Sunday June 6th 80
 Thoughts on Insanity
 by an inmate of a
 Retreat
 To give a good definition of
 a thing is not an easy task,
 and is a faculty possessed
 only by such men as
 Dr Johnson & lexicographers
 generally. It is so to speak
 to focus the information
 on any given subject into
 one point - and as "brevity
 is the soul of wit" so is it
 also of a definition.
 The writer is therefore
 confronted with a difficulty
 at the outset - viz in defining
 the term insanity. As the
 prefix in appears to have
 a deprivative signification

Easiest to say a
 about "Sanity"
 a little Latin comes
 viz "Sanitas"
 the motto
 "is Corpore Sano"
 into Latin as
 as nearly as
 what is meant by
 "Soundness" of
 therefore a "Sound
 a Sound body"
 meant by "Sanity"
 converse of this is
 by the prefix "in"
 creates the absence
 & in its generally
 sense is applied
 b. The question
 how may a man be
 be thoroughly "sane"
 may be shaped
 thus.

"When in addition to the
 normal & proper performance
 of the functions of his
 physical frame - his
 mental, moral, intellectual
 & spiritual faculties are
 directed in their proper course
 the man is in good health
 or sane in the highest
 sense of the word."

Or in other words (as order is
 heaven's first law) his powers
 of body & mind are directed
 in the channels in which his
 Creator intended they should
 be, guided by the law
 otherwise called the Decalogue
 and which comprises 2 rules
 of duty viz to his God & his
 neighbour, and which was
 epitomized by the great
 Teacher into those "12 command
 ments on which hang the Law
 and the prophets"

are called shrewdness and tact by man, and while his maker sees him as he is, man sees him as he appears to be. There is not a wide difference between a wrong path that is visible and one that is invisible and perhaps the cause of most instances of religious insanity is to be traced to the patient in some form or other trying to serve God & man and or trimming between the two.

It is admitted that a man's sanity or insanity is judged of by his fellow man taking cognizance of his words & actions, and it is here that the great responsibility rests in judging whether a man is sane or not. While Eccentricity

is not perfect and not be said for as we all know people who are citizens & some better than others to be quite out of proportion of an impressive and kind Eccentric. if the meaning is evidently from Eccentric the center must be a law in every circle has as well as its do in most & social law, the norma a rule, a true circle has and when the is not in the ex

 admitted that a mans
 insanity is judged
 fellow man taking
 ce of his words &
 and it is here that
 responsibility rests
 ing whether a man is
 st. While Eccentricity

is not perfect sanity it can
 not be said to be insanity
 as we all know Eccentric
 people who are safe & good
 citizens & some of them far
 better than those who profess
 to be quite "ant fait" in all the
 punctations of modern demagoguery
 In passing let us analyse the
 kind Eccentric. On the face of
 it the meaning is evident. It is
 evidently from "E" out of and
 centric the centre. Now it
 must be a law in geometry that
 every circle has its true centre
 as well as its circumference &
 so in moral & intellectual &
 social law, the normal (from
 norma a rule) type is that of
 a true circle with a true centre
 and when the axis of a wheel
 is not in the centre the motion

is irregular or Eccentric, so when the judgment is warped in any degree the actions are also in the same degree, Eccentric though judged from our standpoint the Eccentricity is not noticed unless manifested in some divergence from common use & custom I will give an instance of Eccentricity but it will perhaps be better to define the difference between Insanity & Eccentricity.

Insanity maybe regarded as Mental aberration or disease Eccentricity as slight mental deformity not the deformity of idiocy - but the deformity that is the result of habit, in the same way as the habit of stooping or biting the nails is acquired. It is said that "Every good man has his hobby" & so it is with every Eccentric

man. He will be shaking hands with you. He is a great stick with points, that man would let go are worth. He has peculiar way of doing which in other people is no better than ordinary. I will advise a friend going to see him - suddenly & unannounced. He is unceremoniously to peculiar & he is infrequently set off street while the person is walking. He is considered harmless. As far as I know Eccentric often the best of people. Eccentricities do not consist of their being as large.

man: He will never think of
 shaking hands with his glove on
 He is a great stickler for certain
 little points, that the average
 man would let go for what they
 are worth. He has his own
 peculiar way of doing things
 which in other people's opinion are
 no better than ordinary. He will
 never advise a friend when he is
 going to see him - but pop on him
 suddenly & unannounced & depart as
 unceremoniously. His very gait
 is peculiar & he will not
 infrequently set off running in the
 street while the friend at his side
 is walking. He is nevertheless
 considered harmless, in fact as
 far as I know eccentric people are
 often the best of people, and their
 eccentricities do not interfere with the
 comfort of their neighbors & society
 as large.

