Telling

If you and your boyfriend do not have HIV, you may have decided to fuck together without condoms.

If you then have unsafe sex with someone else - you'll need to tell your boyfriend. If you don't, you're putting him at risk without him knowing it.

If you take a risk, using a condom with your boyfriend is the only way to be sure that you don't infect him until you have an HIV test.

Gay relationships – worth talking about.

All GMFA campaigns are designed, planned and executed by volunteers. To volunteer for GMFA write, phone or e-mail: Unit 43, Eurolink Centre, 49 Effra Road, London, SW2 1BZ. 020 7738 6672. newvol@gmfa.demon.co.uk
