To the Medical Profession.

*Valuable in Incipient Phthisis,
Anæmia and in Convalescence, especially of Children.*

BYNO' HÆMOGLOBIN

ANALYSIS:

Albuminoids per cent. 20·12
Maltose 23·31
Dextrine 5·25
Mineral Matter .. 0·90
Iron 0·04

The Albuminoids are not coagulated by heat, hence they are very easy of assimilation. The Maltose contains active diastase, which promotes the digestion of farinaceous foods.

Samples and full particulars on request.
