Visiting with children?

Given the nature of the **BODY WORLDS Vital** exhibits, it is up to parents, guardians, or school staff to decide whether the exhibition is appropriate for the children in their care. As a guideline, we suggest that **BODY WORLDS Vital** is of particular interest to children aged 8 and over, and adults of all ages. This is for guidance only - you know your children best. We advise that all children are accompanied by an adult.

If you are considering bringing children or school groups to **BODY WORLDS Vital**, please refer to our online guides which have been developed to help you make the most of your visit: life.org.uk

The Centre for Life is a registered charity (no. 10599607). As we're a charity, Science Centre tickets include a voluntary 10% donation which allows us to claim an extra 25p in every pound from the Government, providing the donor is a UK tax payer. It's called a Gift Aid visit and it makes a huge difference to charities like us. To enable us to reclaim your Gift Aid, you must be giving an amount of income or capital gains tax of least equal to or greater than the amount of this donation. If you want to opt out of the donation, admission charges to the Science Centre are: adult £10.85, concession £8.60, family £26.50 and child £6.85. All information correct at time of going to print. Programme is subject to change, please see our website for latest information.

BODY WORLDS
VITAL
The Exhibition of
Real Human Bodies

BODY WORLDS Vital is an awe-inspiring journey through the human body, celebrating its complexity, beauty and potential. It makes its UK debut at the Life Science Centre, Newcastle, in May 2014.

Over 38 million people have experienced **BODY WORLDS** in over 90 cities worldwide including Tokyo, New York, Los Angeles and Mexico City - now here's YOUR chance to see it in Newcastle.

BODY WORLDS Vital brings together a collection of real human bodies, specimens, organs and body slices which have been willed by donors and preserved through plastination, a ground-breaking method for specimen preservation invented by Dr. Gunther von Hagens.

This is a rare opportunity to experience a truly unique exhibition that helps us to understand the wonder, sophistication and fragility of our own bodies.

What celebrities say about
BODY WORLDS

"Thank you for such an important exhibit. What a wonderful way to learn."
Nicole Kidman

"Absolutely remarkable! A gift of exploration that everyone except the faint-hearted should see ... thank you!"
Demi Moore

"Awe-inspiring".
Nick Nolte

"I am now able to understand my body in a much better way! Congratulations on such a sensational exhibition and a very enlightening tour."
Steffi Graf

What other people say about
BODY WORLDS

"You can only learn so much in class before you yearn to see it in real life. Thanks for making it happen."
- Jessica

"Every once in a while I experience something spectacular, something that makes me realise the complexities of the human mind and what we are capable of. Today was one of those moments. Extraordinary!"
- LeLe

"Not merely a lesson in physiology and anatomy - ARTWORK! Beautiful."
- EZ

Special Events
