*I*N this Compendium of Nosology, I have, as far as possible, confined myself to the system and the genera of my venerable master Dr. Cullen, whose memory and justly acquired reputation will be ever dear to those who studied in his school, and were honoured with his friendship. Of all the systems which have yet appeared, his for a practitioner is undoubtedly the best: yet in some few instances I have departed from him; but it has been chiefly where he hesitates himself.

My reasons for these variations, as requiring disquisitions ill suited to a Compendium, I must here omit.

The utility of classical distinctions is almost universally acknowledged; yet nothing is more difficult than to make such an arrangement as shall meet with universal approbation. It will, however, be acknowledged sufficient for every useful purpose, if we can with precision ascertain the name and nature of a disease, although we should not perfectly agree as to its proper place in a system of Nosology. Having once formed his diagnosis, the skilful practitioner will next proceed to investigate, where it is possible, the proximate cause of the disease; and where that is not to be discovered, he will pay particular attention both to the occasional and to the predis-

posing cause. In all these investigations the younger students will, I trust, receive some assistance from the Compendium now presented to the public; and with a moderate share of penetration will be enabled, in most cases, to determine what are the most judicious indications to effect a cure.

For the Compendium of Therapeutics I have been indebted principally to Drs. Duncan, Whytte, Cullen, Elliot, Berkenhout; and for some of the most efficacious formula, I must acknowledge my obligation to Dr. NANKIVELL, whose fame is too well established in our metropolis to need any eulogium from my pen.

Should this little work meet with acceptance among either the students in our hospitals,

VIII

or the medical practitioners in country villages, I shall think myself well rewarded for my trouble.

THE
CLASSES, ORDERS, GENERA,
AND
SPECIES OF DISEASE.

CLASSES,

WITH CHARACTERISTIC SYMPTOMS.

CLASS.

- | | |
|------------------|---|
| I. PYREXIÆ ---- | { After cold shivering, a frequency of pulse, with increase of heat, and especially among other impaired functions, a diminution of strength. |
| II. NEUROSES --- | { Affections of sense and motion, disturbed; without either idiopathic pyrexia, or topical disease. |
| III. CACHEXIÆ -- | { A depraved habit of body; without pyrexia, and independant of neurosis, as original diseases. |
| IV. LOCALES ---- | { Morbid affections, which are partial. |

ORDERS,

DISTINGUISHED BY THEIR SYMPTOMS.

CLASS I. PYREXIÆ.

ORDERS.

- | | |
|-----------------------------|---|
| I. <i>Febres</i> - - - - - | { Pyrexia, without primary local affection. |
| II. <i>Phlegmasiæ</i> - - | { Pyrexia, with topical pain and inflammation. The blood after venesection exhibits the buff coat. |
| III. <i>Exanthemata</i> - | { Contagious diseases, beginning with fever, and followed by an eruption on the skin. |
| IV. <i>Hæmorrhagiæ</i> - | { Pyrexia, with a discharge of blood, without any external injury, the blood on venesection exhibiting the buff coat. |
| V. <i>Profluvia</i> - - - - | { Pyrexia, with increased excretions. |

CLASS II. NEUROSES.

- | | |
|----------------------------|---|
| I. <i>Comata</i> - - - - - | { A diminution of the powers of voluntary motion, with sleep, or the senses impaired. |
|----------------------------|---|

ORDERS.

- II. *Adynamia* - - { A diminution of the involuntary motions of either vital or natural functions.
- III. *Spasmi* - - - - { A morbid contraction, or motion of muscular fibres.
- IV. *Vesania* - - - - { The judgment impaired, without either coma, or pyrexia.

CLASS III. CACHEXIÆ.

- I. *Marcores* - - - Universal emaciation.
- II. *Intumescentiæ*. General swellings.
- III. *Impetigines* - { Cachexia, deforming the external parts of the body with tumours, eruptions, &c.

CLASS IV. LOCALES.

- I. *Dysæsthesiæ* - { The senses injured, or destroyed, by the imperfection of the organs.
- II. *Dysorexia* - - { The appetite deficient, or depraved.

ORDERS.

