*The Lister Institute*

OF PREVENTIVE MEDICINE

FREE FROM  
*Extraneous Pathogenic Bacteria*  
OF HIGH POTENCY.

WHOLESALE AGENTS:

ALLEN & HANBURY'S Ltd., Lombard St., LONDON.

TELEGRAMS: "ALLENBURY'S, LONDON."

The Calf Lymph issued by the Lister Institute is rendered free from all extraneous pathogenic bacteria by the chloroform process.—(*The Lancet*, Vol. I, 1903, and Vol. I, 1904).

By this process the lymph is rendered free from germs within a few hours of its collection from the calf, and thus can be used during the period of highest potency. This lymph, after use in many thousands of cases, has given very high "case and insertion" success.
