Pleasantly deflated!

ASILONE®

for the flatulent patient

Throughout the alimentary canal, ASILONE quickly relieves flatulence and distension caused by foam. It contains polymethylsiloxane which alters the surface tension of small stable foam bubbles; these coalesce, forming larger, unstable bubbles. As a result, foam disperses, gas is eliminated, discomfort relieved.

Tablets containing 250 mg. polymethylsiloxane, in packs of 12 and 100.

Additional information is available on request.