- III. *Dyscinesiaë* -- { Motion impeded, or depraved, from an imperfection of the organ.
- IV. *Apocenosés* -- { A superabundant flux of blood, or humours, without pyrexia.
- V. *Epischéses* -- { A suppression of excretions.
- VI. *Tumores* --- { Partial swellings, without inflammation.
- VII. *Ectopia* ---- Parts displaced.
- VIII. *Dialyses* --- A solution of continuity.

GENERA,
AND THEIR SYMPTOMS.

CLASS I. PYREXIÆ.

ORDER I. FEBRES.

GENERA.

- | | | |
|------------------------------|---|---|
| 1. <i>Intermittens</i> - - - | { | Cold, hot, and sweating stages, in succession, attend each paroxysm, and are followed by an intermission, or remission. |
|------------------------------|---|---|

SPECIES

1. *quotidiana.*
2. *tertiana.*
3. *quartana.*

- | | | |
|------------------------------|---|---|
| 2. <i>Continua</i> - - - - - | { | No intermission, yet subject to exacerbations twice in one day. |
|------------------------------|---|---|

SPECIES.

1. *Synocha.* Heat increased; pulse frequent, strong, hard; urine high coloured; senses not much impaired.
2. *Typhus.* Contagious. Heat moderate; pulse quick, weak, small; senses much impaired; prostration of strength.

VARIETIES.

1. *petechialis.*
2. *mitior.*
3. *gravior.*
4. *icterodes.*

GENERA.

3. *Hectica* -----

Exacerbations at noon,
but chiefly in the even-
ing, with slight remissi-
ons in the morning, af-
ter nocturnal sweats; the
urine depositing a furfu-
raceo-lateritiussediment;
appetite good; thirst mo-
derate.

This fever is symptomatic of

1. Chlorosis.
2. Schrophula.
3. Nephralgia, &c. v. genus 31.

CLASS I. PYREXIÆ.

ORDER II. PHLEGMASIÆ.

GENERA.

4. *Phlogosis* - - - - - { Redness; heat; pain; and
tumour on the surface of
the body.

SPECIES.

1. *Phlegmone*. Inflammation of a bright red colour; tumour pointed, throbbing, and tending to suppuration.
2. *Erythema*. Inflammation of a dull red colour, vanishing upon pressure, spreading unequally, with a burning pain, and tumour scarcely perceptible, ending in disquamation, or vesicles of the skin.

The phlogosis often terminates in

1. *Impostume*.
2. *Gangrene*.
3. *Sphacelus*.

5. *Ophthalmia* - - - { Redness and pain of the
eye; intolerance of light;
with effusion of tears.

SPECIES.

1. *Ophthalmia Membranarum*. Inflammation in the coats of the eye, most commonly in the tunica conjunctiva.

SPECIES.

2. *Ophthalmia Tarsi*. Small ulcers in the sebaceous glands of the tarsus, discharging a glutinous matter.

GENERA.

6. *Phrenitis* - - - - - { Strong fever; violent head-
ach; redness of face and
eyes; impatience of light,
and noise; watchfulness;
and furious delirium.

SYMPTOMATIC.

1. exanthematica.
2. verminosa.
3. aphrodisiaca.
4. hydrophobica.
5. traumatica.
6. a dolore.

7. *Cynanche* - - - - - { Pain, and redness of the
fauces; deglutition, and
respiration, difficult.

SPECIES.

1. *Tonsillaris*, affecting the mucous membrane of the fauces, but more especially the tonsils.
2. *Maligna*, deglutition less difficult; a mucous crust of a whitish or ash-colour covers the tonsils and mucous membrane of the fauces, which are affected with spreading ulcers. These

SPECIES.

symptoms are accompanied with typhus, and followed by exanthemata.

3. *Trachealis*. Respiration difficult; cough loud; no apparent tumour in the fauces.

4. *Pharyngæa*.

5. *Parotidæa*.

SYMPTOMATIC.

1. exanthematica.

2. arthritica.

3. hepatica.

GENERA.

8. *Pneumonia* - - - - { Pyrexia; difficult respiration; cough; and pain in the thorax.