maybe regarded as
 venation or disease
 ty as ^{slight} mental deformity
 deformity of idiocy - but
 nity that is the result
 in the same way as
 of stooping or being the
 required. His said

maybe unity without
 ty (as in the case of
 profess & call themselves
 is. in the essential
 doctrines of the One
 otter Excluding the
 tion & opinion - as to
 much government & modes
 es. so the ideal of
 that people may agree
 to differ in opinion &
 color systems there
 greater & lesser
 - from the slow to the
 y. so in society there are
 tion & intelligences.
 ay in its true ideal
 to a bag of shot-corns
 is perfect in itself & free
 the others do but they
 compact & unanymous
 whole.

in the same way that
 chemical philosophers conceive
 the nature of the molecules of
 which atoms are composed -
 viz perfect spheres - indivisible in
 their ultimate selves & each Element
 possessing its own specific weight
 so that while the metal Potassium
 will float on water - gold is nearly
 20 times as heavy as water. so that
 potassium may be compared to
 the brother of low degree & gold
 to the one of high.

Now if some of these shot-corns
 were flattened out with a hammer
 & allowed to remain among the
 others they would interfere with the
 harmonious movement of all in
 contact with them, & so in this
 way it is necessary in society to
 place to one side or shove those
 members who are through mental
 incapacity unable to mix them
 without compromising the comfort
 and success of their fellow men
 and women

This removal from Society of the insane originates generally in the friends & near relatives of the patient, & the motives for incarcerating their friends are dictated by the instinct of self-preservation - and also of preventing harm to the patient himself and to others. Recognizing the uncertainty of the morbid the legislature has provided for the cases of those who would not be able to pay for themselves & whose friends could not afford to defray the expense of private attendants these are supported out of the rates in County Lunatic Asylums, while the Union Workhouse receives the imbecile & idiotic poor.

There is a vast improvement in the treatment of all classes of the insane & degrees of the indisposition. For while 50 years ago it was the custom to put the poor sufferer in irons & on a bed of straw

ain point, the less is
suffering. There
Dante which will
that I mean 112
arm but feeling well."
patient's mental vision
clear to retain a
of the loss he has sustained
reasoning faculties are
impaired) and that ~~the~~
in society & his
to speak of writing the
ed out to the completions
of life - is dashes to the
that he is so to speak
a living death - that
mercy or otherwise of
that in many instances
grossly wronged
- then it is a man
suffers

I this suffering is such that
the reaction from its intensity
mercifully (so to speak) destroys
his Stoicism & he lapses into
a state of stolid indifference and
incurable gloom. This latter
stage is the pall thrown over
the face of all things bright and
beautiful below. The saying of
the great Dramatist that
"Violent Delights have violent Ends"
is also true of violent pains but
in some instances the word violent
may be replaced by merciful for
it will be admitted that sudden
& violent attacks of mental aberration
are often suddenly removed.
They resemble the thunder storm
when afterwards the ozonized
air is inhaled in all its
thrilling & invigorating purity
and the bright shining of the
sun again illumines this
beautiful world. It would
occupy more time & space than
the author has at present
at his disposal to Classify
the various kinds & degrees of
insanity. Of course there

1.

Composition Powder

in popular Esteem for a cold &c.

Take. Pink Laysine
" Bistmart Each ʒij
" Cloves
" Ginger " ʒij
" Bay Berries
" Cascarella Bark Each ʒij
" Amala Campane ʒij

Mix.

One teaspoonful to be infused ʒij in a
breakfast cup of boiling water - sweetened with
sugar & the clear liquid taken at bed time.

Syringe for Weak Nerves

Spirit of Sulphuric Ether

Syring Bark Comp^d Each ʒij

Concentrated Decoction of Aloes ʒij

Mix. Take one teaspoonful in water
3 times a day

Diarrhoea Mixtures

Take. Prepared Chalk ʒss
Tinct Calceola ʒss
Chlorodyne ʒss

(No 1) Laudanum ʒss
Chloric Ether ʒss
Water ʒss

One or two tablespoonfuls Every 4 hours

(No 2) Take.

Tincture of Nuttall 3/4 ʒ

" " Ginger 1/4 ʒ

R Sal Volatile ʒss

Laudanum 1/4 ʒ

Camphor Water ʒss

One or two tablespoonfuls Every 4 hours

No 3.

Aromatic Sulphuric Acid ʒss

Tinct Kino ʒss

Chlorodyne ʒss Laudanum ʒss

Water ʒss

One or two tablespoonfuls Every 4 hours.

When there is violent pain
Give two tablespoonfuls of Castor Oil
at 15 drops Laudanum. If there is no pain
Give Soda or Citric Water.

Mixture for Hysteria

and the nervousness attendant on some forms of Indigestion
Take.

- Inchm of Hops
- Volatile Tincture of Valerian
- Tinct Lavender
- " Chloroform Each ℥oz
- ℥ of Sulphuric Ether 1oz
- " " Rosemary 1/4oz
- Dilution of Ales to make ℥oz.

