RECOMMENDATIONS  
FOR FILLING UP THE  
REGISTER OF CASES,

AGREED TO AT THE  
ANNUAL MEETING OF THE ASSOCIATION OF MEDICAL OFFICERS OF HOSPITALS FOR THE INSANE,  
Held at the Asylum, Lancaster, June 2nd and 3rd, 1842.

1. In order to obtain accurate information as to the various particulars of the accompanying form of Register, not falling under actual observation, it is desirable that the several institutions should be provided with a set of *Queries under similar heads with those of the register*, which in every case should be furnished to, and filled up by, the Friends or Guardians of the Patient, at the time of admission.

2. In filling up the Register, it is particularly recommended that the "duration of disorder on admission" should be ascertained as accurately as possible, and that the cases should be distributed into four classes in reference to such duration. Thus discriminated, the facts observed in different Asylums, when exhibited in annual reports or otherwise, will be fairly susceptible of comparison with each other. The following are the classes recommended.

CLASS 1. Cases of the first attack, of not more than three months' duration.

CLASS 2. Cases of the first attack, of more than three, but of not more than twelve months' duration.

CLASS 3. Cases not of the first attack, and of not more than twelve months' duration.

CLASS 4. Cases whether of the first attack or not, of more than twelve months' duration.

3. As regards the "form of mental disorder," it will be desirable, as much as may be, to refer every case to one of the following primary forms:

1. MANIA.

2. MELANCHOLIA.

3. MONOMANIA.

4. MORAL INSANITY.

5. DEMENTIA, under the two heads of Imbecility and Fatuity.

6. CONGENITAL IDIOTCY.

*Criminal Lunatics* should be further distinguished as such.

4. It is also recommended, that in filling up the column of the "result," one of the following terms should always be employed: 1. "*Recovered*," or "*Cured*;" 2. "*Relieved*," or "*Improved*;" 3. "*Unimproved*;" and 4. "*Died*;" and that any other particulars in reference to the discharge, as, e.g., by "*escape*," or by the "*desire of friends*," should in no case supersede this essential information.

5. It need scarcely be observed, that upon every re-admission of a patient, the case should be again entered in the register; though it will be desirable, that every such re-admitted case should be distinguished, as in the accompanying form, by an asterisk, or in some other way, so that the re-admissions may be readily identified.

In order to ensure as much uniformity in the manner of keeping the register as is attainable, a few cases are given as specimens.

*N. B. Sheets of this Register, in numbers sufficient to form Books of any size, (which should become the property of the respective Institutions,) may be had, at cost price, on application to Dr. HITCH, of the Asylum, Gloucester, Secretary to the Association.*

RECOMMENDATIONS  
FOR FILLING UP THE  
REGISTER OF CASES,

AGREED TO AT THE  
ANNUAL MEETING OF THE ASSOCIATION OF MEDICAL OFFICERS OF HOSPITALS FOR THE INSANE,  
Held at the Asylum, Lancaster, June 2nd and 3rd, 1842.

1. In order to obtain accurate information as to the various particulars of the accompanying form of Register, not falling under actual observation, it is desirable that the several institutions should be provided with a set of *Queries under similar heads with those of the register*, which in every case should be furnished to, and filled up by, the Friends or Guardians of the Patient, at the time of admission.

2. In filling up the Register, it is particularly recommended that the "duration of disorder on admission" should be ascertained as accurately as possible, and that the cases should be distributed into four classes in reference to such duration. Thus discriminated, the facts observed in different Asylums, when exhibited in annual reports or otherwise, will be fairly susceptible of comparison with each other. The following are the classes recommended.

CLASS 1. Cases of the first attack, of not more than three months' duration.

CLASS 2. Cases of the first attack, of more than three, but of not more than twelve months' duration.

CLASS 3. Cases not of the first attack, and of not more than twelve months' duration.

CLASS 4. Cases whether of the first attack or not, of more than twelve months' duration.

3. As regards the "form of mental disorder," it will be desirable, as much as may be, to refer every case to one of the following primary forms:

1. MANIA.

2. MELANCHOLIA.

3. MONOMANIA.

4. MORAL INSANITY.

5. DEMENTIA, under the two heads of Imbecility and Fatuity.

6. CONGENITAL IDIOTCY.

*Criminal Lunatics* should be further distinguished as such.

4. It is also recommended, that in filling up the column of the "result," one of the following terms should always be employed: 1. "*Recovered*," or "*Cured*;" 2. "*Relieved*," or "*Improved*;" 3. "*Unimproved*;" and 4. "*Died*;" and that any other particulars in reference to the discharge, as, e.g., by "*escape*," or by the "*desire of friends*," should in no case supersede this essential information.

5. It need scarcely be observed, that upon every re-admission of a patient, the case should be again entered in the register; though it will be desirable, that every such re-admitted case should be distinguished, as in the accompanying form, by an asterisk, or in some other way, so that the re-admissions may be readily identified.

In order to ensure as much uniformity in the manner of keeping the register as is attainable, a few cases are given as specimens.

N. B. *Sheets of this Register, in numbers sufficient to form Books of any size, (which should become the property of the respective Institutions,) may be had, at cost price, on application to Dr. HITCH, of the Asylum, GLOUCESTER, Secretary to the Association.*
