# **"Condoms make me lose my hard-on..."**

**"Really, it's no joke. As soon as I get one out, my dick starts to go soft and it's embarrassing. Usually I just don't fuck rather than go through the hassle of trying to keep a hard-on. But sometimes - like last night - I meet a guy who's determined to get fucked. I knew I shouldn't, but I thought I'd just put it in a bit and stop before I came. But once I started I just couldn't stop. I've been feeling pissed off with myself ever since. It's not my fault. I want to use condoms...I just can't."**

**If you just can't get hard in a condom, try these tips:**

- **get more comfortable with condoms by using them when you wank**
- **get the guy you're with to put the condom on you, wanking or sucking you to keep you horny**
- **get the condom on early in sex, a while before you're ready to fuck**
- **fuck using a Femidom (female condom). These seem to be a good barrier that should prevent HIV transmission**

**Rubberstuffers packs are FREE on the gay scene in London.  
Will you talk to him about HIV, or will you just use one?**
