PREFACE TO THE FIFTH EDITION.

The first edition of this List was issued in 1862, and contained the names of all the animals that had been living in the Society's Gardens at any time during the previous year, with their habitats, and the dates and modes of their acquisition.

In the second edition, issued in 1863, the animals living in the Society's Gardens from the 1st of January to the end of May of that year were given in a similar form.

In the third edition, which was completed for press on the 1st of January, 1865, the names of all specimens received by the Society during 1864 were added to the List.

In the fourth edition, issued in 1867, the names of all the vertebrated animals added to the Society's collection during the years 1865 and 1866 were inserted in their proper places; so that the List contained a complete record of all specimens of Vertebrates that had been exhibited alive in the Society's Gardens in the years 1864, 1865, and 1866.

In the present revised edition of this Catalogue I have pursued exactly the same system, and have added the names of all the vertebrated animals that we have received during the years 1867, 1868, 1869, 1870, and 1871, with the date and mode of acquisition of each specimen.

The result is a nearly complete catalogue of all the living Vertebrates received by the Society during the past ten years. It is not, however, *quite* complete, as in the first two editions the references to some of the specimens which had been lost by death or departure were struck out; but commencing from

January 1st, 1864, I believe that every specimen received will be found to have been inserted in its proper place, although there may of course have been errors in the determination of the species.

For several years it has been my practice to bring before the scientific meetings of the Society short notices of the more important accessions to the Menagerie, with the object of calling attention to such as are of special interest. These notices are subsequently printed and published in the 'Proceedings' of the Scientific Meetings. Both our 'Proceedings' and 'Transactions' also contain frequent communications referring to specimens living, or that have previously lived, in the Society's Gardens. I have thought that it would add to the value of the present Catalogue to add references to the 'Proceedings' and 'Transactions' in all these cases, so as to make the Catalogue a sort of index to numerous passages in our scientific publications that refer to specimens in the Society's collection.

When animals have been figured in our publications from specimens in the Gardens, a reference to the figure is likewise added.

The thirty woodcuts in the present Catalogue have mostly already appeared in the Society's 'Proceedings.' Some of them, however, have been kindly lent to me for the purpose of this Catalogue by the proprietors of 'Nature.'

PREFACE TO THE SIXTH EDITION.

In the present edition the names of all the specimens added to the Collection during the years 1872, 1873, 1874, and 1875 have been inserted in their proper places.

The result shows that since the commencement of the year 1861 we have exhibited specimens of 570 different species of Mammals, 1224 of Birds, 227 of Reptiles, 39 of Batrachians, and 83 of Fishes,—in all 2143 species of Vertebrated animals.

The subjoined Table of the number of Species of the principal classes of Vertebrates included in the successive editions of the Catalogues will serve to give some idea of the progressive development of the Collection :—

	First Edition, 1862.	Second Edition, 1863.	Third Edition, 1865.	Fourth Edition, 1867.	Fifth Edition, 1872.	Sixth Edition, 1877.

PREFACE TO THE SEVENTH EDITION.

The seventh edition of this List has been prepared on the same plan as that issued in 1877.

The registered additions to the Menagerie made during the last three years have been inserted in their proper places.

Many additional references have also been given to the specimens described or alluded to in the Society's 'Proceedings' and 'Transactions,' which, it is believed, will serve to make the List more useful as a work of reference.

The following Table gives the number of Species of each class of Vertebrates included in the successive editions of this Catalogue:—

	First Edition, 1862.	Second Edition, 1863.	Third Edition, 1865.	Fourth Edition, 1867.	Fifth Edition, 1872.	Sixth Edition, 1877.	Seventh Edition, 1879.
