and exercise; ample day-rooms, all needful contiguous buildings, rooms for Medical Residents, Steward and Matron, Nurses and Servants,

Secretary's Offices, Consulting Rooms, &c. The Hospital is believed to be unique in its structural advantages, for its remedial and restorative purposes; and its commanding site, detached position, and exceptional and extensive views from all its sides, and its terraced walks and shrubberies, cause it to be probably unequalled by any similar Institution. The increased power and usefulness that have been obtained, will have afforded constant gratification to all who have been concerned in supplying so much of the expenditure required, to all who have been occupied in the work of the Hospital; and to those who have sent Patients to the Hospital; and to the Patients themselves, must have given a continual sense of comfort and advantage. The experience of the thirteenth year, since the great extension was practically completed, has more and more confirmed the hopes and expectations of all interested, both as to the powers and opportunities added to the work of this Public Charity, and as to the numbers of Patients receivable, and as to the amount of benefit that may have been obtained.

During the year 1894, 2656 In-Patients have been received. This is a farther increase of 97 beyond the number received during the preceding year, and is a greater number than has ever been received during any previous year. But differences, larger or smaller, year by year, may necessarily be affected by accidental circumstances. It should be realised that, with very few exceptions, nearly all the Patients have their homes in towns and districts at a distance from Buxton, and that the journey to and fro involves outlay, which may place Buxton beyond the means of some deserving sufferers, even when a recommendation will have rendered any other expense unnecessary. A fund that would provide a return railway ticket to necessitous sufferers, or give them the means of transit at a considerable reduction of fares, would be gladly received as a valuable supplement to the Samaritan Fund and work of the Hospital.

The total number of Patients received under the powers of the Cotton Districts Fund, during the year, has been 326. This number is smaller by 89 than were received in the previous year, and still fewer than had been previously received year by year. It need not be said that these reductions in the number of these Patients is much regretted, diminishing so far the amount of benefit to a class of poor working people, for whom the situation of Buxton, and the medical powers of the mineral waters, have evidently rendered resort to the Hospital conclusively and perhaps even exceptionally valuable.

Of the 2656 In-Patients admitted during the year ending December 31st, 1894, the large number of 2447 were discharged as "improved"; 118 as "no better"; ten "by own wish"; six had died in the Hospital; five were found to be "unfit cases"; two were "infested with vermin"; two were "transferred to Out-Patients"; two because "mentally affected"; one was sent away from "intemperance"; one from "breach of rules"; six "left without report"; and 56 remained "on the books" at the end of the year. It is always a remarkable and very thankful record, year after year, how few of these Patients have had to be sent away from the Hospital without noteworthy benefit, after the residence of three weeks or upwards. Some of the benefit, in all reasonable probability, must be referred to change of air and scene and

social circumstances, the removal to this large and sanitary building, with all the valuable concomitants of good food and medical care, and the possible and probable removal from less sanitary homes, and perhaps from multiplied mental anxieties and bodily privations. But the experience of long periods of time has proved to demonstration, that the main factor in the benefit derived has been the medicinal effect on rheumatic conditions, general and local, of the mineral water of Buxton, happily in connection with the upland and dry air of the extensive district of mountain limestone and millstone grit formations. This valuable effect has been shewn by Mr. Haviland, M.R.C.S., to have been increased by the position of the valleys of the Buxton District, causing them to be traversed by the prevailing westerly winds. In connection with the value of Buxton and its Hospital, it is interesting to have ascertained that the anxious form of arthritic disease, rheumatoid arthritis, or deforming rheumatism, is found to be greatly benefitted if received before the destruction of the affected tissues, and that advancement has been checked when the Patients have been sent to the Hospital year after year.

The number of the Out-Patients admitted during the year has been 197. Of these, 149 have been discharged as "improved;" seven as "no better;" three "became In-Patients;" 34 "left without report;" and four remained on the books at the end of the year. It has to be urged, with respectful reiteration, that the subscribers should charge themselves with the duty of lessening the complaint that so many of the Out-Patients leave without reporting the result. The Out-Patients are for the most part those who have been unable to obtain In-Patients' recommendations; but they sometimes include Patients of a different social class, who may not need the provision of board and lodging in the Hospital, and yet whose needy circumstances deserve every kindly consideration.

It was a frequent subject of regret during the earlier years of the existence of the Hospital, that no report seemed to be obtainable as to what might be taken as the final result of the Hospital treatment; and during the last twenty-one years, a form, printed on a post card, has been given to every In-Patient on leaving the Hospital, to be filled up and returned six weeks after having been discharged. During the twenty-one years, 34,767 of these cards have been received, and 25,344 are reported as improved; 9308 as no better; and 125 as having died during this short period after discharge. The long duration, the chronic character, and the severity of a very large number of these cases must be borne in mind, in estimating the value of this record; it is evident that it may be imperfect at the best; and the inferences from it may be more or less uncertain: any remaining lameness or disability would probably influence the report adversely; as would any more salient interference with health or strength, notwithstanding any amount of general improvement, constitutional or otherwise. The number of deaths thus recorded, within so few weeks after having left the Hospital, indicates the grave nature of many of the cases. But, taking all the circumstances into consideration, as to the probable chronic condition, and as to the failure of previous treatment, it must be held that the returns thus reported are remarkable and satisfactory, beyond any reasonable expectations that could have been formed. The post cards received during 1894 are equally conclusive; 2247 post cards

have been received during the year; and of these 1705 are stated to have "improved;" 535 to be "no better;" and seven "to have died." Such results may be left to speak for themselves.

