CAPRITON

Trade Mark

for the relief of
symptoms of the
common cold

Capriton tablets have a combined anti-allergic, decongestant, analgesic and antipyretic action.

Piriton, a potent antihistamine of low toxicity, is included in the formula to counteract the allergic symptoms sometimes responsible for upper respiratory tract congestion and irritation occurring in association with the common cold.

Phenylephrine hydrochloride, an effective sympathomimetic agent when given by mouth, constricts the blood vessels of congested nasal mucous membranes and promotes normal drainage so that the risk of bacterial infection is reduced. When taken orally, phenylephrine hydrochloride does not cause ciliary paralysis or damage to the mucosa.

Aspirin is present in sufficient quantity to provide analgesia and antipyresis. A small dose of caffeine counteracts any tendency to daytime drowsiness without interfering with normal sleep rhythm.

PRESENTATION AND BASIC NHS COST

Capriton Tablets are supplied in packs containing 12 tablets.

Each tablet contains:

Chlorpheniramine maleate BP (Piriton)	2 mg
Phenylephrine hydrochloride BP	10 mg
Aspirin BP	450 mg
Caffeine BP	30 mg

Basic NHS cost per pack is 2/2d. plus purchase tax.

Full information is available on request.
