**THE BIO-LIGHT MISSION**

Since the dawn of civilization, Man has drawn on the beneficial detoxifying properties of the plants, herbs, flowers and roots that grow in abundance in our planet. Phytotherapy has been utilized with success throughout Europe, particularly in the west.

The BIO-LIGHT philosophy is to follow the natural way, to avoid the synthetic alternatives so harmful to the body, to restore the balance.

Excess weight, to be lost, is not necessarily the result of an unhealthy or harmful diet, but of the body's weight.

Additionally, most "herbal" and "natural" products on the market are, in the end, too thick, too hard to digest, too difficult to assimilate in the gut.

Excess weight is not about your body's ability to process food. It is about the way you eat. Through the elimination of excess energy, the concept, which allows the body of "average" people, can be controlled to energy and a feeling of well-being, making weight loss and improved digestion easy to achieve.
