Sir,

London October 28th 1808

By order of my friend. Mr J. Evans the above engine was sent yesterday to Gun Shot wharf to be shipped on board the Thirsk Joseph Winn. master which hope will arrive safe and give satisfaction.

Sir. I have to observe you ought to have 2-100ft lengths of leather pipe & Dozⁿ of Buckets to be prepared for any fire situation a fire man can be in. if you have pipes of not good a pipe for the engine you will by that loose a good deal of the force of the engine. please to observe the engine takes out of its frame for the convenience of taking into the inside of a building or up stairs if wanted where a large engine cannot go -- it must be worked by 3 or 4 men. please to observe the price charged is for ready money and no deduction.

I am Sir
your Obed^t Serv^t
J. P. Rowntree

P.S. I can send you leather pipe with screws to fit the engine at any time you please to order it. Buckets &c.

William Lloyd Garrison
