RECTAL OINTMENT AND SUPPOSITORIES

**for rapid effective
relief of haemorrhoids
and related conditions**

Propaderm-L preparations are a formulation of Propaderm – the most powerful topical steroid and Lignocaine – the most trusted local analgesic.

Propaderm (beclomethasone dipropionate) has proven efficacy in the treatment of skin conditions such as eczema, dermatitis and psoriasis. Success with Propaderm has been demonstrated, even in patients who have failed to respond to other potent topical anti-inflammatory steroids (Caldwell et al., 1968; Fine et al., 1968).

Lignocaine is an effective, fast acting and non-irritant local analgesic both when injected and applied topically. It has been in widespread use for over 20 years, yet very few cases of sensitivity have been reported.

PRESENTATION AND BASIC NHS COST

Propaderm-L Rectal Ointment is available in tubes of 15 g, complete with special nozzle, at a cost of 9/-.

Propaderm-L Suppositories are supplied in boxes of 10, cost 9/-.
