*20 March 1830*

# **251, Regent-St.**

*Nearly opposite the Argyll Rooms.*

---

*To be seen daily, the Beautiful*

## **Spotted Girl.**

This interesting Female had the distinguished honour of being presented by the celebrated Josh. Brookes, Esq. F.R.S. &c. on Monday the 22nd of February, to the Royal College of Physicians, when near 400 Members were assembled. Sir Henry Hallford, President. It is a certain fact there never was before exhibited a Phenomena so rare, and it is sincerely hoped she will meet with Patronage from the Nobility and the Public generally.

Miss FABRIAN is most curiously spotted; to give a full description of her, would be impossible, sight alone must realize the fact, words would only convey conception far below reality, similar to a painter's works, when compared to the sublimity of nature.

The greatest proof of delight manifested by Ladies, in beholding this interesting Female, is, the hundreds daily recommended by those who have visited her.

*Admittance One Shilling. Open from 11 till 5.*

There is also a fine Cosmographic View of the Thames Tunnel, without extra charge.
