## PREFACE.

---

IN editing this collection of remedies, endeavour has been made to attain simplicity in the formulæ and conciseness in the directions.

It has been thought unnecessary to repeat here any of the prescriptions for skin-treatment which are already provided in the 'British Pharmacopœia.'

The names of the ingredients of the formulæ refer to drugs or preparations of the 'British Pharmacopœia' of 1867, in all cases where those names are there to be found.

With the object of presenting a clear general view, and of aiding the memory, the total quantity of each prescription has been reduced in every possible instance to an ounce.

The directions as to the uses of the formulæ are, as will be plain, mere illustrations selected from the commoner diseases of the skin.

B. S.

LONDON, May, 1879.

# PHARMACOPÆIA.

---

## AQUÆ MEDICATÆ OMNES.

---

B. Olei Essentialis, m vj.  
Aquæ,                     $\tilde{\zeta}$  xvij.

Shake the bottle well five separate times at intervals of a quarter of an hour, and, after a day, filter.

This plan yields as good a result as the official method by distillation, and is less expensive for hospital purposes.

---

## BALNEA—BATHS.

---

To obtain advantage in skin diseases, the use of medicated water baths must always be prolonged, namely, for never less than an hour. In order to render this prolonged employment of water baths practicable, the temperature of the bath must not vary at the most more than within a couple of degrees above or below 90° Fahrenheit.

**Balneum Acidum.**

R. Acidi Nitrici, ʒiss.  
 Acidi Hydrochlorici, ʒj.  
 Aquæ, C. xxx.

Mix.

*Used as a sedative in cases of Prurigo and  
 of Chronic Urticaria.*

**Balneum Alkalimum.**

R. Sodæ Carbonatis, ʒiv.  
 Aquæ, C. xxx.

Dissolve.

*Used as a solvent to remove scabs and  
 scaly incrustations, and as a sedative in cases  
 of Eczema, Psoriasis, and Chronic Lichen.*

**Balneum Creasoti.**

R. Creasoti, ʒij.  
 Aquæ, C. xxx.

Dissolve.

*Used as a mild stimulant in cases of Squamous Eczema and Pityriasis.*

**Balneum Diuturnum.**

℞. Aquæ, C. xxx.

*Used* (at the temperature of 90° Fahrenheit) for three hours every morning, and three hours every afternoon, in cases of Psoriasis and of Pemphigus.

**Balneum Glutinis.**

℞. Glutinis Præparati, ℥b. viij.

Aquæ, C. xxx.

Dissolve.

*Used* as a demulcent in cases of Acute Lichen.

**Balneum Marinum.**

℞. Salis Marini, ℥b. viij.

Aquæ, C. xxx.

Dissolve.

*Used* as a tonic stimulant in convalescent Eczema and Impetigo.

**Balneum Potassæ Sulphuratæ.**

℞. Potassæ Sulphuratæ, ʒiv.

Aquæ, C. xxx.

Dissolve.

*Used* as a solvent and stimulant in cases of Psoriasis, Pityriasis, Acne and Impetigo, and as a specific in Scabies.

## CAPSULÆ—CAPSULES.

---

### Capsulæ Olei Phosphorati.

Containing each gr.  $\frac{1}{30}$  Phosphorus dissolved in Olive Oil.

*Used* in cases of Psoriasis, of Chronic Eczema, and of Chronic Lichen.

*Dose.*—One, two, or three capsules three times a day. *Maximum dose*, four capsules three times a day.

*Note.*—The use of this remedy demands care.

---

## CATAPLASMATA—POULTICES.

---

### Cataplasma Micæ Panis.

R. Micæ Panis.

Aquæ ferventis,  $\overline{\text{aa}}$  q. s.

### Cataplasma Thymolis.

R. Thymolis, gr. x.

Lini Farinæ,  $\overline{\text{ij}}$ .

Olei Olivæ,  $\overline{\text{ij}}$ .

Aquæ ferventis,  $\overline{\text{v}}$ .

*Used* as an antiseptic poultice for foul sores.

## CAUSTICA—CAUSTICS.

---

### **Causticum Acidi Arseniosi.**

B. Acidi Arseniosi, gr. xx.  
 Cinnabaris Factitiæ, ʒj.  
 Adipis, ʒj.  
 Mix.

*Used in cases of Lupus.*

The caustic is spread thinly on strips of linen, and thus applied to the affected surface for twenty-four hours. This procedure is renewed for two or three consecutive days if necessary, the skin being well washed after each application. Thus applied, the caustic leaves all islets of healthy skin intact, and destroys only the Lupus-tissue. The extent of surface under treatment at any given time should not exceed double the size of the palm.

### **Causticum Acidi Carbolici.**

B. Acidi Carbolici, ʒj.

Aquæ, ʒss.

Dissolve.

*Used in cases of Lupus and in Alopecia Areata.*

Carbolic acid, even in this its most concentrated liquid condition, is one of the most superficially acting of caustics, and is of special use when only a very shallow depth of action is desired.

**Causticum Acidi Chromici.**

℞. Acidi Chromici.

Aquæ,  $\frac{aa}{3}$  ℥j.

Dissolve.

*Used in cases of Lupus and for destroying Warts.*

This solution, although considerably stronger than those ordinarily used, is not a fully saturated solution ( $\frac{3}{3}$ j of Chromic Acid dissolving in little more than  $\frac{3}{3}$ ss of water).

