Duke of Burgundy Fritillary

REPRODUCED FROM CURTIS, BRITISH ENTOMOLOGY, 1824-1839
BY PERMISSION OF THE TRUSTEES OF THE BRITISH MUSEUM (NATURAL HISTORY)

Dequadin^{Trade Mark} Lozenges

For rapid control of
infections of the mouth
and throat

Dequadin – dequalinium chloride BP – possesses pronounced antibacterial and antimycotic properties. It has an exceptionally wide spectrum of activity and, in low concentration, inhibits nearly all bacteria pathogenic to man, including penicillin-resistant organisms. The action of Dequadin is not diminished in the presence of serum. The drawbacks associated with the topical use of antibiotics are well known. Dequadin Lozenges may be prescribed with confidence for patients of all ages, since they contain no antibiotic and therefore carry no risk of sensitisation, development of resistant strains or of secondary bacterial or fungal infection. Dequadin Lozenges do not contain a local anaesthetic.

Each lozenge contains 0.25 mg dequalinium chloride BP in a pleasantly flavoured sucrose base.

PRESENTATION AND BASIC NHS COST

Dequadin Lozenges are supplied in tubes of 20 and strip packs of 40. Basic NHS cost: 1/8d and 3/- respectively.

Full information is available on request.

Dequadin is a Trade Mark of