Mix. Take a teaspoonful in water 3 times a day

Pills for Hysteria

Take.

- Pill of Galbanum
- " " Assafetida
- " " Aloes & Myrrh
- " " Comp^d Rhubarb. Each 1 scruple

Make into 18 pills

"one Every night"

When there is violent pain
2m. ℥. of Colicomp^d of Castor Oil
to 10 dr. the same
and 1/2 dr. of the same
and 1/2 dr. of the same

18m

Stains for Wood

(Mahogany)

Burnt Sesame 2oz

Soda 1oz

Boiling water $\frac{1}{2}$ pintNatural

Vandyke Brown 1oz

Soda 1oz

Boiling water $\frac{1}{2}$ pt.Rose Wood

Cannood 1oz

Boiling water $\frac{1}{2}$ pt.Light Oak

Raw Sesame 2oz

Boiling water $\frac{1}{2}$ pt.Dark Oak

Raw Sesame 1oz

Vandyke Brown 1oz

Boiling water $\frac{1}{2}$ pt.

Soda 1oz.

Cigarettes for Asthma

Ammonium Leaves. # wrapped in Cigarette paper
Smoke one when the fit is on. or better in filter paper

Fumigating Paper for Asthma

Inclure of Gum Benzoin (Simple) 1/2 oz
Nitrate of Potass 1 oz
Water 3 ozs.

Soak clean white blotting paper in the above
dry & burn a piece on a plate when the fit is on

Mixture for Asthma

Inclure of Digitalis 1 dram
" Ginger 2 drms
Ammoniacum Mixture 4 oz
Essence of Lobelia 1 dram
Oxymel Squills 1 oz
Spirac Wine 1/4 oz
Water to 8 oz

Mix Take one tablespoonful Every 3 or 4 hours
in water.

8.

Black Ink

Bruised Gallo 1 lb

Logwood. 3 lbs

Bruised Gum 1 lb

Boiling Water 2 gals

Sulphate of Iron 2 lbs.

Alcoves 2 oz

Boil gently for 2 hours & strain

Brilliant Red Ink

Sizolu Carmine in Strongest Ammonia

& add mucilage to give it a body

Expose to the air to drive off the pungency

White Ink

Effective on Black Surfaces

Flake White 1 oz

Sars Gum Arabic 1/4 oz

Water q.s.

Disinfectants

1. Carbolic Acid 1 to 40 Water
for Drains Wounds &c

2. Chlorinated Lime for Rooms Closets &c
to be used dry - or if quick Evolution
of Chlorine is required add water &
Oil of Vitriol when the gas will be given off.

3. Condy's Fluid a Solution of Permanganate
of Potash 8 grs to 1oz Distilled Water
about 1 to 40 for disinfecting

4. Chloratum a Solution of Chloride of
Mercurium

5. Salicylic Acid

6. To disinfect Clothing
Boil with Solution of Chloride of Lime
or Carbolic Acid or heat in an
oven just short of scorching.

Gold Ink

Best Gold + Bronze

+ Thin Mucilage of Gum Arabic

Mix

Each a Sufficiency

Silver Ink

Best Silver + Bronze +

Thin Mucilage of Gum Arabic

Each a Sufficiency

Bronze Ink

Best Copper + Bronze

Thin Mucilage of Gum Each a Sufficiency

Coloured Inks

generally

May be made by dissolving the
various Aniline Dyes in hot water
and adding a little Mucilage

To Moving & Disinfecting Rooms.

Use about 3 lbs of Roll Brimstone
to a moderate sized room, on a large stand
of hot coals, & leave the window so that it
can be easily opened when required

Retire immediately, stopping the
curtains of the door & after 3 hours open
~~door~~ & window to let out the fumes

Lime & Green Copperas is the best wash
for walls (dial) after infection

Effervescing Powder for
Stomach.

- Dried Epsom Salt 2oz
- Soot Ginger 1/4oz
- Carbonate Soda 2oz
- Tartaric Acid 1oz

Mix

Take one or two teaspoonful
in 1/2 a tumbler of water.

Grime all the Spice
 before Maceration for 28 days
 strain through flann sieve

Cloves

Pepper Black

" White

" Clove

" Cayenne

" Long Each 2oz

Mustard Seed $\frac{1}{2}$ lb.

Lemons sliced 6

Oranges " 3

Ginger $\frac{1}{2}$ lb.

Garlic $\frac{1}{2}$ lb.

Common Onions $\frac{1}{2}$ lb.

Coriander " 1 lb.

Mushroom Catchup

Nutmeg " Each 1 quart

Chicory 1 lb.

Nutmegs 1oz

Cassia

Mace Each 2oz

Orris Root 4oz

Burnt Sugar 1 lb.

