Acrosyl

(Trad.)

THE PERFECT DISINFECTANT

ACROSYL is an ANTISEPTIC consisting of saponified Cresols and possessing the following advantages over other preparations of a similar composition:—

- 1.—Prepared only from specially selected Cresols freed from all impurities.
- 2.—Of high bactericidal and germicidal value.
- 3.—ACROSYL is of low toxicity being an eighth that of Carbolic Acid.
- 4.—Entire absence of caustic and irritating effect on epidermal and other tissues when employed in strengths indicated.

N.B.—ACROSYL exercises a solvent action on mucus and grease and removes sanguineous accumulations. It is therefore eminently suitable for use in SURGICAL and MIDWIFERY practice.

Further particulars and samples supplied to the Medical Profession on application to

THE ACROSYL COMPANY, Sutherland House, LLOYDS AVENUE, LONDON, E.C.

BLOTTER (with Compliments).

Manufactured in Great Britain.
