CANDLESTICK 1767 made by Ebenezer Coker, a prolific maker of candlesticks. This type was usually cast in two halves and then soldered together. The decoration was then finished by chasing, and here the use of the shell motif, a popular rococo characteristic, is well shown.

CHOLEDYL

(choline theophyllinate BP)

the true, stable salt of theophylline provides:

- Effective and prolonged bronchodilatation
- Continuous and predictable response despite prolonged administration.
- Being a stable salt, it is much less likely to cause gastric irritation.

"Compared to aminophylline it (Choledyl) is more soluble, more stable, better absorbed from the gastrointestinal tract, and less irritating to the gastric mucosa."

(Goodman, L. S. and Gilman, A., 1970
The Pharmacological Basis of Therapeutics, p. 366)

It is economical.

The basic NHS cost of the usual adult dose of 600mg daily is less than 1½p.

PRESENTATION AND BASIC NHS COST:

Choledyl is available in tablets of 100mg or 200mg choline theophyllinate BP in bottles of 100 and 500. Basic NHS cost of 100 tablets of each strength is 46p and 60p, respectively.

Choledyl Syrup contains 62.5mg choline theophyllinate BP per 5ml spoonful. Available in bottles of 150ml and 2 litres. Basic NHS cost of 150ml is 39p.
