## How HIV transmission works: Toys & Fisting

HIV can survive outside the body for several hours. If there is any HIV-infected blood or cum on shared dildos or other sex toys, then the virus can be passed on.

HIV can also be passed on when someone fists one person after another, without washing his hand or changing gloves, or fucks more than one person without changing condoms.

For more information on HIV & AIDS call THT Direct Helpline on 0845 122 1200 Mon-Fri 10am-10pm; Sat-Sun 12noon-6pm or visit [www.metromate.org.uk](http://www.metromate.org.uk)

GMFA's campaigns and actions are designed, planned and executed by positive, negative and untested volunteers. To volunteer for GMFA, phone, write or e-mail: 020 7738 6872