The average number of Patients daily in the Hospital during the year has been 169. The number in the Hospital has, as usual, varied considerably during the several months of the year. The number of beds occupied during January was only 52·5; during February, only 77·4; during March, 116·6; during April, 197·4; during May, 254·1; during June, 241·5; during July, 255·1; during August, 257·6; during September, 251·5; during October, 166·8; during November, only 84·1; during December, only 67·4.

The average cost per week of each Patient, during the past year, has been 13s. 11d., or practically the same as the cost of the previous year. The average cost per Patient for three weeks, the necessarily restricted term of the recommendation, has been £2 1s. 9d. It has been frequently urged by well-meaning friends that the cost should be more and more reduced. It has been said, from time to time, that the Patients ought to be put upon a regular, and perhaps restricted dietary. But it has been uniformly held, on the other hand, ever since the Hospital was established, that a practically unrestricted allowance of food, and more particularly of animal food, of course without avoidable waste, is a very important means of securing the most restorative and curative results. It is well known to those concerned in receiving the Patients, that they commonly arrive in an enfeebled condition. This would be expected from their usual immediate antecedents. They will, for the most part, have been ailing during many weeks or months; they may have been unable to work, and depressed in mind, and more or less restricted, or perhaps stinted as to food; they may have been racked with pain and worn with the difficulties of moving about; and may perhaps have suffered from the comparatively close atmosphere of the home, or of the densely peopled district from which they may have come. But, however caused, the depressed condition of health and strength is usually in evidence; and restored strength must be a valuable auxiliary in obtaining relief from disease or its consequences. In considering the often mooted question of cost, the need of the staff of nurses employed causes an important yearly outlay; and it is found that, independently of its charitable and necessary work, the necessity of ministering to cases of severe accidents, in connection with the railway and quarrying undertakings of the district, has required more nurses, and this outlay may be expected to increase. But in addition to the expenditure on food, medicines, salaries, nurses, &c., the Hospital baths involve a large yearly outlay, beyond what used to obtain when this was mainly done by the kind consideration and at the expense of the former Dukes of Devonshire. The outlay of the past year thus occasioned has amounted to £360 19s. 7d. This is a large but unavoidable expenditure, evidently required by a great bathing charity, which derives so much of its curative results from the use of the Mineral Waters; but neither this, nor the drug bill, nor the cost of the Medical Residents, nor any other item of expenditure incident to the work of the Hospital must be lost sight of, in estimating the outlay of the Institution.

In reference to the Surgical work that has been thrown on the Hospital and its Staff, both honorary and resident, during the past

year, there have been injuries to hand, lacerated wound of foot, concussion and head injury, burns and injuries from explosion, compound fracture of skull, fracture of ribs with injury to lung, fracture of clavicle, fracture of femur, fracture of tibia, fracture of fibula, fracture of tibia and fibula, compound fracture of tibia and fibula, and fracture of os calcis, requiring, it need hardly be said, immediate and full attention; and in which the Hospital will have not only succeeded in affording incalculable relief to indescribable suffering, but almost certainly in saving some of the lives.

It has to be thankfully stated, that the financial position of the Hospital, on the whole, has been satisfactorily maintained. The receipts from the Annual Subscriptions have been more by £12 15s. 6d.; from the Casual Subscriptions, those received for Patients recommended by non-Subscribers, have been more by £188 6s. 1d.; the receipts from the Governors of the Cotton Districts Convalescent Fund have been less by £158 3s. 7d.; the receipts from donations have been more by £57 5s. 1d.; the donations received per Hotels and Lodging-houses of Buxton have been less by £15 19s. 11d.; the amount received from Offertories and Collections in Churches and Chapels has been more by £4 13s. 7d.; the receipts for extra time, beyond the necessary limit of the recommendation, have been more by £35 12s. 6d.; the receipts for extra Out-Patients have been more by £5 2s. On the whole the total receipts have been greater than the total expenditure by £487 2s. 3d., which sum, it is proposed, to invest, as usual, with the Life Subscriptions, amounting to £147, received during the year.

