Black Hairstreak

REPRODUCED FROM CURTIS, BRITISH ENTOMOLOGY, 1824-1839
BY PERMISSION OF THE TRUSTEES OF THE BRITISH MUSEUM (NATURAL HISTORY)

Dequadin^{Trade Mark} Lozenges

For rapid control of
infections of the mouth
and throat

Dequadin Lozenges contain dequalinium chloride BP, which has a very wide range of antibacterial and antifungal activity. They avoid the undesirable features of topical antibiotic therapy, ensuring rapid control of infection without the risk of bacterial superinfection or monilial overgrowth and without the development of resistant strains. Dequadin Lozenges contain no local analgesic.

DOSAGE

The recommended dosage of Dequadin Lozenges is one lozenge to be sucked slowly and repeated as necessary. Dequadin Lozenges are non-irritant and can safely be given to children.

PRESENTATION

Dequadin Lozenges containing 0.25 mg dequalinium chloride BP in a flavoured sucrose base, are available in tubes of 20 and strip-packed in cartons of 40. The basic NHS cost for a tube of 20 lozenges is 1/8d. Detailed information is available on request.

Dequadin is a Trade Mark of
