# Triptafen-DA

Trade Mark

for the patient  
trapped by depression  
and anxiety

Many emotionally disturbed patients presenting to the General Practitioner exhibit depression and anxiety simultaneously. Treatment of the two symptoms must itself be simultaneous, otherwise alleviation of one may aggravate the other. Triptafen-DA was designed specifically to meet this situation. Triptafen-DA is a balance of two psychotropic agents: perphenazine the tranquilliser and amitriptyline the antidepressant. Both are well established and well documented. Both combine high efficacy with low incidence of side effects.

Triptafen-DA tablets contain amitriptyline HCl 25mg and perphenazine BP 2mg  
The basic NHS cost of 50 tablets is 13/10d
