REDBREAST.

# WHEN SUMMER TIME ENDS

## IT'S DEQUADIN LOZENGE TIME

... mouth and throat infections increase

DEQUADIN LOZENGES provide dequalinium chloride BP, the potent antibacterial and antifungal compound, ideally suitable for the eradication of infections of the mouth and throat. The retention of active Dequadin on the infected tissues ensures prolonged and effective bacteriostasis despite constant salivary washings and the possibility of symptoms being masked is avoided by the exclusion from the formula of any surface-acting anaesthetic. Sucked slowly for fast relief. Each Dequadin Lozenge contains 0.25 mg dequalinium chloride BP. Available in tubes of 20 lozenges. Basic NHS cost: 1/8d.

*Dequadin is a Trade Mark of Allen & Hanburys Limited*