Port 1 bottle

Vinegar 3 gallons

Mixture for 2nd Symptoms

Take

Solution of Mercuric Iodide 2oz

Decoction of Serpentina 4oz

Tincture of Opium ʒ4oz

" " Chloritta ʒ2oz

Decoction of Sarsaparilla to 12 ozs.

Mix

Take one tablespoonful 3 times a day

Pills for 2nd riss

Blue Pill

Plummers Pill

R Guaiacum Each 1 scruple

Make 12 pills

Take one every night

Fumigating Pastiles

Prunella ʒ4oz

" Charcoal 1oz

" Cammaron ʒ4oz

" Cloves ʒ4oz

Soft Cassia ʒ2oz

" Gum ʒ4oz

Mix into small cones

with water & dry by
gentle heat

Bug Poison

Mercuric Iodide 1oz
 Hydrochloric Acid 2oz
 Oil Oreganum $\frac{1}{4}$ oz
 Water $\frac{1}{2}$ pint

Dissolve the sublimate in the acid
 & then add the others

Brush the crevices of floors, skirting boards &c
 & afterwards scrub down with Common
 Carbolic Soap.

Milk of Sulphur

(test for its purity)

Burn a little on the point of a Knife & if it
 is pure it will leave no residue - if impure
 leaves ash of Sulphate of Lime, showing that
 Sulphuric Acid instead of Hydrochloric has
 been used in its manufacture

Pig Powders

Black Antimony

Titre

Black Sulphur

Amureck

Aniseed Each $\frac{1}{4}$ oz

1oz

Give one twice a week

" Rosemary 10 drops.

Mix. Add a wine bottleful of soft water
to the above for Hair Wash.

#

Remarks on Urine

This important secretion should be Examined as an index to the state of health or otherwise and is one of the surest guides to the medical man

Even those who have not had the benefit of a Medical Education - have been very successful quacks in the treatment of disease through the study of the quality of the urine. I have been called Water Doctors Water Castors &c. Owing to scarcity of time & the sometimes unpleasant Effluvia, Medical men do not pay the attention to this Excretion they should - but any pharmacist with whom they do business would examine on an average 1 urine in 5 minutes.

Let any patient dissatisfied with his state of body take the urine he passes or bring to a Chemist & have it tested for the following 4 substances
1 Albumen 2 Sugar. 3 Bile 4 Phosphates & Urates.

The 3 first are serious but the remedies indicated are clear & their aid to diagnosis of a complaint are invaluable. Bile is not a frequent constituent. Phosphates & Urates should be present but not in excess.

The patient may with ease test urine for himself by attention to following particulars

Lime Cream
for the Hair
#

Oil of Almonds 3oz
Saccharated Solution of Lime 1oz
of Lemon 30 drops
Oil of Geranium 5 drops
Distilled water to fill 6oz Bottle.

Hair Wash

Powd Borax $\frac{1}{4}$ oz
Salt of Tartar $\frac{1}{2}$ dram
Tincture of Flies $\frac{1}{2}$ oz
of Rosemary $\frac{1}{4}$ oz
Eau de Cologne $\frac{1}{2}$ oz
Glycerine $\frac{1}{2}$ oz
water to 8ozs.
Mix for Hair wash
#

Directions for Testing Urine

1. For Albumen (indicating debility & waste of tissue)

Simply boil about 2 teaspoonfuls of morning urine in a test tube over a spirit lamp & if curds form therein like white of egg (which is pure albumen) the urine is Albuminous - confirm by adding a few drops Nitric Acid - which will not clear it ^{if Albuminous} tho' if it is some form of salt - it will be dissolved

2nd For Sugar Indicating diabetes.

Test. To about 1 inch of urine in test tube add an Equal quantity of Solution of Cupric Sulphate & a like quantity of Solution of Potash - Boil for 5 minutes & if a copper coloured dust deposit falls the urine contains Sugar

3. In Bile. use microscope. Chemistry complicated

4. Stamen use microscope. of very rare occurrence

5. Phosphates & Urates Except in abnormal quantity may be disregarded - but the treatment is simple for treatment see page 38.

Best Application for
Pediculi. (Lice) on the Head.

Stassare Seed 4oz
 Boil in 1 quart water down to 1 pint
 & use every night

Cement for Leather
 Take.

India Rubber 1oz

 Mix for 20 pills
 One daily with dinner

Treatment of Albuminuria or Bright's Disease

Generous diet. Tonic restorative & Chalybeate medicine
Cheerful Society - light duties - foot & horse Exercise
Short of fatigue & most important Sponging with
Sea water or with Seabell & water every morning

Mixture page 59 is a good one & something
the Sp nitre. Avoid malt liquor & substitute Claret.

Treatment of Diabetes

The symptoms are often accompanied with an
inordinate Craving for food & drink & Excessive
secretion of hot smelling urine - with loss of weight
& emaciation & tendency to gangrene

It is a lingering & insidious complaint & is
always the beginning of the end unless promptly
and properly treated.