Chromic Acid, like Nitrate of Silver, is an oxidizing caustic. Its action resembles in many respects that of Nitrate of Silver.

**Causticum Argenti Nitratis.**℞. Argenti Nitratis,  $\frac{3}{3}$ ss.Spiritūs Vini Rectificati,  $\frac{3}{3}$ j.

Dissolve.

*Used in cases of Lupus and of circumscribed patches of Psoriasis of limited extent.*

This (a saturated spirituous solution of Nitrate of Silver) is preferable for cutaneous purposes to an *aqueous* solution of the Nitrate, which is apt to collect itself into drops immediately after it has been applied to the skin.

Lunar caustic exerts in any form only a very superficial action as an escharotic.

**Causticum Depilatorium.**

R. Calcis Sulphuratae, ʒ iss.  
 Zinci Oxidi, ʒ vj.  
 Carmine, gr. j.

Mix.

*Used* in cases of “Hirsuties,” and as an adjunct in the treatment of some diseases of the scalp.

Mix the powder with water to make a thin paste, allow this to remain on the skin for three minutes, and then wash it off with water.

**Causticum Iodi.**

R. Iodi; ʒ iij.  
 Potassii Iodidi, ʒ i.  
 Spiritus Vini Rectificati, ʒ j.

Dissolve.

*Used* in cases of Lupus and of indolent (i. e. non-phagedænic) tertiary syphilitic ulcers.

**Causticum Potassæ cum Calce.**

R. Potassæ Causticæ.  
 Calcis, aa ʒ ss.

Mix.

*Used* in cases of Lupus, but not in Lupus of the face.

Make the powder into a paste with alcohol

at the time of application, and allow it to remain, on the portion of skin to be attacked, for ten or fifteen minutes. Protect the surrounding skin from the action of the caustic by strips of plaster.

This is a deeply acting caustic, and must be used with caution.

### **Causticum Sabinæ.**

R. Pulvis Sabinæ, ʒvj.  
Zinci Oxidi, ʒj.

Mix.

*Used as a caustic to Venereal Warts.*

The direct action of this caustic is only very superficial.

### **Causticum Sodaæ Æthylatis.**

R. Sodaæ Æthylatis, ʒss.  
Alcohol Absoluti, ʒvj.

Dissolve.

*Used in cases of Vascular and of Pigmentary Nævus.*

The action of this caustic may be checked quickly by dropping upon the part a drop of Chloroform.

The Æthylate of Soda is prepared by treating absolute alcohol with metallic sodium.

**Causticum Zinci Chloridi.**

R. Zinci Chloridi.

Zinci Oxidi,  $\overline{aa}$  ʒss.

Mix.

*Used* in cases of Lupus, but not in Lupus of the face.

Make the powder into a thick paste with water at the time of application.

This is a deeply acting caustic, and must be used with caution. It requires, however, to be kept applied to the portion of the skin to be destroyed, for a much longer time than the Causticum Potassæ cum Calce.

**COLLYRIA—EYE-WATERS.**

Collyria should be used lukewarm.

All of the Collyria here named are intended to be used three times a day.

The best method of employing the Collyria is to direct the patient to sit, holding his head well back, so that his chin is slightly above the level of his forehead, and, while so, to turn his face a little to one side so that the eye to be treated is slightly above the level of the other. In this position, the lids being shut, the Collyrium is to be poured by the patient or a friend into the cup formed by the inner

half of the orbit with the root of the nose. The patient has now only to blink a few times in order to use in the most efficient manner the Collyrium. This plan is preferable to the use of eye-water-glasses and other customary methods.

**Collyrium Atropiæ Sulphatis.**

R. Atropiæ Sulphatis, gr.  $\frac{1}{8}$ .  
Aquæ,  $\frac{3}{5}$ j.

Dissolve.

*Used*, to dilate the pupil, in cases of Syphilitic Eruptions complicated with Syphilitic Iritis.

**Collyrium Cupri Sulphatis.**

R. Cupri Sulphatis, gr. ij.  
Aquæ,  $\frac{3}{5}$ j.

Dissolve.

*Used* as a stimulant in cases of Eczema, Impetigo, &c., invading the conjunctivæ.

**Collyrium Hydrargyri Perchloridi.**

R. Hydrargyri Perchloridi, gr.  $\frac{1}{8}$ .  
Aquæ,  $\frac{3}{5}$ j.

Dissolve.

*Used* as a stimulant in cases of Eczema, and as a specific in cases of Syphilitic Eruptions invading the conjunctivæ.

**Collyrium Zinci Sulphatis.**

B. Zinci Sulphatis, gr. ij.  
Aquæ, ʒj.

Dissolve.

*Used as a stimulant in cases of Eczema and  
of other eruptions invading the conjunctivæ.*

---

**CONFECTIO—CONFECTION.**

---

**Confectio Sulphuris Composita.**

B. Sulphuris Præcipitati, gr. xx.  
Potassæ Tartratis Acidæ, gr. v.  
Theriacæ, ʒj.

Mix.

*Used as a laxative and diaphoretic in dry  
Eczema and in Lichen.*

## EMPLASTRUM—PLASTER.

## Emplastrum Hydrargyri Compositum.

R. Hydrargyri,	3ij.
Terebinthinæ Olei,	m xx.
Ceræ Flavæ,	3j.
Resinæ,	3ij.
Styracis Præparati,	3j.
Emplastrum Plumbi,	5j.

## Mix.

*Used* as a specific in cases of Syphilitic Eruptions, and as a stimulant and absorbe-facient in cases of Acne Rosacea, of Sycosis, and of Chronic Lichen.

