CANNET.

DEQUADIN^{Trade Mark} PAINT

containing 0.5 per cent dequalinium chloride BP in propylene glycol

has an exceptionally wide antibacterial spectrum and inhibits, at low concentration, nearly all the bacteria pathogenic to man

is active against organisms resistant to antibiotics

is antifungal and rapidly effective in the treatment of oral thrush

*is an antiseptic—therefore no antibi-
otic sensitization reactions
is not diminished in activity by the
presence of serum*

*is retained on tissue, thus ensuring
prolonged local anti-microbial activity
is easy to apply and does not give
rise to pain or other side effects
is the certain means of effective,
topical treatment for infections of the
mouth and throat, such as:*

**SORE THROAT · TONSILLITIS · VINCENT'S
ANGINA · ORAL THRUSH · AND INFECTED
ULCERS OF THE GUMS, BUCCAL MEM-
BRANE AND THE THROAT**

MODE OF APPLICATION

Apply the paint by means of a brush or pledget of cotton wool wound round a suitable holder or applicator. The paint should be applied every three hours and the patient instructed not to swallow for a few moments after each application.

CAUTION

Dequadin Paint is intended for intra-oral use only.

PRESENTATION

Dequadin Paint is supplied in bottles of 28 ml. The basic price to the NHS per bottle is 5/10