Treatment same as for Bright's Disease
Especially eschewing Saccharine & Amylaceous diet
If secretion of urine is Excessive try Symp on page 40
Beverage. Cocoa Spice (Cadburys) - Claret.

Be particular to sponge body & avoid sweating
on the complaint if possible

Recipe for an old Cough

Finely powdered Spermaceat 1 drachm

" " Gum Ammoniacum 2 scruples

Yolk of One Egg.

Sincture of Digitalis 1 dram

" " Squills 1/4 oz

Sarcocolla 1/2 oz

Syrup Tolu 1 oz

Water to 8 ozs. Incubated *De Suisa* 1/2 oz

Take. One tablespoonful every 3 hours

apply a Blister

3 inches in diameter to

chest.

Treatment of Spermatorrhoea

This exists generally in the imagination of the patient only - i.e. the idea that semen passes off in the urine & as stool. The trashy quackery advertised in the shape of books must be thrown into the fire & the mind occupied with useful employment. Emersion may be prevented by avoiding lying on the back - to prevent this tie a cotton-reeb in the small of the back.

Paint the penis inch round with Liquid Blister & observe sponging the body.

Treatment of Bilious Wind

As for Albuminuria avoiding Iron Medicines & take Mixture for Liver on page 95.

Substituting Bicarbonate of potash for Bromide

Treatment for Urates & Phosphates

These when Excessive produce pain as Gravel rendered soluble by Mixture on page 42

Take a teaspoonful in a wineglass of water
when required

Prayer for the recovery of the
 Prince of Wales Dec 1871
 Impromptu on Oliver's Mt Scarborough

1 A heavy weight is on the Nations heart
 Anxiously depicted in Each face
 Let us awake from homes of men depart
 And commune with the Maker of the race

2 Upon the brow of this majestic mound
 The Sky a Canopy above our head.
 Ocean & air beneath & all around
 Let us in prayer to heaven our hands spread

3 For Albin's hope is at the point of death
 Her noblest born to soon prove a prey
 And may we now have rendered up his breath
 To Him who gave it and have passed away.

4 "Spare him Oh God" ten thousand voices cry
 Of thine Elect ones on this holy day
 Spare him oh Show whose throne is set on high
 And shield his head throughout the fiery fray -

5 Spare him unto his widow'd mother queen
 Spare him unto his gentle princess wife
 Stand thou his soul & bitter death between
 Thou Lord with whom the issues are of life -

6 Hold him as in the hollow of Thine hand
 Thy great salvation cause him now to see
 And teach him what is hard to understand
 "My son it is in love I chasten thee". Amen

Also
Narc
Belladonna
Plaster.

Gazogene Powders.

A gazogene is a good investment as 3 pints of Aerated water can be made for 3^d & the like quantity of Soda water would cost 4 or 1/6.

(Directions for a 3 pint machine)

Take Bicarbonate Potash 1/4 oz

(1) Bicarbonate Soda 3/4 oz

(Mix for Blue paper)

(2) Tartaric Acid in Small Crystals 3/4 oz

(in White paper)

The water is put in the upper bulb & the powders into the lower. After connecting the 2. the machine is agitated and sufficient water goes down the tube to cause the powders to react on each other & develop Carbonic Acid gas which charges the water in the upper bulb. When effervescence has ceased in the lower bulb the aerated water is ready to be drawn off & drunk or mixed with Brandy, Wine, or fruit Syrups.

Crystals of Tartaric acid are used to prevent the too sudden disengagement of gas which might burst the machine if the powder were used. The water in the upper bulb is simply Aerated but before being put in it may receive 10 to 15 grs per 1/2 pint of Bicarbonate of Soda or Potash & with them some Potash or Soda water respectively

Place in hot copper plates

to cause it to granulate.

Acrostic on Scarborough Castle

Stronghold ancient grim & frowning
 Casting shadows on the sea
 And the rock in grandeur crowning
 Royal truck of Constance
 Beacon art thou to sea faring
 Ocean lifted human freight
 Ruddy beams of evening flaring
 On thy crested giddy height
 Underneath & all around thee
 Great billows boom & roar
 Huge white breakers in their fury

