As a tonic for administration after influenza

BYNIN AMARA

is pre-eminently useful. Many years' experience has shown how efficacious is this preparation of quinine phosphate, iron phosphate, and the alkaloids of nux vomica. Instead of the customary syrup vehicle it contains Bynin Liquid Malt, which helps the weakened functions of the alimentary system, provides various nutrient substances, efficiently dissolves the tonic ingredients, and improves their flavour.

DOSE: One dessertspoonful to one tablespoonful
in water three times a day after meals.

In bottles of 5 oz. at 2/-, 10 oz. at 3/6, 20 oz. at 6/6, and 40 oz. at 12/-, and in winchesters at 24/- (prices in Great Britain and Northern Ireland, subject to alteration without notice).