His Grace the Duke of Portland has generously contributed a donation of £50 from the sum received from visitors to Welbeck Abbey. £40 have been received by the kind influence and exertions of Miss Hyde, as the proceeds of a sale of work, which was publicly held in the Town Hall of Buxton. £16 10s. have been received from Mr. Pollock, R.A.M., conductor of the Pavilion Orchestra, obtained by the kind exertions of the members of the Orchestra, assisted by Miss Maggie Jacques. Mrs. Eliza Robinson has given a donation of £20. And £10 have been received from the kindness of Mrs. Turnbull, a former resident in Buxton, and one of the original promoters of the Hospital.

The total sum received through Offertories and Collections in Churches and Chapels has been £177 16s. 6d. Offertories have only been granted during recent years in the Buxton Churches on one Sunday in the year, in place of three Sundays which had been granted previously. Those from St. John's and St. James' Churches, Buxton, have amounted to £110 16s. 11d. The preachers on the Sunday in question were the Venerable the Archdeacon of Derby; the Rev. C. C. Nation, M.A.; the Rev. G. Craggs, M.A.; and the Rev. J. Bryan Allen, M.A.

The Clergy and Ministers who granted the use of their Churches and Chapels, or pleaded the cause of the Hospital from their several pulpits, were, the Rev. S. C. Sarjant, M.A., the Rev. A. E. Burdekin, M.A., at Burbage Church; the Rev. C. S. Green at Trinity Church; the Rev. J. T. Watts, and the Rev. A. Roberts at Devonshire Park and Wesley Chapels; the Rev. R. Harley, M.A., F.R.S., at the Congregational Church; the Rev. J. T. Hoeben at St. Ann's Catholic Church; the Rev. R. Cowley Smith at the Unitarian Church; and the Honorary Chaplain

held a Tent Service and Offertory in aid of the Hospital. Offertories and Collections were also received from Harpur Hill Church, Barkestone and Plungar Church, Ashford Church, New Mills Church, Bottesford Church, Over Tabley Church, Cavendish Bridge School Room, Buxton Primitive Methodist Chapel, and Buxton Catholic Apostolic Church.

Dr. Robertson has again been unanimously re-elected Chairman of the Board of Trustees and Committee of Management.

The Sheffield and Rotherham Joint Stock Banking Company have again been unanimously re-elected Treasurers of the Hospital.

The Chairman is *ex-officio* a member of the House Committee, and Mr. Duke, Mr. Walton, Dr. Dickson, Mr. G. F. Barnard, Mr. Josiah Taylor, Mr. E. C. Milligan, and Mr. J. H. Orme, have again been unanimously re-elected members of this Committee; and Mr. F. Turner and Mr. T. H. Lowthian have been elected to fill the vacancies occasioned by the decease of Mr. Le Gros and Mr. Wainwright.

Mr. A. Schofield and Messrs. Halliday, Pearson, and Co., F.C.A., have been unanimously re-appointed auditors.

The thanks of the Committee are hereby tendered to the Proprietors of the Hotels, Boarding-Houses, and Lodging-Houses, of Buxton, and also to the Presidents of the public dinner tables of the several Hotels and Boarding-Houses, and also to the managers and attendants, and to all who have in any way exerted themselves to obtain support for the Hospital. The powers of the Institution used to depend almost entirely upon these exertions. The interests of Buxton are so greatly promoted by the prosperity and usefulness of the Hospital, that the claims of the Institution are urged upon the inhabitants, as being identical with the interests of the town.

The thanks of the Committee are hereby tendered to the Chairman and Members of the Buxton Local Board, for permission to place conspicuously, in the St. Ann's Well, a newspaper box in aid of the Hospital.

The thanks of the Committee are hereby tendered to the Chairman and Directors of the Palace Hotel Company, for permission to place conspicuously in the entrance hall of the hotel, a donation box in aid of the Hospital.

The thanks of the Committee are hereby tendered to the Chairman and Directors of the Buxton Gardens Company, for permission to place conspicuously, in the entrance to the Pavilion, a donation box and newspaper box in aid of the Hospital.

The thanks of the Committee are hereby tendered to all proprietors of newspapers, in which the annual reports, quarterly reports, weekly reports, and meteorological reports, are inserted or noticed. It is obvious that in no way can the interests of the Charity be more kindly or effectually promoted.

The thanks of the Committee are hereby tendered to the ladies and gentlemen who have acted as visitors to the Hospital, during the several months of the year. The value of such services may be

obviously very important. It is earnestly wished that it may be increasingly felt, that these official visits should be as frequent as possible, and that the visits should not be of merely formal character, but that details should be diligently inquired into, and suggestions and remarks should be entered in the book kept for this purpose.

The thanks of the Committee are hereby tendered to the members of the Honorary Medical Staff, and to the Dental Surgeon, for their gratuitous services to the Hospital. Any adequate pecuniary compensation for these services must be always beyond the means of the Institution, and probably would not be received from the Charity if it could be offered.

The thanks of the Committee are hereby tendered to the Medical Residents, for undertaking the important meteorological duties of the Hospital, and for their assiduous attention to the duties of the Hospital.

