### THE

# REFACE.

HIS Herbal was begun by James Newton, M. D. about 1680, and the great Affiftances be received from Abroad, and at Home, from the ablest Bomists of his Time, and his own great Abilities, Care, and many Years Study and Expence, to render it the most urious and universal of its Kind then published, may be to well known to need any Enlargement.

But confidering this Herbal might be the Work of his nunger Days, so on a Review of it in his more mature nd knowing Years, it might not please him, as he might hink, and very justly too, that then he could compose anoher of a more useful, curious, and universal Nature; and aving such good Materials before him to work on as his rst Herbal, he might therefore the more readily enter hon his other universal and compleat History of Plants, hith their Icons, comprehending all bitherto extant, with Idditions.

As his first Herbal begins with Grass, the other begins with Apples; and had he lived a few Months longer, he hight have published it compleat and entire; for at his Death he had printed his First Book of Apples, and Part the Second Book, but dying suddenly, this valuable Work as lain by till now of late.

Liber

## The PREFACE.

Liber I. De Arboribus Pomiferis; or, of Apples in gen neral, treats of above eleven Hundred different Sorts comprehending the feveral Kinds and Species of Apples his therto known; and about three Hundred of their moj principal Icons, neatly engraved on Copper-Plates.

Liber II. De Arboribus, & Fruticibus Bacciferis; or of Trees, and Shrubs bearing Berries in general, may be rather more curious and comprehensive than the First Book

Over the Icons ftand their English, and in the descriptive Part their Latin Names. Since the Icons are reduced into their proper Classes, and the Index contains the Names of each Class, it may therefore equally answer the Intention of a more general one, which might have swelled to a great Size; as you may take in at one View, by turning to its proper Class, the several Species belonging to it.

As for the antique Spelling, it is to be hoped the Reader will excufe that, fince there's no Possibility of altering it.

The capital Letters standing by the Icons denote the Authors they were taken from, as P from Perkinson' Herbal, G from Gerard's, and B from Bauhinus's, and R from Ray's, &c.