SPECIES.

1. *Peripneumonia*. The pulse not always hard, but sometimes soft; an obtuse pain in the breast; the respiration always difficult; sometimes the patient cannot breathe unless in an upright posture; the face swelled, and of a livid colour; the cough for the most part moist, frequently bloody.

2. *Pleuritis*. The pulse hard; a pungent pain in one side, aggravated during the time of inspiration; an uneasiness

when lying on one side; a most painful cough, dry in the beginning of the disease, afterwards moist, and frequently bloody.

These, if not resolved, are followed by

Vomica. Hectic; difficult respiration; cough; pain when lying on the sound side.

Empyema. The above symptoms, with remission of pain, and signs of hydrothorax.

9. <i>Carditis</i> -----	{	Pyrexia; pain in the region of the heart; anxiety; difficult breathing; cough; irregular pulse; palpitation; fainting.
--------------------------	---	--

10. <i>Peritonitis</i> ---	{	Pyrexia; pain in the abdomen, increased when erect.
----------------------------	---	---

11. <i>Gastritis</i> -----	{	Pyrexia; anxiety; heat and pain in the epigastrium, increased when any thing is taken into the stomach; vomiting; hickup; pulse small and hard; prostration of strength.
----------------------------	---	--

SPECIES.

1. *phlegmonodea*.2. *erysipelatos*a, with milder symptoms.

GENERA.

12. *Enteritis* ----- { Pyrexia ; fixed pain in the
abdomen ; costiveness ;
vomiting.

13. *Hepatitis* ----- { Pyrexia; tension and pain,
more or less acute, in the
right hypochondrium,
usually referred to the top
of the right shoulder, and
extending to the clavicle,
increased by lying on the
left side ; urine high co-
loured.

14. *Splenitis* ----- { Pyrexia; tension, heat, tu-
mour, and pain in the left
hypochondrium, increas-
ed by pressure.

15. *Nephritis* ----- { Pyrexia ; pain in the re-
gion of the kidneys, and
shooting along the course
of the ureter ; drawing up
of the testicle ; numbness
of the thigh ; vomiting ;
urine high coloured, and
discharged ; costiveness,
and colic pains.

SYMPTOMATIC.

1. calculosa.
2. arthritica.
3. purulenta.

GENERA.

- | | | |
|----------------------------|---|--|
| 16. <i>Cystitis</i> ----- | { | Pyrexia; tumour and pain in the hypogastrium; frequent and painful discharge of urine; tenesmus. |
| 17. <i>Hysteritis</i> ---- | { | Pyrexia; heat, tension, tumour, and pain in the hypogastrium; pain in the os uteri, when touched; vomiting. |
| 18. <i>Rheumatismus</i> - | { | Pyrexia; pains in the joints, increased by the action of the muscles belonging to the joint; heat on the part. The blood after venesection exhibits an inflammatory crust. |

This disease terminates in

Arthrodynia, pain in the joints without pyrexia.

SPECIES.

1. *Lumbago*, affecting chiefly the loins.
2. *Ischias*, - - - - - the hip joint.

GENERA.

19. *Odontalgia* --- Tooth-ach.20. *Podagra* -----

Pyrexia; pain in the joints, chiefly of the great toe, and especially of the hands and feet, returning at intervals: previous to the attack, the functions of the stomach are commonly disturbed.

SPECIES.

1. *regularis*.2. *atonica*.3. *retrograda*.4. *aberrans*.21. *Arthropuosis* --

Pain of the joints, or muscles, often after contusion, deep, blunt, of long continuance; little or no tumour; no inflammation; pyrexia slight at first, at last hectic; and finally terminating in abscess.

CLASS I. PYREXIÆ.

ORDER III. EXANTHEMATA.

GENERA.

22. *Erysipelas* --- { Synocha of two or three days continuance, with drowsiness most often, sometimes with delirium; pulse commonly full and hard; then *Erythema* in the face, with continuance of synocha; tending to either apoplexy, or to abscess.

SPECIES.

