Hello. Big Up. How can I help you? ... Hi, remember me? I called about fucking ... How did it go? I'm waiting 'til it feels right. Alright! I've got another question. ... Yes? ... It's about sucking. I met this yardie and he asked me to suck him off - I wanted to but I didn't and I was wondering if it was ... High risk or low risk? ... and whether I needed a condom and should I swallow? ... Depththroat ... Uh? ... It's the name of a movie but now some advice. Clinical evidence indicates that as far as HIV transmission goes giving head is low risk ... Giving head? ... Oh yes, there are a lot of terms, going down is another. You can reduce the risk of transmission even further by making sure that you don't swallow or by using a condom. Remember to check for sores ... Uh? ... in the mouth, on the dick and also look out for bleeding gums a definite no no ... This is getting nasty ... Hello! ... Yes ... In addition to all that, you've got to remember that syphilis, Hepatitis B, herpes and gonorrhoea can be transmitted orally ... Oh ... Listen, if in doubt don't and if you still want it - use a condom. In the heat of the moment putting on a condom gives you time to think about it all. Condoms taste tacky. Not all condoms. Some are flavoured ... Oh ... Yes, you can get strawberry, mint though I'm not sure about mango but I could go on an on and if it is all getting too much for you - try licking the shaft of his dick. You know you make a lot of sense ... That's why I'm here ... Can I call you again? ... Any time ... Click