The thanks of the Committee are hereby tendered to the Honorary Chaplain of the Hospital, the Rev. Joseph Eayrs, Vicar of Fairfield.

It should be noticed that the Annual Meeting of Subscribers will be held on the first Saturday in May, at half-past three o'clock in the afternoon.

Statements are submitted of the Revenue Account for the year ending December 31st, 1894; and also of the Estate Account, and general Balance Sheet; together with the Annual Statement of the Wilmot Relief Fund Account.

There is a nucleus for a Samaritan Fund, kindly and chiefly contributed by the late Mr. Frederick Cooper, Inspector-General of Hospitals. This small fund has been aided, from time to time, by kind and thoughtful contributions by other friends and benefactors. The fund is used for the relief of urgent cases of distress, on their discharge from the Hospital; the interest being available at the discretion of the officials, under the direction of the House Committee. During the past year, £12 1s. 5d. have been given as required, to upwards of 40 apparently most necessitous Patients; and £7 10s. 4d. of these sums have been returned to the Hospital by the friends of the Patients. Contributions to this fund are, again and again, earnestly solicited. The Statement of Accounts for the past year is submitted.

It is gratifying to state that Miss Vernon Wentworth, Mrs. Naylor, Mrs. T. Smith, Mrs. Craik, Mrs. Machin, Mrs. Parkin, Mrs. Paton, Miss Moore, Miss Bailey, Miss Osmond, and other ladies and gentlemen have most kindly sent clothing of various kinds, woollen articles, &c., for the use of the Patients; and also that Mr. J. Coulthurst has presented twenty couples of rabbits; Mr. Boam, a pair of crutches; Miss Taylor, one bottle of brandy; a quantity of meat juice from Messrs. Valentine; a case of Frame Foods from the Frame Foods Company, Limited; Messrs. Raphael Tuck and Sons have presented four large sample cases of Christmas cards and other beautiful artistic productions; Christmas letters and pictures from Mrs. Eayrs and other ladies; presents of fruit and flowers have been received from the Harvest Festivals at the Buxton, Burbage, Fairfield, Dove Holes, Monyash, and Brierley Green Churches; and from the Congregational Church, Fairfield Wesleyan Chapel, and from Mr. Wild and Mrs. Waite Brown. Books, papers,

illustrated magazines, &c., have been contributed by the Duchess of Portland, Mrs. Craik, Mrs. Higson, Miss Trimmer, the Misses Burroughes, Mrs. Naylor, Miss Moore, Mrs. T. Smith, the Misses Williamson, Miss Wilson, Miss Taylor, Mrs. Strahan, Mrs. Parkin, Miss Jacques, Mrs. Eversfield, Mrs. Shipton, Mrs. Bowden, Mrs. Fernley, Mrs. Beckett, Mrs. Pollock, Mrs. Wild, Mrs. Bridges, Mrs. Whiteley, Mrs. Bright, Miss Milner, Mrs. Robertson, Mrs. Underdown, Mr. Stow-Stowell, Mr. R. Wright, Rev. R. Rew, Mr. J. Clarke, Mr. D. Johnston, Mr. James Henderson, Mr. Smilter, Mr. Nuttall, Mr. J. Oram, Rev. Newman Hall, Mr. Spiller, and the Committee of the Union Club, Buxton.

The men's day-room has always been used for morning and evening prayer, and more or less for other religious services. These services are conducted by the Chaplain, or under his kindly sanction, and include a special service for the Patients on Sunday. In the absence of the Chaplain, the services are given with much kindness by other friends, and they are very gratefully mentioned, and are believed to be much valued by the Patients. Entertainments are occasionally given in the women's day-room, when Patients are enlivened with music, &c., by various kind friends, whose cheering work must bless equally both those who receive and those who give. It is always a gratifying remembrance that the women's day-room contains the admirable Broadwood pianoforte that was presented to the Hospital when quite new, for the use of the Patients, and also that the men's day-room contains the excellent American organ, also presented for the use of the Patients, and which is necessarily of much value, more particularly in the religious services. It must be a pleasure to Subscribers living at a distance to learn, that the Inmates of the Hospital are thus gladdened and brightened by an active and continuous kindness and sympathy.

Subjoined is the Medical Report of the Hospital for the year 1894, which has been prepared from the case-books by the Medical Residents, and must be of interest to all the Subscribers, and may be a guide to Medical men when called upon to sign the medical certificates, which are required, in addition to the recommendation of the Subscriber, before a Patient is admitted to the Hospital. The Report illustrates, as usual, to a very interesting and conclusive degree the curative value of the Buxton mineral water; more especially in the relief of most cases of rheumatic, arthritic, or gouty character, and so far explains the signal amount of benefit that is generally derived by the Patients from the Hospital, and the comparatively few failures, as shewn in the annual and quarterly reports, during so many successive years. It is shewn that of the 2656 cases under treatment in the Hospital in the last year 2357 were cases of rheumatic or gouty character, 467 of these cases were complicated with some form or degree of heart-disease. The proportion of these rheumatic cases, thus complicated with morbid condition of the heart, is a remarkable feature of these Hospital Reports, indicating clearly the absolute necessity of painstaking and skilful diagnosis, and the most careful regard as to the use, or the avoidance of the use, of the mineral water, and as to the general treatment and management of the cases. The indebtedness of the Hospital to the members of the Medical Staff, both Honorary and Resident, is thus indicated; and the curative results, and the

