Bareback in darkrooms...know the fucking risks

"Yeah I have fucked without condoms in backrooms. I'm pretty sure I'm negative, but I reckon as long as I'm doing the fucking I'll get away with it. Anyone getting fucked bareback in there has got to be positive, haven't they? So it's not like I can give them anything."

Just because you're doing the fucking, doesn't mean you can't get HIV. Infection is still a real risk. If you are HIV positive, you risk infection with a different or drug-resistant strain of HIV or getting other harmful infections.