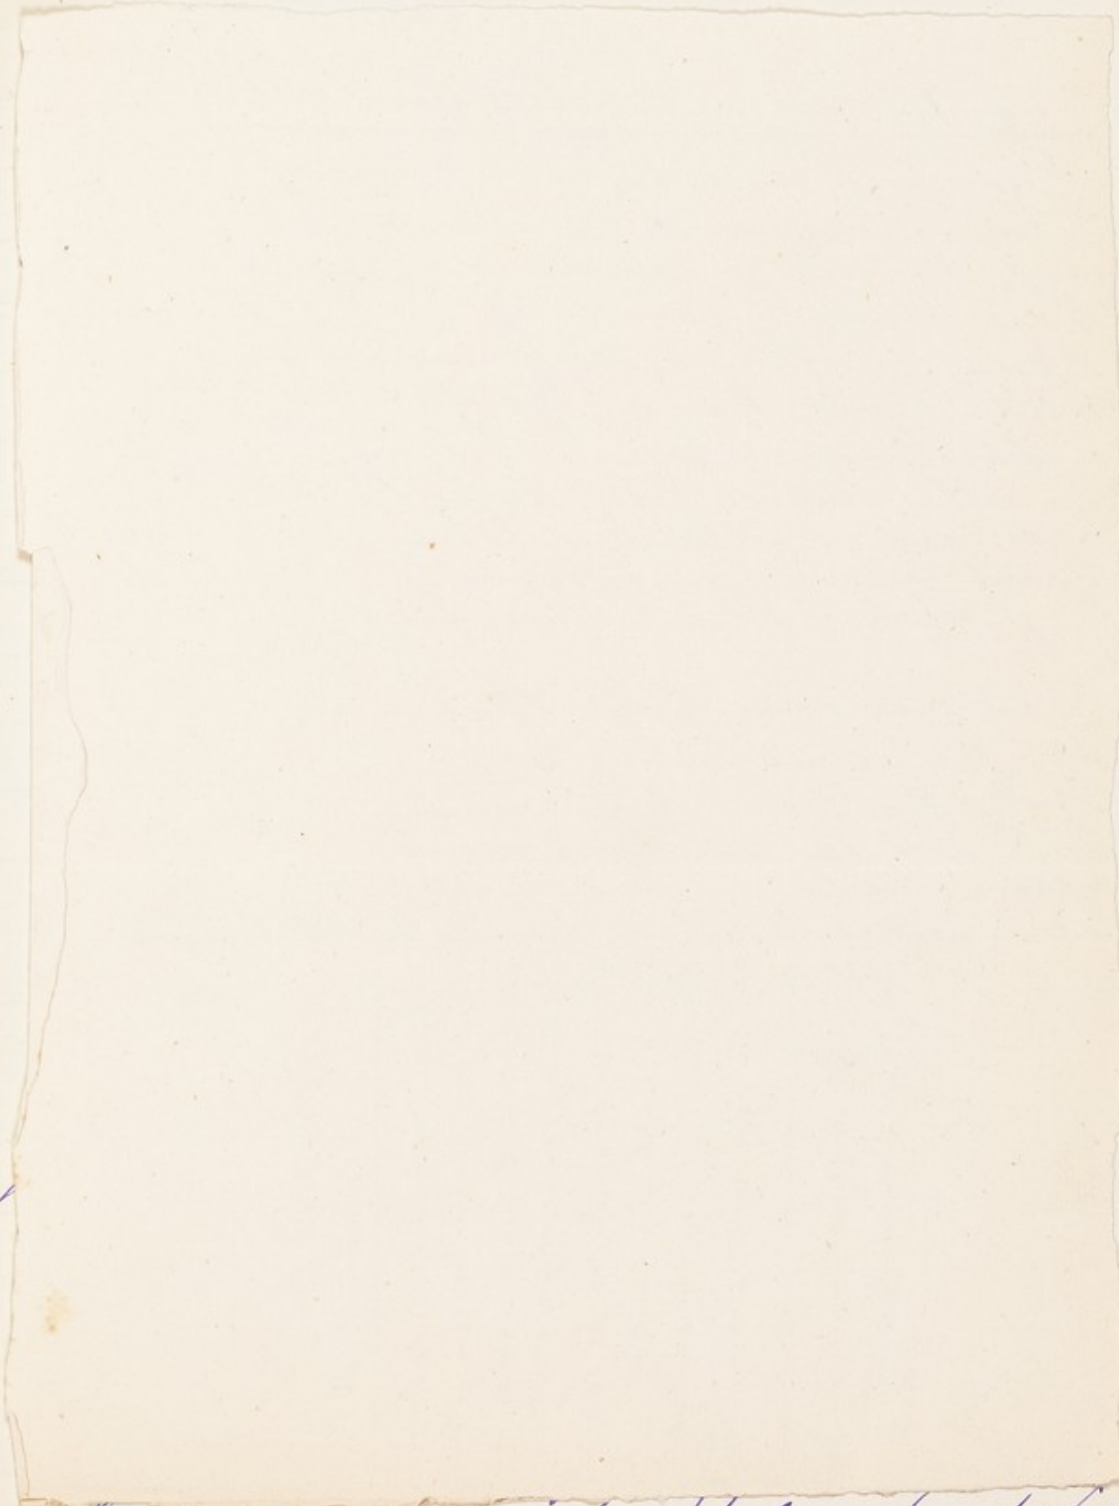

Chase each other to the shore
 All thy scenes historic rising
 Swell the marvel of the mind
 Tell us of thy fall surprising
 Lesson teaching to mankind
 E. on castles doom will leave no wreck behind

Acrostic on
 Scarborough

Search crevices feet of space
 Can you find a further place
 And a shelter to enhance
 Recre my opinion for a space
 Brief it may be for too brief
 It is for long to leave to stay
 Packing for me such relief
 On the sea. Wish getting by
 In the heave can be spot boat
 Fortlike charms than thy scarred
 No sweet love who know thee

for Negatives.