comparatively small number of failures, and still more, the very small number of fatalities, must be referred to medical accuracy in the use of the stethoscope, and of the other diagnostic "instruments of precision," with which the advanced science of medicine has supplied the medical profession. The Report again demonstrates, very conclusively, how far the Devonshire Hospital is removed from being a mere convalescent hospital, and how great and thorough the medical work is which it is called upon to do. The results are justifiably regarded as affording absolute proof of the value of scientific medicine, and the comparative hazard of all treatment not based upon ascertained conditions. It is true that the Patients of the Hospital are only exceptionally bed-ridden, but a large number of them are in a condition of what may be well called medical anxiety. Such an Institution must always have its adequate complement of Medical Residents, available for any important occasion that may happen, and also an adequate staff of Trained Nurses, that may give immediate help, at all times, and whenever needed.

An interesting inquiry was made, by special request, as to the proportion of the Patients of the Hospital by whom the Baths of the Buxton Mineral Water has been used. It was gratifying to find, as extracted from the Hospital records on the occasion in question, that eight out of every nine Patients had used the Baths; and that of the remaining ninth, one-third were more or less advanced pulmonary cases, and the remainder were cases of accident, fractures, capital operations, and general disease. And again, more recently, the same inquiry has been instituted, with as nearly as possible the same result. The amount of absorption of Mineral Waters during bathing has always been an interesting question. But gases are confessedly especially absorbable during immersion, which illustrates and confirms the value of the Buxton Mineral Water Baths.

The issue of the Medical Statistical Report for the third year, deserves full recognition and thanks. It has been prepared by the Medical Residents, and supplies detailed statistics as to the cases of rheumatism, rheumatoid arthritis, gout, and sciatica, admitted during the year 1894. Such statistics have been found to be generally wanting in the medical history of these diseases; and it is hoped that this endeavour to supply them, from the very large experience of the Devonshire Hospital, may meet an important desire, and be gratefully received and used by the medical profession, and that by their multiplication in successive years, they may become more and more conclusively authoritative. Self-originated and carried out by the Medical Residents, they deserve every thankful consideration.

At the Annual Meeting of the Committee of Management, held at the Hospital, on Saturday, January 5th, 1895, the Report was adopted, and it was moved by Mr. J. Parlane, seconded by the Rev. C. C. Nation, and resolved unanimously, that the thanks of the Trustees and Committee of Management be given to the Chairman (Dr. Robertson), for the Annual Report, for his assiduous attention to the interests of the Hospital, and for his kindness in consenting to re-election as Chairman; and that the Report be printed, with the Treasurers' Accounts, &c., and circulated amongst the Subscribers and Supporters of the Institution.

COPY OF REPORT OF THE CHARITY,
FOR THE YEAR 1785.

*The Original is in the Hospital, and was presented by Dr. Robertson,
December 29th, 1871.*

BUXTON.

RESOLUTIONS by the Stewards of the several Houses at Buxton, on behalf of the Contributors to the Charitable Fund established here, for the better regulation of the Charity, made September 13th, 1785.

1st. As to the Contribution.

WHEREAS, at the commencement of this Charity, in the year 1779, instituted for the purpose of rendering the Beneficence of the Noble Proprietor and his Ancestors (in setting apart a Bath for the Use of the Poor) more extensively beneficial; two Stewards were appointed in each House kept open for the Reception of Company to receive a Contribution of One Shilling only, from each Person residing in such Houses, for the Benefit of the Charity. And upon the Departure of one of the Stewards, the departing Steward hath nominated a Successor; and in order to ascertain the Sums contributed, the Stewards for the Time being, at each House, have kept a Subscription Book, in which the Contributors have respectively written their Names and the sum of One Shilling opposite thereto; and as the Subscriptions have amounted to competent Sums, the Stewards have paid over the same to Mr. Samuel Buxton, Apothecary, in Buxton, as Treasurer, to be applied by him towards the Aid and Support of the Poor, whose Infirmities have caused them to come to Buxton for the Use of the Waters; for which Sums the said Mr. Buxton hath signed Receipts in the Subscription Books. Resolved that such practice be continued, and that no Person be permitted to subscribe a greater Sum than One Shilling in the books; and that the Receipts of Mr. Buxton, or the Treasurer for the time being, in the Subscription Books, be sufficient Discharges to the Stewards for what they receive.

