RADIO-MALT

(Standardised Vitamins A B₁ B₂ and D)

Radio-Malt, prescribed at this time of the year, provides a valuable safeguard against attacks of invading organisms of disease when depleted reserves and lowered resistance due to lack of sunshine have rendered the patient unprotected against seasonal infections of coughs, colds, influenza, bronchitis and tonsillitis.

In convalescence also the daily administration of Radio-Malt restores vitality, gives a fillip to the sluggish appetite, stimulates peristalsis and hastens the return to full health.
