## How HIV transmission works: Oral Sex

It's rare to get HIV from giving someone a blowjob, and the risk is even lower if cum doesn't get into the mouth.

Saliva in the mouth can prevent HIV being passed on although the gums and throat may still be vulnerable.

It's extremely unlikely that you could catch HIV from having your cock sucked.

For more information on HIV & AIDS call THT Direct Helpline on 0845 122 1200 Mon-Fri 10am-10pm; Sat-Sun 12noon-6pm or visit [www.metromate.org.uk](http://www.metromate.org.uk)

GMFA's campaigns and actions are designed, planned and executed by positive, negative and untested volunteers. To volunteer for GMFA, phone, write or e-mail: 020 7738 6872