*Preparation.*—Triturate together (in a warmed iron mortar till metallic globules have disappeared), the Mercury, Storax, and Turpentine.

Melt together the Lead-plaster with the Wax and Resin, and when it has cooled to the consistence of a soft ointment, add the mercurial mixture and incorporate by agitation.

## ENEMA—CLYSTER.

---

### Enema Calcis cum Ferro.

R. Tincturæ Ferri Perchloridi, m xx.  
Liquoris Calcis, ʒj.

Mix.

*Used* as a specific in cases of Prurigo Podicis, dependent on the presence of ascarides in the rectum.

GARGARISMATA—GARGLES.

---

Gargles should be used, preferably, lukewarm.

All of the Gargles here named should be used at the least three times a day.

In the employment of Gargles, the patient should be directed to take only a small quantity of gargle into the mouth at a time, and to hold his head well back during the act of gargling. He should also be ordered to repeat the process of gargling with a fresh quantity of gargle at least more than once on each occasion.

It is an advantage to precede each occasion of using any of the gargles by first gargling with some mild "mucus-detergent," such as a weak lukewarm solution of the "Sapo Durus cum Glycerino."

It is a further advantage, especially in lesions situated behind the anterior pillars of the fauces, if the patient be directed to follow each act of gargling by making repeated swallowing motions, without however actually swallowing. During this procedure the head must still be held well back.

**Gargarisma Acidi Tannici.**

R. Glycerini Acidi Tannici, ʒij.  
Aquæ, ad ʒj.

Mix.

*Used as an astringent in cases of Herpes Labialis complicated with simple sore-throat, and in cases of Lupus invading the gums, &c., and accompanied with excessive discharge, also in cases of Syphilitic Eruptions complicated with salivation or with sponginess of the gums arising from mercurialism.*

**Gargarisma Hydrargyri Perchloridi.**

R. Hydrargyri Perchloridi, gr.  $\frac{1}{2}$ .  
Aquæ, ʒj.

Dissolve.

*Used as a specific in cases of Syphilitic Eruptions complicated with mucous patches of the lips, tongue, mouth, or throat.*

### Gargarisma Potassæ Chloratis.

R. Potassæ Chloratis, 3ss.  
Aquæ,                    3j.

Dissolve.

*Used as a mild stimulant in cases of Syphilitic Eruptions complicated with specific lesions of the lips, tongue, mouth, or throat, and in cases of salivation.*

### Gargarisma Sodæ Chloratæ.

R. Sodæ Chloratæ Liquor, 3ss.  
Aquæ,                    ad 3j.

Mix.

*Used as an antiseptic in cases of Syphilitic Eruptions complicated with sloughing or phagedænic lesions of the lips, tongue, mouth, or throat.*

## GLYCERINUM—GLYCEROLE.

## Glycerinum Guaiaci.

R. Tincturæ Guaiaci, 3ss.  
Glycerini, ad 3ij.

## Mix.

*Used* as a stimulant and diaphoretic in cases of eruptions complicated with chronic rheumatism and debility.

Although glycerine will not dissolve the resin of Guaiacum, yet, unlike water, its admixture with the tincture does not precipitate the Guaiacum. It is therefore a more convenient means of diluting the tincture than water, which precipitates the resin from the tincture. The admixture of glycerine with the tincture moreover softens the flavour of the Guaiacum, which water does not. The tincture can be diluted to any extent with *glycerine*, but the mixture of glycerine with tincture cannot be diluted with water, except with precipitation of the resin.

INJECTIO VAGINALIS—VAGINAL  
INJECTION.

---

**Injectio Aluminis et Zinci.**

R. Aluminis, gr. vj.  
Zinci Sulphatis, gr. ij.  
Aquæ, ʒj.

Dissolve.

*Used as an astringent in cases of Pruritus Vulvæ complicated with Leucorrhœa.*

---

LOTIONES—LOTIONS.

---

**Lotio Acidi Benzoici.**

B. Acidi Benzoici, gr. ij.  
Aquæ, ʒj.

Dissolve.

*Used as a sedative in cases of Chronic Urticaria.*

This is a saturated solution of Benzoic Acid in water.

**Lotio Acidi Boracici.**

R. Acidi Boracici, gr. xv.  
Aquæ,              ʒj.

Dissolve.

*Used in cases of Eczema and in Prurigo Podicis.*

This is nearly a saturated aqueous solution of Boracic Acid, the maximum solubility of Boracic Acid in ʒj of water being about seventeen grains.

**Lotio Acidi Carbolici.**

R. Acidi Carbolici, gr. x.  
Aquæ,              ʒj.

Dissolve.

*Used as an antiseptic and stimulant in foul or syphilitic ulcerations, and to allay irritation in Chronic Eczema and Psoriasis.*

**Lotio Acidi Hydrocyanici.**

R. Acidi Hydrocyanici Diluti, m. x.  
Aquæ,              ʒj.  
Mix.

*Used as a sedative in various eruptions to allay irritation.*

**Lotio Acidi Nitrici.**

R. Acidi Nitrici Diluti, m. x.  
 Aquæ,                    3j.  
                             Mix.

*Used as a sedative in various eruptions to allay irritation.*

**Lotio Acidi Sulphurosi.**

R. Acidi Sulphurosi, 3ij.  
 Aquæ,                    ad 3j.  
                             Mix.

*Used to destroy vegetable parasites in cases of Ringworm (Tinea Tonsurans), of Favus, of Chloasma, and of Eczema Marginatum.*

The volatility of Sulphurous Acid requires that the otherwise rapid evaporation of the acid from the lotion should be retarded by applying the lotion on lint or rag covered with oilsilk.