1. *vesiculosum*.
 2. *phlyctaenodes*.
23. *Pestis* ----- { Typhus, contagious in the extreme; prostration of strength; buboes and carbuncles; petechiæ, hemorrhage, and colliquative diarrhœa.
24. *Variola* ----- { Synocha; eruption of red pimples the third day, which on the eighth contain pus, and drying, fall off in crusts.

SPECIES.

1. *discreta*.2. *confluens*.

GENERA.

25. *Varicella* -----

Moderate synocha; pimples bearing some resemblance to *variola*, quickly forming pustules, which contain a fluid matter, and after three or four days from their first appearance desquamate, leaving no cicatrix.

26. *Rubeola* -----

Synocha; hoarseness; dry cough; sneezing; drowsiness; about the fourth day eruption of small red points, discernible by the touch, which, after three days, end in mealy desquamation. Blood, after venesection, exhibits inflammatory crust.

GENERA.

27. *Miliaria* - - - - -

Synochus; cold stage considerable; hot stage attended with anxiety and frequent sighing; sweat of a strong and peculiar smell; eruption, preceded by a sense of pricking, first on the neck and breast, of small red pimples, which in two days become white pustules, desquamate, and are succeeded by fresh pimples.

28. *Scarlatina* - - - - -

Contagious synocha; 4th day face swells, and a scarlet eruption appears on the skin in patches; which, after three or four days, ends in desquamation of the cuticle, or is succeeded by anasarca.

SPECIES.

1. *simplex* without cynanche.

2. *cynanchica*.

CLASS I. PYREXIÆ.

ORDER IV. HÆMORRHAGIÆ.

GENERA.

29. *Epistaxis* - - - - - { Bleeding at the nose, with
pain, or fulness of the
head.
30. *Hæmoptysis* - - - - - { Coughing up of florid, or
frothy blood; heat or pain
in the chest; irritation in
the larynx; saltish taste.

SPECIES.

1. *plethorica*.
2. *violenta*.
3. *phthisica*.
4. *calculosa*.
5. *vicaria*.

31. *Phthisis* - - - - - { Emaciation; debility;
cough; hectic; purulent
expectoration; hæmop-
tysis; diarrhœa.

SPECIES.

1. *hæmoptoica*.
2. *exanthematica*.
3. *chlorotica*.
4. *scrophulosa*.
5. *syphilitica*.

GENERA.

32. *Hæmorrhoids* - - - { Flux of blood from the
anus; pain there, and hæ-
morrhoids; vertigo; pain
in the loins and head-
ach.
33. *Menorrhagia* - - { A too copious menstrual
flux.

SPECIES.

1. *rubra*.
2. *abortus*.
3. *lochialis*.
4. *vitiorum*.
5. *alba*.

CLASS I. PYREXIÆ.

ORDER V. PROFLUVIA.

34. *Catarrhus* - - - - { Increased excretion of mu-
cus from the membranes
of the nose, fauces, and
bronchiæ, with pyrexia,
and attended by cough,
thirst, lassitude, and want
of appetite.

SPECIES.

1. *a frigore*.
2. *a contagio*.

SYMPTOMATIC.

1. tussis exanthematica.
2. verminosa.
3. a dentitione.
4. arthritica.

GENERA.

35. *Dysenteria* ---

Contagious pyrexia; frequent griping stools; tenesmus; stools chiefly mucus, sometimes mixed with blood, the natural fæces being retained or voided in a hardened state; loss of appetite and nausea, arising from spasmodic constriction of the colon retaining hardened fæces.

CLASS II. NEUROSES.

ORDER I. COMATA.

36. *Apoplexia* ----

Abolition, in some degree, of the powers of sense and motion, with sleep, and sometimes snoring, the respiration, and motion of the heart, remaining.

SPECIES.

1. *sanguinea*.
2. *serosa*.
3. *hydrocephalica*. In early youth, lassitude, febricula, pain in the head, then a more sluggish pulse, dilated pupils, drowsiness, and apoplexia. The sutures of the cranium open.
4. *atrabilaria*.
5. *traumatica*.
6. *venenata*.
7. *mentalis*.
8. *cataleptica*.
9. *suffocata*.

SYMPTOMATIC.