White Shellac 4oz

Gum Arabic 1oz

Amber Resin 1/2oz

Methylated Spirit 8oz

Naphtha 8oz

Mix & dissolve

Ginger Beer Unfermented

Quantity for 3 doz Bottles.

- Take Sulphate Alumina 200grs
- Bicarbonate Potash 1 1/2 oz
- " Soda 1/2 oz
- Free Acetic 1 oz
- Sugar 20 oz.

Fill up the bottles with an inch of the neck -

Water 2 1/2 gallons. Dissolve for Solution

- ~~Essence~~ Juice of Lemon 18 drops
- Essence of Peppermint 3/4 oz
- Must Cayenne 36 drops
- Sweet Sp. White 1 1/2 oz

Measure 1/2 dram Liquid into Each bottle using a 1/2 drachm bottle as a measure.

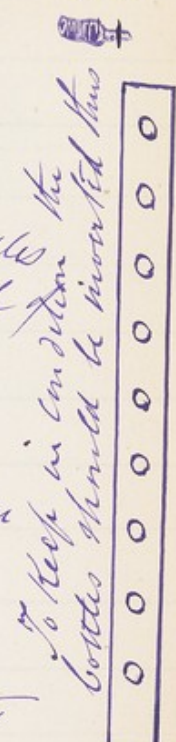

Mix for Essence

Small Crystals of Tartaric Acid about 30s.
Drop 30 grains of the Acid into Each bottle & tie down

Have several sheets fitted with holes to secure the corks.

Get the Chemist of whom you buy the ingredients to weigh 30 grains of the acid as a sample - & the quantity may then be measured in a tumbler - if the crystals are small. (Ask for Tartaric Acid suitable for fizzy juices.)

N.B. The reason why the Essence is not mixed with the Solution is that it has a tendency to rise to the surface

Best Method for Pickles

Boil the vegetables for 5 minutes ^{in water} crack the spices before pouring on the vinegar which should be added cold.

For each 3 gallons of vinegar
use the following quantity of spice

Long Pepper

Cheap Aquarium

Procure a large bell shaped facing glass
and have a stand turned to receive it
& consult a book on the subject of Aquariums

A piece of cane grooved & blacked
will give a nice finish to the rough edge of
the glass.

Lines addressed
to a Kitten by A. J.

Pretty little member of the feline race
Basking in the glowing warmth before the fire place
I love to watch your gambols & see your head incline
As with your pretty knowing looks my thoughts you
might divine

Play and dance & frolic - take your fill of fun
Wheel about the bobbins - scamper jump & run
Hide behind the armchair & under the foot stool
Then skip away in merry play "like a trout let in a pool"

The lines have fallen to you in my pleasant places
Not every little kitten has so many charms & graces
Not every little grinneth has so much of good surrounding
At me so near I mistress dear & nice new milk abounding

How many of your kindred have met a watery grave
Since you were born they have been borne & sunk beneath
Some have met death within a space had nature ^{the have} to satisfy
And now lie pale without the pale of civilized society.

Take the advice I give you my pretty little pet
And do not stray too far away as there is danger yet
Don't run away from your mamma & keep aloof
And then you'll be a good receive & eat the ^{from Minnie} tribe that's

Who that could treat thee other than with ^{finny} ^{tenderness & care}
And thou repayst as best thou can with that
Thou sayst "tho I am wayward yet still what matters ^{sweet complacent} ^{are}
tho I am wild like a wayward child I shall soon be a ^{that} ^{cat}"

not
generously

Substances in

Eye Ear & Nose

Eye

Roll the lid back on a pencil or pen-holder & use a lens if necessary

Having discovered the source of
Evil - pick it off with a wet Camels hair
brush. Let sneezing be promoted
& for small substances try drawing the upper
lid as far as possible down over the lower

Sometimes metal filings will stick in the
Substance of the eye. a Surgeon must then be
consulted.

In Eye diseases Dr Taylor of Nottingham is clever
also for different operations

Ear & Nose.

In the absence of Instruments use a
hair pin being careful not to push the
foreign body further in.

Good Ho Spanish gate, York have a
fine instrument for this purpose

Tooth Stopping Amalgam

File a 3^d piece with a fine file & work up the silver raspings into a paste with a little mercury & fill in the cavity of the tooth having previously freed it from food by means of cotton wool.

