THE GREATEST NOVELTY in the WORLD!

He is perfect symmetry and possesses a handsome countenance, features well proportioned, is of very docile and amiable temper and manners, and is, in fact a perfect model of Saxon Beauty.

The most eminent of the Faculty have pronounced him perfectly healthy, and free from Dropsy, as proved by the following certificate:—

23. Alfred Place, Bedford Square, London.

I have examined James Paine (the fat boy), and find he is free from dropsy, and all other disease. He is the subject of an extraordinary development of the bone, muscles, and fatty tissue, in a child of 6 years old; he has herculean strength, is active and vigorous as possible, and his body is perfectly symmetrical and well proportioned. The boy is a perfect picture of jolly power and happiness, weighs 11 stone and a half at present, and has grown immeasurably since I saw him last. His appearance excites the admiration of all who see him.