**Lotio Aluminis.**

R. Aluminis, gr. x.  
 Aquæ,                    3j.  
                             Dissolve.

*Used as an astringent in Eczema, in Acne Rosacea, and in Intertrigo.*

**Lotio Argenti Nitratis.**

R. Argenti Nitratis, gr. iiij.

Aquæ,                    3j.

Dissolve.

*Used as a stimulant in cases of Chronic Eczema and Chronic Lichen.*

**Lotio Bismuthi.**

R. Bismuthi Subnitratis, gr. x.

Aquæ,                    3j.

Mix.

*Used as a sedative in cases of Eczema and of Acne associated with Urticaria.*

**Lotio Boracis.**

R. Boracis, gr. xv.

Aquæ, 3j.

Dissolve.

*Used as a detergent and solvent in cases of Lichen, Acne, Eczema, Chloasma, and Tinea Tonsurans.*

**Lotio Calcis.**

R. Olei Amygdalæ, 3j.

Liquoris Calcis, 3j.

Mix.

*Used as a detergent in cases of Pityriasis of the scalp.*

**Lotio Cupri Sulphatis.**

℞. Cupri Sulphatis, gr. iiij.

Aquæ, ʒj.

Dissolve.

*Used as a stimulant and astringent in cases of Chronic Eczema.***Lotio Ferri Tartarati.**

℞. Ferri Tartarati, ʒss.

Aquæ, ʒj.

Dissolve.

*Used as an application to soft chancres.***Lotio Glycerini.**

℞. Glycerini, ʒj.

Aquæ, ad ʒj.

Mix.

*Used as an emollient in cases of Pityriasis and of Ichthyosis.***Lotio Hydrargyri Perchloridi.**

℞. Hydrargyri Perchloridi, gr. j.

Aquæ, ʒj.

Dissolve.

*Used as a stimulant in cases of Chronic Eczema, of Acne, and of Acne Rosacea.**The employment of this lotion demands care.*

**Lotio Nigra.**

R. Hydrargyri Subchloridi, gr. x.  
Mucilago Tragacanthæ, ʒj.  
Liquoris Calcis, ʒj.

**Mix.**

*Used as a specific in cases of Syphilitic Ulceration.*

**Lotio Plumbi Subacetatis.**

R. Plumbi Subacetatis Liquoris, m v.  
Aquæ, ʒj.  
**Mix.**

*Used as a sedative and astringent in cases of Acute Eczema and of Acute Lichen.*

**Lotio Potassæ Chloratis.**

R. Potassæ Chloratis, ʒss.  
Aquæ, ʒj.  
**Dissolve.**

*Used as a stimulant in cases of Chronic Eczema, and as a mildly antiseptic stimulant to foul ulcers.*

*This is a saturated solution of the salt.*

**Lotio Potassæ Sulphuratæ.**

R. Potassæ Sulphuratæ, gr. v.  
 Aquæ,                     $\frac{3}{4}$ j.  
                             Dissolve.

*Used to destroy vegetable parasites in cases of Eczema Marginatum, and as a solvent and stimulant in cases of Prurigo and of Psoriasis, and as a specific in cases of Scabies.*

**Lotio Sodæ Chloratæ.**

R. Sodæ Chloratæ Liquoris, 3ss.  
 Aquæ,                     $\frac{3}{4}$ j.  
                             Mix.

*Used as a bleaching agent in cases of Lentigo, and as an antiseptic to foul ulcers.*

**Lotio Zinci Oxidi.**

R. Zinci Oxidi.  
 Calamini Præparati.  
 Glycerini,                $\frac{aa}{aa}$   $\frac{3}{4}$ j.  
 Aquæ,                     $\frac{3}{4}$ j.  
                             Mix.

*Used as a mild astringent in cases of Chronic Eczema and of Acne Rosacea.*

**Lotio Zinci Sulphatis.**

R. Zinci Sulphatis, gr. ij.  
 Tincturæ Lavandulæ Compositæ, m̄ xxv.  
 Aquæ, ʒj.  
 Dissolve.

*Used as a stimulant and astringent in cases of Chronic Eczema.*

---

**MISTURÆ—MIXTURES.****Mistura Acidi Nitrohydrochlorici.**

R. Acidi Nitrohydrochlorici Diluti, m̄ xv.  
 Caramel, gr. v.  
 Aquæ, ʒj.  
 Mix.

*Used as an alterative tonic in syphilitic cachexia, and as a tonic in cases of eruptions associated with hepatic disorder.*

**Mistura Alba.**

R. Magnesiæ Carbonatis, gr. x.  
 Magnesiæ Sulphatis, ʒj.  
 Aquæ Menthae Piperitæ, ʒj.  
 Mix.

*Used as an antacid aperient in cases of acute or chronic eruption associated with constipation.*

**Mistura Arsenicalis.**

R. Liquoris Arsenicalis, m v.  
 Aquæ,                        3j.  
                                 Mix.

*Used as a specific in various chronic eruptions.*

**Mistura Assafœtidæ.**

R. Assafœtidæ, gr. v.  
 Aquæ,                        3j.  
                                 Mix.

*Used as an antispasmodic in eruptions associated with hysteria.*

**Mistura Bismuthi.**

R. Liquoris Bismuthi et Ammoniæ  
 Citratis,                        3j.  
 Acidi Hydrocyanici Diluti,    m iiij.  
 Aquæ Menthae Piperitæ,      3j.  
                                 Mix.