N.B. Do not stop a tooth when it aches but destroy the sensibility of the nerve with a little carbolic acid or Nitrate of Silver

Ozaron Oil for Burns & Scalds

Olive Oil

Linseed Oil Each 2*ss*

Good Lime Water 4*oz*

Mix. Apply on cotton wool & Exclude air

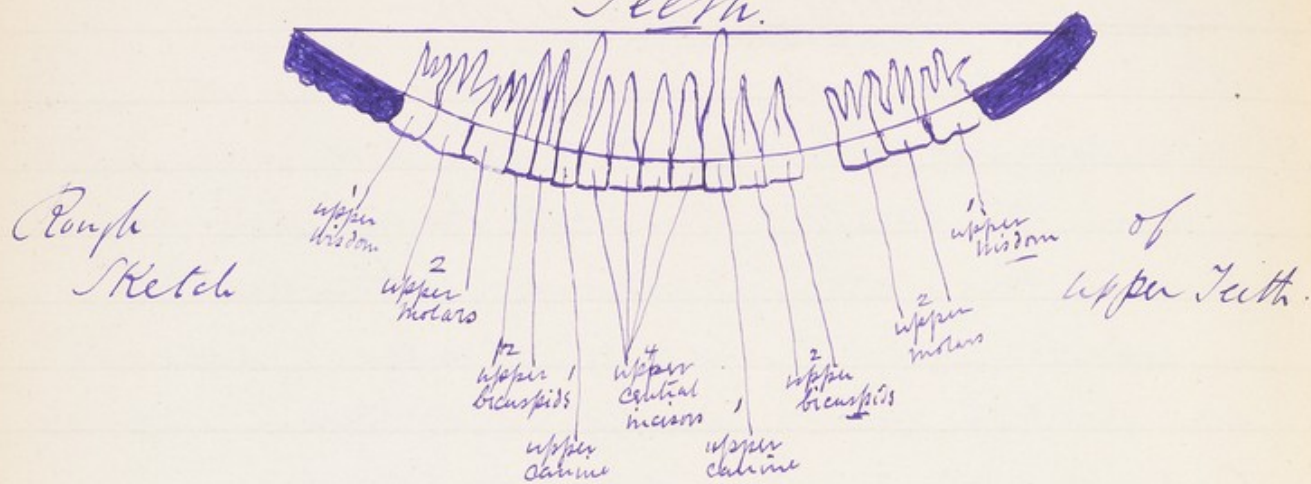

Application for Burns & Scalds to prevent Gangrene

Carbolic Acid Crystals 1*ss*

Grinded & added to 4*oz* Olive Oil (hot)

Shake up well & apply on Lint.

Practical Limits on the Extraction of Teeth.

The teeth of the lower jaw correspond to the upper with this exception that the lower molars & lower wisdom teeth have only 2 fangs while the upper ones have 3. All the teeth are more or less hedge shaped in the root except the central incisors and these have roundish fangs. These can therefore be drawn not only with a pull but also with a rotary motion of the instrument or a twist. Whereas to attempt to turn any of the other teeth in the socket results in a certain smash. To draw teeth successfully & with the minimum of pain to the sufferer 7 or 8 instruments are absolutely required. The lower wisdom instrument will answer for the upper. The instruments required are 1 Central incisor 2 upper Bicuspids 3 upper molar right 4 upper molar left 5 lower wisdom 6 lower incisors 7 lower bicuspids 8 lower molar. 9 Roots (upper) 10 Roots Lower. 11 Key. ^{see} 188

188.

The right & left hand teeth are such as are right & left to the patient & consequently left & right to the operator
The only teeth varying in right & left are the upper molars
The 3 fangs are disposed thus. 2 are next the cheek and the 3rd is towards the roof of the mouth thus.

In drawing the upper molars it is best to pull towards the cheek as least resistance is offered that way for the single fang gives way sooner than the 2 would for these latter are wedge shaped the thick end being next cheek
A dentist once observed to the writer "Shrust the instrument on as if you expected to see it come through the skull it is very mistaken kindness to put it on gently"

The easiest teeth to draw are the upper front there being room in the jaw maybe twisted as well as pulled

The Canines are most difficult & require great determination on both sides & strength of wrist and jaw. get a good high grip & draw towards the cheek. The upper molars require feeling for until the claws of the instrument embrace the root of the Crown
Draw 1st towards cheek & when the single fang is dislodged pull quickly in the other direction. The upper wisdom are not so fast in as the molars having less work to perform. Beanspeds require firm high grip & slight inclination outwards.

The lower teeth are more difficult to draw than the upper
a good plan with the single fanged ones is to stand on a stool behind the patient & pull upwards -

as one right
right to the
to upper end
