\*Prevalence for adult and population data were derived from the combined number of public sector seroprevalence surveys and 1999 population estimates for countries with no seroprevalence surveys available in 1999. In some countries, population data in 1999 were projected from the 2000 population estimates. The population estimates for 1999 were used for countries with no population estimates available in 1999. The population estimates for 1999 were used for countries with no population estimates available in 1999. The population estimates for 1999 were used for countries with no population estimates available in 1999. The population estimates for 1999 were used for countries with no population estimates available in 1999.