*Used as a gastric sedative in Acne Rosacea and other eruptions of the face associated with irritative dyspepsia or pyrosis.*

**Mistura Bismuthi Acida.**

R. Bismuthi Nitratis, gr. v.  
 Glycerini, 3j.  
 Aquæ, 3j.  
 Dissolve.

*Used* for the same purposes as the **Mistura Bismuthi**.

*Preparation.*—The nitrate must first be dissolved (*without* the aid of heat) in the glycerine separately. The glycerole thus obtained is not rendered turbid on admixture with the water.

**Mistura Catechu.**

R. Tincturæ Catechu, 3j.  
 Potassæ Bicarbonatis, gr. x.  
 Aquæ Cinnamomi, 3j.  
 Dissolve.

*Used* as an astringent in cases of Acute Lichen and other eruptions complicated with diarrhœa.

**Mistura Chloralis Hydratis.**

R. Chloralis Hydratis, gr. x.  
 Syrupi Rhœados, 3j.  
 Aquæ, ad 3j.  
 Dissolve.

*Used* as a Hypnotic in cases of eruptions provoking irritation which precludes sleep.

**Mistura Chloroformi.**

R. Aquæ Chloroformi, ʒss.  
 Aquæ, ad ʒj.  
 Mix.

*Used as a cutaneous sedative in cases of Chronic Urticaria.*

**Mistura Colchici Alkalina.**

R. Tincturæ Colchici Seminum, m vj.  
 Potassæ Bicarbonatis, gr. v.  
 Aquæ Pimentæ, ʒj.  
 Dissolve.

*Used in cases of Psoriasis, Eczema, and other eruptions when complicated with a gouty habit.*

**Mistura Diaphoretica.**

R. Vini Ipecacuanhæ, m v.  
 Spiritûs Ætheris Nitrosi, m xxx.  
 Ammoniæ Acetatis Liquoris, ʒij.  
 Aquæ, ʒj.  
 Mix.

*Used in cases of eruptions, but chiefly of acute eruptions attended with febrile disturbance and heat and dryness of the general surface.*

**Mistura Diuretica.**

R. Potassæ Acetatis, gr. xx.  
 Aceti Scillæ, m. xx.  
 Tincturæ Digitalis, m. v.  
 Aquæ, ʒj.

Dissolve.

*Used in cases of eruptions complicated with œdema.*

**Mistura Ferri cum Opio.**

R. Ferri et Ammoniæ Citratis, gr. v.  
 Tincturæ Opii, m. iv.  
 Aquæ, ʒj.

Dissolve.

*Used in cases of Acne and other eruptions complicated with anæmia and gastrodynia.*

**Mistura Ferri Perchloridi.**

R. Liquor Ferri Perchloridi, m. xv.  
 Magnesiæ Sulphatis, gr. xv.  
 Aquæ, ʒj.

Dissolve.

*Used as a chalybeate tonic in eruptions complicated with anæmia and debility.*

**Mistura Hydrargyri Iodidi.**

R. Hydrargyri Iodidi Rubri, gr.  $\frac{1}{8}$ .  
 Potassii Iodidi, gr.  $\frac{1}{2}$ .  
 Aquæ,  $\frac{5}{3}$ j.  
 Dissolve.

*Used as a specific in cases of syphilitic eruptions.*

**Mistura Ipecacuanhæ cum Opio.**

R. Vini Ipecacuanhæ, m. x.  
 Tincturæ Opii, m. iv.  
 Aquæ,  $\frac{5}{3}$ j.  
 Mix.

*Used as a diaphoretic expectorant in Eczema and other eruptions complicated with acute bronchial catarrh.*

**Mistura Liquoris Potassæ.**

R. Liquoris Potassæ, m. xx.  
 Aquæ,  $\frac{5}{3}$ j.  
 Mix.

*Used as a gastric sedative in cases of Acne Rosacea and other eruptions of the face attended with dyspepsia.*

**Mistura Nucis Vomicæ.**

R. Tincturæ Nucis Vomicæ, m. xx.  
 Aquæ,                                ʒj.  
   Mix.

*Used as a bitter tonic and laxative in eruptions associated with a cachectic condition.*

**Mistura Potassii Bromidi.**

R. Potassii Bromidi, gr. x.  
 Aquæ Camphoræ, ʒij.  
 Aquæ,                              ad ʒj.  
   Dissolve.

*Used as a general sedative in cases of chronic eruptions attended with general nervous irritability, and in attacks of acute eruption if apparently determined by anxiety or prolonged mental tension.*

**Mistura Potassii Iodidi.**

R. Potassii Iodidi, gr. v.  
 Aquæ,                              ʒj.  
   Dissolve.

*Used in cases of plastic deposit complicating syphilitic or other eruptions.*

**Mistura Quiniæ.**

R. Quiniæ Sulphatis, gr. j.  
 Acidi Sulphurici Diluti, m ij.  
 Aquæ, ʒj.

Dissolve.

*Used as a bitter tonic in cases of eruptions associated with atonic dyspepsia or with general atony.*

**Mistura Salina.**

R. Potassæ Nitratis, gr. x.  
 Theriacæ, gr. x.  
 Aquæ, ʒj.

Dissolve.