Resolved, That it be recommended to future Stewards to hold an Audit on the 13th of September, yearly, to inspect the Accounts of Mr. Buxton, or of the Treasurer for the Time being, and to state Accounts of the preceding Year in like manner as the Accounts are this Day stated in the Subscription Book at the Hall. And it is declared, that the Allowance of a Duplicate of the Account by any two of the Stewards, under their hands, shall be a sufficient discharge to Mr. Buxton, and all future Treasurers.

Resolved, That all future contributors to the Charity do subscribe thereto upon the terms of these Resolutions.

2nd. As to the Admission of the Objects of this Charity.

Resolved, That no Inhabitant of Buxton, Fairfield, or of any place within Seven Miles distance from Buxton, be admitted to partake of the Charity; nor any Person be relieved during the months of November, December, January, February, March, or April; and that during the remaining six Months of the Year, not more than sixteen Objects, at one Time, be relieved by the Charity. And that no

Person shall be admitted on any other Day than Monday in every Week, between the Hours of eight and twelve in the Forenoon; on which Day, during such Hours, the weekly allowance to each Individual shall also be paid.

Resolved, That before the patient intending to take the benefit of the Charity be removed from where he or she dwells, Mr. Buxton, or the Treasurer for the Time being, be applied to by Letter, Postpaid, signifying such Intention, mentioning the Patient's Name, Place of Abode, and Nature of the Disorder; and that no Person be admitted unless there be a vacancy in the Number of Sixteen, and unless he or she first produces to the Treasurer his own Letter written in answer to such Application, and also a Letter of Recommendation from some Lady or Gentleman, resident in the Neighbourhood, certifying whether the Patient is relieved by his or her Parish, or not, and if not, whether he or she is a proper Object, with Respect to Circumstances; and in case he or she is a Pauper, relieved by the Parish, then also a Certificate signed by the Churchwardens or Overseers of the Poor, that the Pauper's Settlement is in the Parish from which he or she is sent; and also a Certificate from a Physician or Apothecary, that the case is proper for the Buxton Waters

Resolved, That the Names and Places of Abode of the Objects admitted, be entered by Mr. Buxton, or the Treasurer for the Time being, in a Book (of which Book each Contributor is to have free Inspection), with a Description of the Patient's Disorder; and after his or her Discharge a Minute of the Consequence of the Use of the Waters.

3rd. As to the Application of the Charity Fund.

It being the Intention of the Contributors, that the Money arising from the Contributions, be in every Case applied for the purposes of supplying the Patients during their Stay at Buxton, with Board, Lodging, and Medicines only; all Ladies and Gentlemen recommending Patients, and all Churchwardens and Overseers giving Certificates, are therefore particularly desired to take notice, that in Case the Patients shall be admitted to partake of the Charity, and shall die in the Parishes of Buxton or Fairfield, or in any Place within seven Miles Distance from Buxton, before he or she shall have actually returned to his or her own Parish, such Persons recommending, and such Churchwardens and Overseers certifying, shall be liable to pay the Expenses of the Funeral of such Patients respectively; and that the Charity Money, on no Account whatever, will be suffered to be applied to defray Travelling Expenses, either to or from Buxton.

Resolved, That no Patient be admitted more than once during a Season, nor be relieved, by the Charity, for a longer space of time than five Weeks, from the Date of his or her Admission, nor with a greater Sum than Six Shillings each Week. But for how long a Time he or she shall be relieved less than five Weeks, or what allowance shall be made him or her less than Six Shillings per Week, shall be at the discretion of Mr. Buxton, or of the Treasurer for the Time being, taking the advice of the resident Physician, or Physicians, on the Case, who it is hoped, will kindly consent to give gratuitous Assistance, when necessary.

Resolved, That Mr. Buxton, or the Treasurer for the Time being, be at liberty to retain all his necessary Expenses, occasioned by the Administration of the Charity, over and above what shall be expended in Board, Lodging, and Medicines.

Resolved, That if any Object receiving the Benefit of this Charity, shall beg or receive Alms, during his or her stay at Buxton, or be guilty of prophane Swearing, Drunkenness, Impertinence, or any gross misbehaviour, he or she shall be instantly (on complaint made) discharged from the Charity.

Ordered, That these Resolutions be printed, and hung up in as public a manner as possible, in the several Houses in Buxton, kept open for the Reception of Company, and wherever Contributions are received; and that the said Resolutions be sent by Mr. Buxton, or the Treasurer for the Time being, to every Person recommending a Patient, as a proper Object to partake of the Benefit of this Charity.

He shall devote the whole of his time to the duties of the Hospital. He shall scrupulously attend to the orders, and promptly make up the prescriptions of the Medical Officers, and shall be generally responsible for the accuracy and regularity with which the medicines ordered are provided for the patients. He shall have the charge of, and be responsible for, the Dispensary and its contents. Unless under an emergency, he shall order all drugs, &c., from wholesale druggists, through and with the sanction of the House Committee. When not engaged in the duties of his department, he shall be expected to co-operate with the House Surgeon in the medical duties of the Hospital. He shall be generally subject to the rules and regulations applicable to the House Surgeon. He shall be required to enter into an engagement under a penalty not to practice or assist in the practice of medicine or surgery in Buxton, or within a radius of two miles from the Hospital, for a period of three years after he has ceased to hold the office of Assistant House Surgeon.

