Small Pearl Bordered Fritillary

REPRODUCED FROM CURTIS, BRITISH ENTOMOLOGY, 1824-1839
BY PERMISSION OF THE TRUSTEES OF THE BRITISH MUSEUM (NATURAL HISTORY)

Dequadin^{Trade Mark} Paint

(containing 0.5% dequalinium chloride BP in propylene glycol)

For rapid control of
infections of the mouth
and throat

Dequadin – dequalinium chloride BP – possesses pronounced antibacterial and antimycotic properties. It has an exceptionally wide spectrum of activity and, in low concentration, inhibits nearly all bacteria pathogenic to man, including penicillin-resistant organisms. The action of Dequadin is not diminished in the presence of serum. The drawbacks associated with the topical use of antibiotics are well known, Dequadin Paint contains no antibiotic and therefore carries no risk of sensitisation, development of resistant strains or secondary bacterial or fungal infection. Dequadin Paint contains no local anaesthetic. Dequadin Paint is suitable for patients of all ages.

PRESENTATION AND BASIC NHS COST

Dequadin Paint is supplied in bottles of 28 ml. Basic NHS cost per bottle is 5/10d.

Full information is available on request.

Dequadin is a Trade Mark of