*Used as a refrigerant in cases of acute eruption of various kinds.*

**Mistura Sarsæ.**

R. Extracti Sarsæ Liquidi, ʒij.  
 Aquæ, ad ʒj.  
 Mix.

*Used in cases of syphilitic and other eruptions as an alterative tonic.*

**Mistura Scillæ cum Conio.**

R. Tincturæ Scillæ, m x.  
 Liquoris Potassæ, m xv.  
 Succi Conii, m xxx.  
 Aquæ, ad ʒj.

Mix.

*Used* as a stimulant expectorant in Eczema and other eruptions complicated with chronic bronchial catarrh.

**Mistura Taraxaci.**

R. Succi Taraxaci, ʒj.  
 Acidi Nitrici Diluti, m v.  
 Aquæ, ad ʒj.

Mix.

*Used* as an alterative cholagogue and laxative in cases of eruptions attended with bilious cachexia.

**Mistura Zinci Sulphatis.**

R. Zinci Sulphatis, gr. j.  
 Aquæ, ʒj.  
 Dissolve.

*Used* as a nerve tonic in cases of eruptions associated with nervous debility.

## PESSI—PESSARIES.

## Pessus Acidi Tannici.

R. Acidi Tannici, gr. xx.  
 Gelatinæ, gr. iv.  
 Aquæ, q. s.  
 Glycerini, m xvij.  
 Mix.

*Used as an astringent in cases of Pruritus Vulvæ dependent on or complicated with uterine disorder.*

## Pessus Morphiæ.

R. Morphiæ Acetatis, gr.  $\frac{1}{3}$ .  
 Gelatinæ, gr. v.  
 Aquæ, q. s.  
 Glycerini, m xx.  
 Mix.

*Used as a sedative in cases of Pruritus Vulvæ dependent on or complicated with uterine disorder.*

## PIGMENTA—PIGMENTS.

---

### Pigmentum Acidi Carbolici.

R. Acidi Carbolici.

Glycerini,  $\frac{aa}{3}$  ss.

Dissolve.

*Used* to destroy vegetable parasites in cases of Ringworm (*Tinea Tonsurans*) and of Chloasma; as a stimulant in cases of Psoriasis, of Seborrhœa, and *Tinea Decalvans*; and as a semi-caustic application to indolent ulcers.

### Pigmentum Acidi Tannici.

R. Acidi Tannici, 3*iiij*.

Glycerini,  $\frac{3}{5}$  vj.

Dissolve by aid of heat.

*Used* as a strong astringent in cases of excessive sweating of the feet, of Seborrhœa Oleosa, and of figurate Chronic Eczema, and as an application to the throat in cases of eruptions complicated with simple chronic sore-throat.

**Pigmentum Aloës.**

R. Extracti Aloës Barbadensis, ʒiiij.  
Glycerini, ʒvj.

Dissolve.

*Used as a mild stimulant in cases of Chronic Eczema.*

**Pigmentum Benzolis.**

(Benzine.)

*Used in Seborrhœa, in Acne, and generally for the purpose of dissolving off grease, whether sebaceous or artificially acquired (as ointment, &c.), from the skin.*

**Pigmentum Glycerini.**

R. Glycerini.  
Spiritūs Vini Rectificati, aa ʒj.

Dissolve.

*Used as an emollient in cases of Ichthyosis.*

### Pigmentum Hydrargyri Perchloridi.

R. Hydrargyri Perchloridi, gr. ij.  
 Glycerini, ʒij.  
 Spiritūs Vini Rectificati, ʒj.

Dissolve.

*Used to destroy vegetable parasites in cases of Ringworm (Tinea Tonsurans), of Chloasma, of Eczema Marginatum, and of Favus.*

This is more efficacious as a ringworm lotion than the *aqueous* solution of the sublimate.

The spirit, holding in solution the Glycerole of the Sublimate, enables the latter to be diffused uniformly over the skin. Thus applied, the glycerine solution of sublimate left by the evaporation of the spirit, penetrates efficiently the affected tissues.

### Pigmentum Iodi.

R. Iodi, ʒss.  
 Potassii Iodidi, ʒij.  
 Glycerini, ʒj.

Dissolve.

*Used to destroy vegetable parasites in cases of Ringworm, &c., and as a stimulant in cases of Psoriasis and of figurate Chronic Lichen.*

**Pigmentum Olei Cadi.**

R. Olei Juniperi Empyrei, q. s.

(Huile de Cade.)

*Used as a stimulant in cases of Psoriasis and of Chronic Eczema.*

**Pigmentum Olei Ricini.**

R. Olei Ricini, ʒiiij.  
Spiritūs Vini Rectificati, ʒvj.

Dissolve.

*Used as a mildly stimulating application to the scalp in cases of Pityriasis and of Seborrhœa Sicca.*

Castor oil is the only fixed oil which dissolves freely in rectified spirit.

**Pigmentum Picis cum Iodo.**

R. Iodi, ʒij.  
Olei Picis Rectificati, ʒj.

Dissolve cautiously.

*Used to destroy vegetable parasites in cases of Ringworm (Tinea Tonsurans), of Chloasma, of Eczema Marginatum, and of Favus.*

Pigmentum Picis Liquidæ.

R. Picis Liquidæ.

Spiritu Vini Rectificati,  $\frac{1}{2}$  ss.

Dissolve.

*Used* as a stimulant in cases of Psoriasis and of Chronic Dry Eczema. Its use in Eczema demands caution.