Auditors.

68.—The Auditors, not being members of the Committee of Management, shall examine the Annual Statement of the Treasurer's Accounts, previous to its being presented to the Committee of Management, and for this purpose all books and vouchers relating to the accounts shall be open to them, and on their being satisfied as to the correctness of the accounts, the signature of each Auditor shall be appended to the said statement. The honorary fee of £2 10s. only, to be paid to each Auditor.

Honorary Dental Surgeon.

69.—A Dental Surgeon may be appointed by the Committee of Management, subject to three months' notice on either side to terminate the engagement.

70.—He shall be a registered Licentiate in Dental Surgery of the Royal College of Surgeons of England, Ireland, or Edinburgh, or of the Faculty of Physicians and Surgeons, Glasgow.

71.—He shall attend at the Hospital at least once every week, on such day and at such hour as the Committee of Management or House Committee may arrange with him, and at such other times as his services may be required; and shall, upon emergency, receive for treatment, at his own residence, any Hospital Patient sent to him by the Medical Officers of the Institution.

Extracts from the Rules and Regulations for Patients.

- 1.—An In-Patient will be entitled to Board, Lodging, Medical Advice, Medicines, and Baths, for three weeks; should an extension of time be advised by the Medical Officers, the Patient may remain on payment of 17s. 6d. per week.
- 2.—An Out-Patient will be entitled to Medical Advice, Medicines, and Baths, for three weeks; but the Medical Officers will attend these Patients only at the Hospital at the appointed days and hours.

No Patient shall be allowed to remain on the Books of the Institution longer than six weeks at one time without special permission signed by at least two-thirds of the Medical Staff of the Hospital; and any Patient who has been on the books six weeks in any consecutive six months, shall not be re-admitted within six months from the date of discharge without such permission.

- 3.—All Applicants for admission, either as In or Out-Patients, will be required to produce a recommendation, signed by a subscriber, and countersigned by the officiating minister, churchwarden, or some other parochial officer, or respectable inhabitant of the place from which they come, certifying that they are fit objects of charity, and unable to pay for themselves.

N.B.—Particular attention is directed to this rule, as it is much feared many have been admitted who were not fit objects for any Charity.

- 4.—The Medical Staff are authorised to refuse admittance to, or discharge, any Patients they consider unfit objects of the Charity; such refusal, or dismissal, to be signed by at least two of their number.
- 5.—Every In-Patient will be required to bring a proper change of clean body linen, and will have to pay for his, or her, own washing out of the Hospital; and to deposit one shilling upon receiving the key of the clothes box appropriated to his or her use; this deposit will be returned to the Patient upon giving up the key. Out-Patients will have to provide their own towels for bathing. All Patients must be provided with money for their travelling expenses when leaving the Hospital.
- 6.—All the Patients will be required to observe strictly the Rules laid down for their guidance; any infringement of the rules will render the Patient liable to immediate dismissal.
- 7.—Cases of Accident will be admitted to the Hospital on the recommendation of a Subscriber, or on payment of the usual weekly charge for board and lodging, and a guarantee given in either case for payment of any extra charges required.
- 8.—Application for the admission of In-Patients, accompanied by the usual Medical Certificate, to be made to the Secretary, who will intimate, by return of post, the earliest date upon which the Patient can be received. Patients are not on any account to come to the Hospital until they receive notice that there is room for them, as no allowance of any kind will be given to those who cannot be taken in.
- 9.—In-Patients are admitted into the Hospital on Monday, Tuesday, and Wednesday, between the hours of 9 a.m. and 6 p.m., and during their residence in the Hospital are under the immediate medical supervision of the House Surgeon and Assistant House Surgeon.

Out-Patients will be attended by one of the Medical Staff every Monday at 1 p.m., and Friday, at 3 p.m.

General Rules and Regulations for Subscribers.

- 1.—A Life Subscription of Twenty Guineas shall entitle a Subscriber to recommend one In and two Out-Patients annually.
- 2.—An Annual Subscription of One Guinea shall entitle a Subscriber to recommend one In or four Out-Patients; but no annual Subscriber shall send a Patient until he has been a Subscriber for at least three months; nor until his Subscription for the current year is paid.

All Subscriptions shall be considered as due in advance on the 1st of January in each year.

Annual Subscriptions not paid until after June 30th in each year, shall be considered to be in default, and shall not entitle to the recommendation of a Patient unless the difference between the amount of an Annual and a Casual Subscription be also paid. This rule does not apply to *new* Subscriptions paid after June 30th.