1. *exanthematica*.
2. *arthritica*.
3. *verminosa*. Carus, cataphora, coma, and lethargus, are degrees only of apoplexy.

GENERA.

37. *Paralysis* ---- { A loss of the power of voluntary motion affecting certain parts.

SPECIES.

1. *partialis*.
2. *hemiplegica*.
3. *paraplegica*.
4. *venenata*.

SYMPTOMATIC.

1. exanthematica.
2. arthritica.
3. verminosa.
4. scrophulosa.
5. syphilitica.
6. traumatica.

 CLASS II. NEUROSES.

ORDER II. ADYNAMIÆ.

GENERA.

- | | | |
|--------------------------|---|---|
| 38. <i>Syncope</i> ----- | { | The respiration, and action of the heart, either cease, or become much weaker than usual, with paleness and coldness, arising from diminished energy of the brain, or from organic affections of the heart. |
|--------------------------|---|---|

SPECIES.

1. *cardiaca*, returning without a visible cause, and with violent palpitation of the heart during the intervals.
2. *occasionalis*, from a manifest cause.

GENERA.

39. *Dyspepsia* - - - -

{ Want of appetite; nausea;
vomiting; flatulence;
heart-burn; costiveness;
and pain in the stomach;
with other symptoms of
debility in the organ of
digestion.

SYMPTOMATIC.

1. schirrosa.
2. ulcerosa.
3. a veneno.
4. verminosa.
5. chlorotica.
6. gravidarum.
7. arthritica.
8. nephritica.

40. *Hypochondriasis* {

{ Dyspepsia; languor and
want of energy; dejection
of mind and apprehension
of evil, more especially
respecting health without
sufficient cause; with a
melancholic temperament.

CLASS II. NEUROSES.

ORDER III. SPASMI.

In the Animal Functions.

GENERA.

41. *Tetanus* - - - - - { Spasmodic rigidity of almost the whole body.

VARIETIES ARE,

1. *opisthotonos*,
2. *emprosthotonos*, and
3. *Trismus*, or locked-jaw.

SYMPTOMATIC.

1. syphiliticus.
2. verminosus.

42. *Convulsio* - - - - - { Alternate relaxations, with violent and involuntary contractions of the moving fibres, without sleep.

43. *Chorea* - - - - - { Convulsive motions of the limbs or trunk.

44. *Raphania* - - - - - { A spasmodic contraction of the joints, with convulsive motions and most violent pain: periodical.

45. *Epilepsia* - - - - - { Convulsions with sleep, and usually froth issuing from the mouth.

SPECIES.

1. *traumatica.*
2. *a dolore.*
3. *verminosa.*
4. *a veneno.*
5. *exanthematica.*
6. *a cruditate ventriculi.*
7. *ab inanitione.*
8. *uterina.*
9. *ex onanismo.*

In the Vital Functions.

GENERA.

- | | | |
|-------------------------------|---|---|
| 46. <i>Palpitatio</i> - - - - | { | A palpitation of the heart, either constant or frequently returning. |
| 47. <i>Asthma</i> - - - - - | { | Difficult respiration returning at intervals, with a sense of stricture across the breast and in the lungs; a wheezing; hard cough at first, but more free towards the close of every paroxysm, with a discharge of mucus, followed by a remission. |

SPECIES

1. *spontaneum.*
2. *exanthematicum.*
3. *plethoricum.*

SYMPTOMATIC.

1. arthriticum.
2. venereum.

GENERA.

- | | | |
|--------------------------------|---|--|
| 48. <i>Dyspnoea</i> - - - - | { | Difficult respiration continual, and without sense of stricture. Cough frequent through the whole course of the disease. |
| 49. <i>Pertussis</i> - - - - - | { | Convulsive, strangulating cough, with hooping, relieved by vomiting; contagious. |

In the Natural Functions.

- | | | |
|------------------------------|---|---|
| 50. <i>Pyrosis</i> - - - - - | { | Heartburn, with copious eructation, generally of a watery insipid fluid. |
| 51. <i>Colica</i> - - - - - | { | Pain in the lower belly, and twisting round the navel; vomiting; costiveness. |

SPECIES.