This solution constitutes a very convenient means of applying tar to the skin.

Pigmentum Plumbi.

(Plumbi Subacetatis Glycerinum.)

The Plumbi Subacetatis Liquor made with Glycerine in place of water.

*Used* (diluted to a varying extent with glycerine) as an astringent and sedative in cases of Chronic Eczema.

PILULÆ—PILLS.

---

**Pilula Acidi Arseniosi.**

R. Acidi Arseniosi, gr.  $\frac{1}{2}$ .  
Piperis Nigri, gr.  $\frac{1}{2}$ .  
Extracti Gentianæ, gr. ij.

Mix.

*Used as a specific in various chronic eruptions.*

**Pilula Aloës et Assafœtidæ cum Ferro.**

R. Ferri Sulphatis, gr. j.  
Pilulæ Aloës et Assafœtidæ, gr. iv.

Mix.

*Used in cases of eruptions associated with Chlorosis.*

**Pilula Crotonis Olei.**

R. Crotonis Olei, m  $\frac{1}{4}$ .  
Extracti Colocynthidis Compositi, gr. v.

Mix.

*Used as a strong aperient in eruptions complicated with obstinate habitual constipation.*

**Pilula Hydrargyri cum Colocynthide.**

R. Pilulæ Hydrargyri, gr. ij.  
Pilulæ Colocynthidis et Hyoscyami, gr. iiij.

Mix.

*Used as an aperient in eruptions complicated with bilious constipation.*

**Pilula Hydrargyri Iodidi Viridis.**

R. Hydrargyri Iodidi Viridis, gr.  $\frac{1}{2}$ .  
Pulvis Opii, gr.  $\frac{1}{4}$ .  
Extracti Gentianæ, gr. ij.

Mix.

*Used as a specific in cases of syphilitic eruptions.*

**Pilula Opii et Conii.**

R. Extracti Conii, gr. j.  
Pilulæ Saponis Compositæ, gr. ij.

Mix.

*Used as a sedative in eruptions associated with nervous irritability.*

**Pilula Podophylli cum Nuce Vomicæ.**

R. Resinæ Podophylli, gr.  $\frac{1}{6}$ .  
Extracti Nucis Vomicæ, gr.  $\frac{1}{4}$ .  
Extracti Gentianæ, gr. ij.

Mix.

*Used as an aperient in eruptions complicated with an atonic bilious condition.*

**Pilula Zinci Valerianatis.**

R. Zinci Valerianatis.  
Confectionis Rosæ Caninæ,  $\overline{\text{aa}}$  gr. ij.

Mix.

*Used as a tonic in eruptions associated with nervous languor.*

---

**PULVERES—POWDERS.**

---

**Pulvis Amygdalæ.**

R. Pulvis Amygdalæ dulcis, q. s.

*Used, after being made into a thin paste with water, as a bland detergent, in place of soap and water, in irritable conditions of the skin.*

**Pulvis Bismuthi Compositus.**

R. Bismuthi Subnitratis, ʒvj.  
Plumbi Chromatis, gr. x.  
Carmini, gr. v.  
Cinnabaris Factitiæ, gr. v.

Mix.

*Used as a sedative and cosmetic in various eruptions of the face.*

**Pulvis Cimoliæ.**

R. Pulvis Terræ Cimoliæ, q. s.  
(Fuller's Earth.)

*Used as an absorbent application in Intertrigo and in Eczema.*

**Pulvis Lycopodii.**

R. Pulvis Lycopodii, q. s.

*Used as a bland application in cases of Acute Eczema.*

**Pulvis Zinci Oxidi et Aluminis.**

R. Zinci Oxidi.  
Pulvis Asbesti.  
Pulvis Iridis Radicis, aa ʒss.  
Pulvis Amyli, ʒj.  
Mix.

*Used as a mild astringent application in cases of Acute Eczema.*

**Pulvis Zinci Oxidi et Calamini.**

B. Zinci Oxidi.

Calamini Præparati, aa ʒss.

Mix.

*Used as a mild astringent application in cases of Intertrigo, of Chronic Eczema, and of Acne Rosacea.*

---

**SAPONES—SOAPS.**

---

**Sapo Durus cum Glycerino.**

Brand “F. A. Sarg” (of Vienna).

This, which is a specially bland and emollient soap, is employed for ordinary use in irritable conditions of the skin, such as Acute Lichen and Chronic Urticaria, and also for the purpose of softening and dissolving off dried or viscid secretion from raw and tender surfaces—for example, inflamed Eczema or sensitive ulcers. Its clean fresh taste permits of its being used also (in solution) as a mouth-wash and gargle for removing mucus previous to the use of other remedies.

**Spiritus Saponis Mollis.**

R. Saponis Mollis Optimi, ʒj.  
Spiritūs Vini Rectificati, ʒss.

Dissolve.

*Used*, mixed with warm water, to soften and remove scales and incrustation in the less irritable conditions of the skin—for example, in Psoriasis, in Lupus, in Syphilitic Ulcerations, and in Seborrhœa. Used also as in itself a moderate stimulant in similar conditions.

---

**SUPPOSITORIA—SUPPOSITORY.****Suppositoria Acidi Tannici cum Opio.**

R. Acidi Tannici, gr. xv.  
Pulvis Opii, gr. j.  
Glycerini, m ij.  
Saponis Duri, gr. viij.

Mix.

*Used* in cases of Prurigo Podicis dependent on or complicated with a congested condition of the rectum.

