You get as much out of urine as you put into it

A small urine sample; a storehouse of information that can provide vital diagnostic information. Tap it with Bili-Labstix* – the broadest urine-screening reagent strip available. Dip its six reagent areas into a urine sample and within 30 seconds you can get readings on pH, protein, glucose, ketones, bilirubin and blood. Information which is useful in evaluating urinary tract and kidney status, renal function, carbohydrate metabolism, liver and biliary tract function. There's no faster or easier way to get more out of urine.

And for a reading on Urobilinogen use Urobilistix* Reagent strips.

Bili-Labstix
tells you what your patients can't

To: Ames Company, P.O. Box 17479, Hillbrow, Transvaal.

☐ Please send me full information on Bili-Labstix.

☐ Please have your Systems Specialist call to arrange a demonstration.

At your fingertips: a miniature laboratory

Just add blood!

The Ames/BMI* Blood Analyser enables you (or your nurse!) to perform 14 different blood tests, quickly, accurately, reproducibly and economically. Everyday. While the patient's right there. The clinical picture still fresh in your mind.

The system is so easy your present staff can perform the tests. 14 different blood chemistries:

albumin
alkaline phosphatase
bilirubin

BUN
cholesterol
creatinine
cyanmethaemoglobin
globulin by derivation
PSP (Urine test)

oxyhaemoglobin
SGOT
SGPT
total protein
true glucose
uric acid
