For depression and anxiety

# Triptafen-DA

TRADE MARK

combined antidepressant  
and tranquilliser

amitriptyline hydrochloride and perphenazine

Triptafen-DA combines the established antidepressant effect of amitriptyline hydrochloride with the tranquillising action of perphenazine. This combination has been shown to be more effective than either drug used alone. Triptafen-DA simplifies the treatment of depression and other psychoneurotic conditions, especially when anxiety is present.

#### *DOSAGE*

The recommended dosage of Triptafen-DA is one tablet or one 10 ml dose of suspension three times a day, with a fourth dose at night. The dosage should be adjusted with the patient's response to treatment.

#### *PRESENTATION*

Triptafen-DA Tablets contain amitriptyline hydrochloride BP 25 mg and perphenazine BP 2 mg and are supplied in containers of 50 and 500 tablets. Basic NHS cost of 50 tablets is 13/10d.

Triptafen-DA Suspension contains 37.5 mg amitriptyline embonate (equivalent to 25 mg amitriptyline hydrochloride BP) and 2 mg perphenazine BP in one 10 ml dose and is supplied in bottles of 150 ml and 500 ml. Basic NHS cost for a bottle of 150 ml is 7/9d.

Detailed information is available on request.

Triptafen-DA is a Trade Mark of