1. *spasmodica*.
2. *pictonum*, ending in palsy.
3. *stercorea*.

GENERA.

52. *Cholera* ----- { A purging and vomiting of bile; anxiety; painful gripings; spasms of the abdominal muscles, and those of the thighs.

53. *Diarrhæa* ----- { Frequent liquid stools with the natural excrement, but not contagious, and seldom attended with pyrexia.

SPECIES.

1. *crapulosa*.

2. *biliosa*.

3. *mucosa*.

4. *cœliaca*.

5. *lienteria*.

6. *hepatirrhæa*.

7. *verminosa*.

54. *Diabetes* ----- { A superabundant discharge of urine, which is limpid, and sweetish to the taste.

SYMPTOMATIC.

1. *hystericus*.

2. *arthriticus*.

GENERA.

55. *Hysteria* - - - - -

A grumbling noise in the belly; a ball ascending to the throat, with a sense of suffocation; stupor; insensibility and convulsions; involuntary laughing and crying; sleep interrupted by sighs; urine limpid and abundant, previous to the fit; great sensibility and irritability of mind.

SPECIES.

1. *chlorotica*.
2. *a menorrhagia*.
3. *a leucorrhœa*.
4. *libidinosa*.

56. *Hydrophobia* - -

A dread of water, as inducing painful convulsions of the pharynx.

CLASS II. NEUROSES.

ORDER IV. VESANIÆ.

GENERA.

57. *Amentia* - - - - -

Imbecility of intellect, by which the relations of things are either not perceived, or not recollected.

58. *Melancholia* - -

Erroneous judgment, but not merely respecting health, from imaginary perceptions, or recollections, influencing the conduct, and depressing the mind with ill-grounded fears; not combined with either pyrexia or comatose affections; often appearing without dyspepsia, yet attended with costiveness, chiefly in persons of rigid fibres and torpid sensibility.

59. *Insania* - - - - -

Erroneous judgment from imaginary perceptions, or recollections, attended with agreeable emotions in persons of a sanguine temperament. Vide *Cullen's Practice*, §. 1581.

GENERA.

60. *Mania* -----

A conception of false relations, and an erroneous judgment, arising from imaginary perceptions or recollections, exciting the passions, and producing unreasonable actions or emotion, with a hurry of mind in pursuing a train of thought, and in running from one train of thought to another, attended with incoherent and absurd speech, called raving, and violent impatience of either contradiction, or restraint.

61. *Oneirodynia* --

{ Disturbed imagination during sleep.

SPECIES.

1. *activa*. Walking in the sleep.
2. *gravans*. The incubus or night-mare.

CLASS III. CACHEXIÆ.

ORDER I. MARCORES.

GENERA.

62. *Tabes* ----- { Emaciation; weakness;
 { hectic.

SPECIES.

1. *purulenta.*
2. *scrophulosa.*
3. *venenata.*

63. *Atrophia* - - - - - { Emaciation; weakness,
but without hectic.

SPECIES.

1. *inanitorum.*
2. *famelicorum.*
3. *cacochymica.*
4. *debilium.*

CLASS III. CACHEXIÆ.

ORDER II. INTUMESCENTIÆ.

Adipose.

GENERA.

64. *Polysarcia* - - - Troublesome obesity.

Flatulent.

65. *Pneumatoxis* - - - { Air collected in the cellular texture under the skin, rendering it tense, elastic, and crepitating.

SPECIES.

1. *spontanea*.

2. *traumatica*.

3. *venenata*.

4. *hysterica*.

66. *Tympanites* - - - { Elastic distention of the abdomen, not readily yielding to pressure, and sounding like a drum, with costiveness and atrophy; but no fluctuation.

SPECIES.

1. *intestinalis*, with discharge of wind giving relief.

2. *abdominalis*, without such relief.

GENERA.

67. *Physometra* -- { A permanent elastic swelling in the hypogastrium from flatulent distention of the womb.

Aqueous.

68. *Anasarca* ----- { Swelling on the surface of the body; not elastic; pitting by the pressure of the finger; and rising slowly to its former fullness.

SPECIES.

