ON TODAYS BATTLEFIELDS –

CHYMORAL

In 1066 there was little sophistication in the treatment of trauma. On the 'battlegrounds' of today – sportsfields, playgrounds, factories and homes, on the open road – where accidental trauma abounds, the physician can rely on CHYMORAL to help him get the casualties back in action.

Bayeux Tapestry: courtesy of the Society of Antiquaries.

In contusions and sprains, CHYMORAL reduces swelling and pain, hastens healing, shortens recovery time. Its enzymatic action produces faster resolution of serous and haemorrhagic exudates. CHYMORAL has been recommended* in severe contusions where haematomata are present, in sprains accompanied by ecchymosis and in fibrillar rupture of muscle, to prevent sequelae such as scars or osteomata.

*Lopez Quiles J, (1965) Paper presented at the 5th Latin Congress of Physical and Sporting Medicine, Lisbon.

Dosage

2 tablets qid until clinical improvement occurs. Children under twelve 1 tablet qid. CHYMORAL should be administered half-an-hour before meals.

CHYMORAL proteolytic enzymes—each enteric coated tablet contains trypsin and chymotrypsin in a ratio of approximately six to one, providing enzyme activity equivalent to 50,000 Armour Units.

Packs and basic NHS prices

Bottles of 48 at 31/2

Bottles of 500 at 276/2d.