Recommendations are available only during the year for which they are issued. Forms of recommendation will be sent by the Secretary on application.

- 3.—Persons not being Annual or Life Subscribers, may recommend an In-Patient on payment of a Casual Subscription, £2 12s. 6d. ; and Life or Annual Subscribers may recommend additional Patients, beyond the number they are entitled to recommend annually, on payment of a casual Subscription with each.
- 4.—Subscribers of One Guinea per annum are allowed to send, in addition to the Patient eligible from the Subscription, three Out-Patients per annum, by paying Seven Shillings with each.
- 5.—Any Clergyman or Minister kindly preaching a Sermon or Sermons, on any one day in aid of the Funds of the Hospital, and contributing therefrom not less than £3, shall be entitled to one In or four Out-Patients' recommendations.
No money shall be received as a Subscription which can in any way be regarded as the proceeds of any public collection, or offertory, in any place of worship but all such sums shall be received as Donations, with the privileges defined in this rule.
- 6.—When not occupied under the powers of the Governors of the Cotton Districts Convalescent Fund, any of the 150 beds so assigned are available to Patients recommended by Subscribers, on payment of the cost per Patient to the Hospital, less the one guinea subscribed, or £1 11s. 6d.
- 7.—Visitors to the Hospital are particularly requested not to interfere between the Patients and Medical staff under whom they are placed.
- 8.—No Patient can be admitted without producing a medical certificate specifying the nature of the disease, and certifying that the Patient has not been exposed to the influence of Infectious or Contagious Disease during the four weeks previous to his or her admission.
- 9.—Persons suffering from any incurable or infectious disorder or from advanced heart disease—women more than six months advanced in pregnancy—persons in the later stage of consumption—or afflicted with itch, cutaneous disease, ulcers, fits, or insanity—or infested with vermin—cannot be admitted as In-Patients; or, if inadvertently admitted, cannot be allowed to remain.

The Annual Report and List of Subscribers, price 3d., by post 4d., may be had on application to the Secretary, Mr. JOSEPH TAYLOR, Devonshire Hospital, Buxton, to whom all communications should be addressed.

Cheques and Post Office Orders to be made payable to the Sheffield and Rotherham Joint Stock Banking Company, Limited, Buxton, Treasurers of the Hospital.

FORM OF BEQUEST OF LEGACY.

To those who may be inclined to be Benefactors to this Institution, of Personal Property, by Will, the following form is recommended:—

"I give and bequeath the sum of _____ pounds [free from Legacy Duty] unto the "Devonshire Hospital and Buxton Bath Charity" at Buxton, to be paid [with the Legacy Duty thereon] exclusively out of such part of my estate as may be legally bequeathed for charitable purposes, and in priority to all other payments thereout; and I declare that the receipt of the Treasurer, for the time being, of that Institution, shall be a sufficient discharge for the said Legacy."

METEOROLOGICAL REPORT FOR 1894.

FROM THE OBSERVATIONS TAKEN AT THE DEVONSHIRE HOSPITAL, BUXTON.

The instruments from which the observations are taken are the property of the Devonshire Hospital, and consist of—Fortin's barometer, wet and dry bulb thermometers, black bulb thermometer, sunshine recorder (Jordan's pattern) and rain gauge. They are standard instruments, and are inspected and verified from time to time by an officer of the Royal Meteorological Society. Buxton is a "second class" station of the Society, and observations are taken twice daily, viz., at 9 a.m. and 9 p.m.

A full report is sent to the Society every month, weekly reports sent to the local papers, and daily records are hung in the hall of the Hospital, where they may be consulted.

RAINFALL.—The total rainfall for the year, viz., 50·27 inches, was considerably above the average, and 9 inches higher than the previous year. The greatest fall in one day occurred on February 10th, when 2·02 inches were collected. Rain fell on 224 days during the year, the greatest number occurring in January. Snow fell on 26 days, 12 of which were in January.

SUNSHINE.—1113 hours of bright sunshine were registered during the year; this compares unfavourably with the preceding year, which, however, was an exceptional one. July had the largest share, viz., 185 hours. The greatest amount in one day was 14·8 hours on June 4th. There were 116 sunless days, December having most, viz., 22, and July least, viz., 1.

TEMPERATURE.—The highest temperature recorded in the shade during the year was 78·3°, on July 1st, and the lowest, 9·0° on February 20th. July was the warmest month, and January the coldest. There was frost on 75 days, of which 17 occurred in December.

ATMOSPHERIC PRESSURE.—The highest corrected reading of the barometer was 30·680 on January 3rd, and the lowest, 28·893 on October 24th. The average height of the barometer was greater in September than any other month of the year.

WIND.—The prevailing winds were West and South-West, 85 observations of the former, and 142 of the latter, being made. The number of observations of calm was 140.

ELECTRIC PHENOMENA.—There were 13 thunderstorms of more or less severity during the year, four of which occurred in August.

Appended is an abstract of the observations in tabular form.