1. *serosa.*
2. *exanthematica.*
3. *a compressione.*
4. *debilium.*

69. *Hydrocephalus* - { External swelling of the head, soft, not elastic.

The *internal hydrocephalus* has been described already as the third species of *Apoplexia*.

70. *Hydrorachitis* - { Tumour in new-born infants on the lumbar vertebræ, soft, and small.

GENERA.

71. *Hydrothorax* - - { Dyspnoea; paleness of face; adematous swellings of the feet; scarcity of urine; impatience of an horizontal position, with sudden starting from sleep, and palpitation; fluctuation of water in the chest.
72. *Ascites* - - - - - { Swelling of the abdomen, tense, and scarcely elastic; with fluctuation.

SPECIES.

1. *abdominalis*.
2. *saccatus*.

73. *Hydrometra* - - { A swelling in the hypogastrium of females not pregnant; with fluctuation; no suppression of urine.
74. *Hydrocele* - - - - { A soft tumour of the scrotum, increasing slowly, without pain, fluctuating, generally pellucid.

Of the Solids.

75. *Physconia* - - - - { Tumour occupying chiefly one part of the abdomen, increasing slowly, and neither sonorous nor fluctuating.

SPECIES.

1. *hepatica.*
2. *splenica.*

4. *hepaticus*.
5. *gravidarum*.
6. *infantum*.

GENERA.

85. *Chlorosis* ----- { Dyspepsia; livid paleness;
great debility; palpitation;
depraved appetite,
with *amenorrhœa*.

CLASS IV. LOCALES.

ORDER I. DYSÆSTHESIÆ.

86. *Caligo* ----- { Sight diminished, or destroyed,
by the interposition of a dark body,
between the object and the retina.

SPECIES.

1. *lentis.*
2. *corneæ.*
3. *pupillæ.*
4. *humorum.*
5. *palpebrarum.*

GENERA.

87. *Amaurosis* - - - -

{ Sight diminished, or destroyed, without any visible injury of the eye: the pupil mostly dilated and immoveable.

SPECIES.

1. *compressionis.*
2. *atonica.*
3. *spasmodica.*
4. *venenata.*

88. *Dysopia* - - - - -

{ Sight depraved, requiring one certain quantity of light, one particular distance, or one position.

SPECIES.

1. *tenebrarum.*
2. *luminis.*
3. *dissitorum.*
4. *proximorum.*
5. *lateralis.*

GENERA.

89. *Pseudoblepsis* -- { Sight depraved, creating
objects, or representing
them different from what
they are.

SPECIES.

1. *imaginaria*.

2. *mutans*.

90. *Dysecæa* ----- { Hearing diminished, or
destroyed.

SPECIES.

1. *organica*, from wax in the meatus, injuries of the membrana, or inflammation and obstruction of the tuba.

2. *atonica*, without any discernible injury of the organ.

91. *Paracusis* ----- Hearing depraved.

SPECIES.

1. *imperfecta*.

2. *imaginaria*.

92. *Anosmia* ----- { Smell diminished, or de-
stroyed.

SPECIES.

1. *organica*.

2. *atonica*.

GENERA.

93. *Ageusia* ----- { Taste diminished, or destroyed.
94. *Anæsthesia* ---- { Touch diminished, or destroyed.

CLASS IV. LOCALES.

ORDER II. DYSOREXIÆ.

95. *Bulimia* ----- { Appetite voracious or canine.

SYMPTOMATIC.

1. verminosa.
2. a rachitide.
3. ab acidis.

96. *Pica* ----- { Appetite depraved, or a strong desire of unnatural food.

SPECIES.

1. *infantis*.
2. *chlorotica*.
3. *gravidarum*.
4. *medicatrix*.

97. *Polydipsia* ----- Excessive thirst.

SYMPTOMATIC.

1. febrilis.
2. hydropica.
3. fluxuum.
4. a venenis.

GENERA.

98. *Satyriasis* - - - { Excessive and violent desire for coition in men.
99. *Nymphomania*. The same in women.
100. *Nostalgia* - - - { Impatience when absent from one's native home, and vehement desire to return, attended with gloom and melancholy, loss of appetite, and want of sleep.

