Nursing Examination. March 6. 1916
British Red Cross Society

- (1) Define the terms "aseptic" and "antiseptic", and describe briefly the preparations you would make for dressing a wound.
- (2) Describe how the temperature of the body may be taken.
Explain the following terms as applied to the temperature of the body:- normal, subnormal, pyrexia, hyper-pyrexia, crisis, lysis, and intermittent.
- (3) In the following infectious diseases give the day on which the rash appears after the initial symptoms:- Measles, Typhus fever, Enteric fever, Scarlet fever, Chicken pox, Small pox.
Describe the principle symptoms in a typical case of enteric fever.
- (4) What is secondary haemorrhage? What steps would you take to guard against it, and how treat it if it arose?
-
