HORSE GUARDS. William Kent designed the Horse Guards building in Whitehall about 1745, but it was in fact erected after his death by John Vardy. Its west front faces St. James's Park, its east front looks across Whitehall to Inigo Jones' Banqueting House. The daily changing of the Guard is today a popular tourist attraction. The picture shows the Park front, with Horse and Foot Guards parading in the forecourt. To the left is the Admiralty, built by Thomas Ripley in 1722-1726.

GUANIMYCIN

SUSPENSION FORTE

for rapid and highly effective
control of bacterial diarrhoeas

In Guanimycin Suspension Forte the combination of two proven antibacterials with differing modes of action reduces the risk of bacterial mutation to resistant organisms.

These two well-established antibacterials combined with a fully effective dose of light kaolin BP ensure:

- ☐ Rapid eradication of bacterial infection
- ☐ Rapid relief of unpleasant symptoms
- ☐ Rapid restoration of normal bowel function

Guanimycin Suspension Forte is a pleasant, fruit-flavoured, ready to use suspension with a low dose volume.

PRESENTATION

Each 15 ml (adult dose) of Guanimycin Suspension Forte contains:

Dihydrostreptomycin sulphate BP 1958 (equivalent to 0.1975 g of base)	0.25g
Sulphaguanidine BPC	1.985g
Light kaolin BP	4.25g

Available in bottles of 150 ml.

Full prescribing information is available on request.