## UNGUENTA—OINTMENTS.

---

**Unguentum Acidi Boracici.**

R. Acidi Boracici, ʒj.  
 Adipis,              ʒj.  
                         Mix.

*Used in cases of Eczema.*

**Unguentum Acidi Chrysophanici.**

R. Acidi Chrysophanici, ʒij.  
 Adipis,              ʒj.

Heat together in a water-bath for half an hour; when set, mix with pestle and mortar.

*Used in cases of Psoriasis, of Erythema Marginatum, of Chloasma, of Acne Tuberculata, of Acne Rosacea.*

*Caution.*—The erythema, which arises after sometimes only a few applications of this ointment, should be watched for, and on its first appearance the use of the ointment should be promptly discontinued. In all cases it is necessary to avoid carefully the immediate neighbourhood of the eyelids, which otherwise are apt to be rendered œdematosus.

**Unguentum Acidi Pyrogallici.**

R. Acidi Pyrogallici, gr. x.  
Adipis,                ʒj.  
                        Mix.

*Used in cases of Psoriasis.*

**Unguentum Acidi Salicylici.**

R. Acidi Salicylici, ʒss.  
Adipis,                ʒj.  
                        Mix.

*Used in cases of Eczema.*

**Unguentum Acidi Tannici cum Opio.**

R. Acidi Tannici.  
Pulvis Opii,    aa ʒss.  
Adipis,                ʒj.  
                        Mix.

*Used in cases of Prurigo Podicis.*

**Unguentum Alizarini.**

R. Alizarini Factitii, ʒj.  
Adipis,                ʒj.  
                        Mix.

*Used in cases of Chloasma.*

**Unguentum Bismuthi.**

R. Bismuthi Subnitratis, ʒj.  
Adipis, ʒj.  
Mix.

*Used in cases of Eczema and of Lentigo.*

**Unguentum Calamini.**

R. Calamini Præparati, ʒij.  
Adipis, ʒj.  
Mix.

*Used in cases of Eczema.*

**Unguentum Camphoræ.**

R. Camphoræ, ʒss.  
Adipis, ʒj.

Melt together.

*Used as a stimulant and sedative in cases of Eczema.*

**Unguentum Creasoti Forte.**

R. Creasoti, ʒvj.  
Ceræ Albæ, ʒiij.

Melt with heat.

*Used* in cases of Psoriasis.

*Caution.*—This ointment should not be used to the face or belly or flexor surfaces of the limbs.

**Unguentum Diachyli.**

R. Emplastri Plumbi, ʒss.  
Vaselini, ʒss.

Melt with heat.

*Used* in cases of Eczema and of excessive sweating of the feet.

**Unguentum Hydrargyri Iodidi Rubri  
Forte.**

R. Hydrargyri Iodidi Rubri, ʒj.  
Adipis, ʒj.  
Mix.

*Used* in cases of Alopecia Areata and of Acne Tuberculata of the trunk.

*Caution.*—The employment of this ointment demands care.

**Unguentum Hydrargyri Oleatis.**

R. Hydrargyri Oleatis, ʒij.  
 (10 p. c.)  
 Adipis, ʒj.  
 Mix.

*Used in cases of Eczema of the scalp, of Ringworm (Tinea Tonsurans).*

**Unguentum Hydrargyri Oxidi Flavi.**

R. Hydrargyri Oxidi Flavi, gr. xv.  
 Adipis, ʒj.  
 Mix.

*Used in cases of Chronic Eczema, of Pityriasis Fusca (of the face and neck), of Psoriasis of the face, of Ringworm (Tinea Tonsurans), of Chronic Lichen, of Syphilitic Eruptions.*

**Unguentum Hydrargyri Perchloridi.**

R. Hydrargyri Perchloridi, gr. viij.  
 Adipis, ʒj.  
 Mix.

*Used in cases of Ringworm (Tinea Tonsurans).*

**Unguentum Iodoformi.**

R. Iodoformi, ʒj.  
Adipis, ʒj.

Mix.

*Used in cases of Syphilitic Eruptions.*

**Unguentum Olei Betulæ.**

R. Olei Betulæ Albæ, ʒv.  
Ceræ Flavæ, ʒij.

Melt.

*Used in cases of Psoriasis and of Dry Eczema.*

*Caution.—The use of this ointment in Eczema demands care.*

**Unguentum Olei Staphisagriæ.**

R. Olei Staphisagriæ, ʒj.  
Adipis, ʒj.

Mix.

*Used as a non-irritant remedy in Scabies and in Phtheiriasis.*

**Unguentum Plumbi Glycerini.**

R. Plumbi Subacetatis Glycerini, ʒss.  
Vaselini, ʒj.  
Mix.

*Used as a bland astringent in cases of Acute or Subacute Eczema.*

**Unguentum Styracis.**

R. Styracis Præparati, ʒij.  
Adipis, ʒj.

Mix.

*Used in cases of Scabies.*

**Unguentum Sulphuris cum Potassâ.**

R. Sulphuris Præcipitati, ʒij.  
Potassæ Carbonatis, ʒj.  
Cinnabaris Factitiæ, gr. ij.  
Olei Bergamot, m ij.  
Adipis, ʒj.

Mix.

*Used in cases of Scabies.*

( 59 )

**Unguentum Zinci Oleatis.**

R. Zinci Oleatis, 5ij.  
Adipis, 3j.

Mix.

*Used in Chronic and in Subacute Eczema.*
