Bareback in darkrooms...know the fucking risks

"The sleazier the backroom the better... it's up front in there, no pissing about. If I'm fucking without condoms, I don't have to think about the other guy getting infected. Everyone in backrooms knows the score. If someone's fucking bareback then they've got to be positive, haven't they?"

Just because you're doing the fucking, doesn't mean you can't get HIV. Infection is still a real risk. If you are HIV positive, you risk infection with a different or drug-resistant strain of HIV or getting other harmful infections.