This is merely symptomatic.
102. *Anaphrodisia* - Impotence.

SPECIES.

1. *paralytica*.
2. *gonorrhoeica*.

CLASS IV. LOCALES.

ORDER III. DYSCINESIÆ.

GENERA.

103. *Aphonia* - - - - { Suppression of the voice,
without either syncope,
or coma.
104. *Mutitas* - - - - - Dumbness.

SPECIES

1. *organica*.
2. *atonica*.
3. *surdorum*.
105. *Paraphonia* - - Depravation of voice.
106. *Psellismus* - - - { Vitiating articulation of the
voice.
107. *Strabismus* - - - Squinting.
108. *Contractura* - - { A rigid contraction of a
joint.

SPECIES.

1. *ab inflammatione*.
2. *spasmo*.
3. *ob antagonistas paralyticos*.
4. *ab acrimonia irritante*.
5. *articularis*.

CLASS IV. LOCALES.

ORDER IV. APOCENOSES.

GENERA.

109. *Profusio* - - - - Loss of blood.

110. *Ephidrosis* - - - { A violent and morbid
sweating.

Generally symptomatic.

111. *Epiphora* - - - - A flux of tears.

112. *Ptyalismus* - - A salivation.

113. *Enuresis* - - - - { Involuntary discharge of
urine.

SPECIES.

1. *atonica*.

2. *ab irritatione vel compressione vesicæ*.

114. *Gonorrhæa* - - { A preternatural flux from
the urethra in men.

SPECIES.

1. *pura*, not arising from impure connection, and without disuria.

2. *impura*, arising from the action of the venereal virus on the urethra, producing first an itching at its orifice; afterward a discharge like pus; ardor

urinæ; often phymosis; paraphymosis; and swelled testicles.

3. *laxorum*.

4. *dormientium*.

CLASS IV. LOCALES.

ORDER V. EPISCHESES.

GENERA.

115. *Obstipatio* - - - Costiveness.

SPECIES.

1. *debilium*.

2. *rigidorum*.

3. *obstructorum*.

116. *Ischuria* - - - - Suppression of urine.

SPECIES.

1. *renalis*.

2. *ureterica*.

3. *vesicalis*.

4. *urethralis*.

117. *Dysuria* - - - - { Difficulty, and pain, in
discharging water.

SPECIES.

1. *ardens*.

2. *spasmodica*.

3. *compressionis*.

- 4. *phlogistica*
- 5. *calculosa.*
- 6. *mucosa.*

GENERA.

- 118. *Dyspermatis-*
mus - - - - - { Seminis in actu venereo
tarda, impedita, et ad
generationem insufficiens
emissio.
- 119. *Amenorrhæa* - { Menses wholly or partially
obstructed without preg-
nancy.

CLASS IV. LOCALES.

ORDER VI. TUMORES.

- 120. *Aneurisma* - - { A soft tumour, with pulsa-
tion, on arteries.
- 121. *Varix* - - - - - { A soft tumour, without
pulse, on veins.
- 122. *Ecchymoma* - { A black and blue swelling,
either from a bruise, or
from a morbid extravasa-
tion of blood.
- 123. *Schirrus* - - - - { A hard tumour of a glan-
dular part, indolent, and
not readily suppurating.

GENERA.

1. *Gas oxygenium.*
 2. *Gas azoticum.*
 3. *Gas hydrogenium.*
 4. *Gas acidum Carbonicum.*

These factitious airs promise, under the skilful management of Dr. BEDDOES at the Hot Wells, Bristol, and Dr. THORNTON in London, to be a remedy well worthy the attention of the medical practitioner.

The *oxygene air*, in a properly diluted state, is a stimulus the most natural and diffusive. It promotes the insensible perspiration, greatly aids digestion, favours sleep, exhilarates the spirits, and relieves difficult respiration. It is found of the highest use in the low nervous fever. The *azotic air* abates inflammation, and is the only remedy with the *hydrogene air* that is found capable of arresting the progress of consumption; and the *carbonic acid air* is a most powerful antiseptic.
