FENTAZIN

Trade Mark

**the ideal tranquilliser
in severe anxiety
or agitation**

Fentazin (perphenazine BP) is a phenothiazine derivative of low toxicity.

INDICATIONS

Severe anxiety and tension states, particularly where agitation is present.

Anxiety associated with psychosomatic disorders.

Severe anxiety associated with obsessive and compulsive disorders.

Psychotic states characterised by CNS hyperactivity including schizophrenia of various types and senile psychoses.

Control of behaviour disorders.

Nausea and vomiting.

Adjunctive therapy to analgesics in the management of severe pain e.g. terminal carcinoma.

Fentazin by injection is used as pre-medication and for the control of post-operative vomiting. It may also be of value in the treatment of intractable hiccough.

PRESENTATION AND BASIC NHS COST

Fentazin Tablets contain 2, 4, or 8 mg perphenazine BP.

Supplied in containers of 50 and 500 tablets of each strength.

Basic NHS cost of 50 tablets of each strength is 3/4d, 5/10d and 9/6d respectively.

Fentazin Syrup contains 3 mg perphenazine BP in each 5 ml dose.

Supplied in bottles of 150 ml or 2 litres. Basic NHS cost of a bottle of 150 ml is 4/8d.

Fentazin Injection contains 5 mg perphenazine BP in each ml.

Supplied in ampoules of 1 ml in boxes of 5 and 100 (20 x 5) ampoules. Basic NHS cost of 5 ampoules is 3/6d.

Detailed information is available on request.
