British Red Cross Society.
First Aid Examination. March 29th. 1916.

1. Give the signs and symptoms of fracture.
Name and define the different kinds of fracture.
2. Describe the difference between arterial and venous haemorrhage.
How would you arrest haemorrhage from the following arteries :- Carotid, facial, occipital, radial, and femoral?
3. What is meant by (a) Concussion of the Brain, (b) Apoplexy, (c) Epilepsy?
Describe briefly how you would try to distinguish the three conditions.
4. Describe what you would do in the case of a man apparently drowned if you were by yourself.
