People **VALUE** **most**
what SERVES them most!

'ASPRO' lives and grows; not by talk or guesswork, but by the **SERVICE** it renders all the people all the time. The public are not satisfied by old, go-slow, hit-or-miss remedies. In 'ASPRO' they have found a remedy which acts swiftly, which does not harm the heart or stomach. The immediate success of 'ASPRO' has been founded on the way it fulfils that public demand. 'ASPRO' never looks back. To-day it is acknowledged that

These People know 'ASPRO' as a true friend

READ THIS USER'S EXPERIENCE!

Miss A. DIGBY, of 19 Ringstead Road, Catford, S.E., writes:—
" 'ASPRO' tablets dispelled a recent attack of influenza. I had to give up my duties in an office and in the early stages I tried almost every household remedy, but without result, and gradually I became worse. Then I read in the newspaper of the wonderful properties of 'ASPRO' and I thereupon sent for a packet. After two tablets I felt considerably better and after repeated doses as directed I am quite well in only a few days."

73 YEARS OLD AND "FIT AS A FIDDLE"

341 Clock Face Road,
St. Helena, Lancs.

Sir,
I am just on 73 years old and as fit as a fiddle and both me and my wife are never without your favourite 'ASPROS'. Just a touch of the headache in a morning then an 'ASPRO' and you are O.K. again for the day. Glad to say my rheumatism hardly ever troubles me and everybody knows 'ASPROS' have done me good. I can do anything such as jumping, dancing or skipping with my rope.

Yours truly, GEORGE DAVIES.

How
to give
'ASPRO'
to the
Kiddies

Two simple methods of giving 'ASPRO' to the kiddies are: (a) with a little milk; or (b) break the tablets up and administer in a teaspoonful of jam. The dose is: children 3 to 6 years, $\frac{1}{2}$ tablet; 6 to 12 years, 1 tablet; 12 to 18 years, $1\frac{1}{2}$ tablets. 'ASPRO' like any other medicine, should not be given to babies under 3 years of age without medical advice.
